*WindowsMedia - The Role of Microsoft Corporation in the Current Multimedia Industry* Claudius Benedikt Hildebrand,2007-07 Seminar paper from the year 2002 in the subject Computer Science - Internet, New Technologies, grade: 88% (A), UNITEC New Zealand (Faculty of Business - Department of Information Systems and Computing), course: Interactive Multimedia Development 1, 30 entries in the bibliography, language: English, abstract: This report will evaluate the role of Microsoft Corporation in the current multimedia industry. In order to get an impression about Microsoft's business, there is an overview of Microsoft's products and services at first. Next, it will be Microsoft's strongest competitors in the operating system market as most consumers of multimedia services have a Windows operating system which included a player for multimedia content. This player called Windows Media Player is being discussed and compared to the RealNetworks' RealOne player which is regarded as one of Microsoft's strongest competitors in the multimedia business. Consecutively, there is an investigation of electronic devices currently supporting the technology provided by Microsoft including different audio- and video codecs. Finally, there is a conclusion showing the results of the research and giving some recommendations when deciding which multimedia environment to choose: Microsoft or RealNetworks.

*Developer's Digital Media Reference* Curtis Poole,Janette Bradley,2013-04-26 Designed for media professionals working across a broad range of formats, Developer's Digital Media Reference is an excellent reference guide for those keeping pace with this dynamic industry. As convergence between the World Wide Web, multimedia, and television production communities continues, there is an increased demand for professionals to familiarize themselves with the many new delivery contexts, including hybrid DVD (where digital video content and computer data live on the same disc), interactive TV, and streaming media. Developer's Digital Media Reference covers essential technologies such as SVG (scalable vector graphics), SMIL (Synchronized Multimedia Integration Language, a markup language for creating animations on the web), MPEG-4 (compression standard for streaming audio/video), and Dynamic Web Applications. In addition to serving as a quick-look-up guide, this text is organized to explain today's major media: server-based architectures, disc-based architectures, distribution architectures, and merging/shared architectures. Each topic is discussed in terms of the technological background-evolution, current tools, and production tips and techniques.
