Social Media in the Courtroom Thaddeus A. Hoffmeister,2014-08-11 Social media hasn't just changed society—it's changing the way in which criminal law is prosecuted, defended, and adjudicated. This fascinating book explains how. While social media has become embedded in our society as a way to stay connected with friends, it serves another important purpose: to support the prosecution and defense of criminal cases. Social media is now used as proof of a crime; further, social media has become a vehicle for criminal activity. How should the law respond to the issue of online predators, stalkers, and identity thieves? This book comprehensively examines the complex impacts of social media on the major players in the criminal justice system: private citizens, attorneys, law enforcement officials, and judges. It outlines the many ways social media affects the judicial process, citing numerous example cases that demonstrate the legal challenges; and examines the issue from all sides, including law enforcement's role, citizens' privacy issues, and the principles of the Fourth Amendment. The author also shines a critical spotlight on how social media has enabled new types of investigations previously unimagined—some of which present ethical problems.

Mental Health Issues and the Media Gary Morris,2006-09-27 Mental Health Issues and the Media provides students and professionals in nursing and allied professions, in psychiatry, psychology and related disciplines, with a theoretically grounded introduction to the ways in which our attitudes are shaped by the media. A wide range of contemporary media help to create attitudes surrounding mental health and illness, and for all health professionals, the ways in which they do so are of immediate concern. Health professionals need to: be aware of media influences on their own perceptions and attitudes take account of both the negative and positive aspects of media intervention in mental health promotion and public education understand the way in which we all interact with media messages and how this affects both practitioners and service users. Covering the press, literature, film, television and the Internet, this comprehensive text includes practical advice and recommendations on how to combat negative images for service users, healthcare workers and media personnel.

Competition Law in Croatia Jasminka Pecotić Kaufman,Vlatka Butorac Malnar,Dubravka Akšamović,2022-10-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in Crotia covers every aspect of the subject — the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other

horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Crotia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.

Handbook on Networked Multipoint Multimedia Conferencing and Multistream Immersive Telepresence using SIP Radhika Ranjan Roy,2020-11-23 Handbook on Networked Multipoint Multimedia Conferencing and Multistream Immsersive Telepresence using SIP: Scalable Distributed Applications and Media Control over Internet is the first book to put together all IETF request for comments (RFCs), and the internet drafts standards related to the multipoint conferencing and immersive telepresence. This book includes mandatory and optional texts of all standards in a chronological and systematic way almost with one-to-one integrity from the beginning to end, allowing the reader to understand all aspects of the highly complex real-time applications. It is a book that network designers, software developers, product manufacturers, implementers, interoperability testers, professionals, professors, and researchers will find to be immensely useful. Practitioners and engineers in all spectrums who are concentrating on building the real-time, scalable, interoperable multipoint applications, can use this book to make informed choices based on technical standards in the market place, on all proprietary non-scalable and non-interposable products. This book will provide focus and foundation for these decision makers.

The Routledge Handbook of Privacy and Social Media Sabine Trepte,Philipp K. Masur,2023-06-27 This volume provides the basis for contemporary privacy and social media research and informs global as well as local initiatives to address issues related to social media privacy through research, policymaking, and education. Renowned scholars in the fields of communication, psychology, philosophy, informatics, and law look back on the last decade of privacy research and project how the topic will develop in the next decade. The text begins with an overview of key scholarship in online privacy, expands to focus on influential factors shaping privacy perceptions and behaviors – such as culture, gender, and trust – and continues with specific examinations of concerns around vulnerable populations such as children and older adults. It then looks at how privacy is managed and the implications of interacting with artificial intelligence, concluding by discussing feasible solutions to some of the more pressing questions surrounding online privacy. This handbook will be a valuable resource for advanced students, scholars, and policymakers in the fields of communication studies, digital media studies, psychology, and computer science. Chapter 22 and Chapter 30 of this book are freely available as downloadable Open Access PDFs at http://www.taylorfrancis.com under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Bullying, Cyberbullying and Student Well-Being in Schools Peter K.

Smith,Suresh Sundaram,Barbara A. Spears,Catherine Blaya,Mechthild Schäfer,Damanjit Sandhu,2018-05-31 School bullying and cyberbullying are widely recognized as an international problem, but publications have focused on the western tradition of research. In India, recognition of these issues and research on the topics have been emerging in recent years. Beginning with cross-cultural differences across Indian, European and Australian contexts, this volume provides direct empirical comparisons between western and Indian situations. It then discusses innovative ways of hearing the views of students, pre-service teachers and teachers, featuring a range of qualitative and quantitative methodologies. The concluding commentaries from North American investigators provide a further international perspective from another region where much progress in researching these areas has been made. Together this ground-breaking collection comprises contributions from four continents on the prevalent issues of bullying, cyberbullying and student well-being.

Managing Media Businesses Mike Rosenberg,Philip H. Seager,2017-05-22 This book is a practical guide to every aspect of managing media businesses. Written by a team of experts and illustrated with interviews from leading industry players, it addresses the unprecedented change and uncertainty facing the industry. Do newspapers, magazines or books have a future? Will terrestrial television or cable services exist as meaningful players in five years' time? Is there a way to make multiple consumption platforms work together in a way that extracts the revenue needed to support the creation and development of quality content? While more and more content is being published, fewer and fewer businesses are finding a way to do so profitably and sustainably. Your answers to these questions that vex your media or entertainment business will depend on your frame – a frame based on experience gained in days that were less uncertain, less fluid and much, much simpler. Those frames need to be broken if you are to survive in times of such rapid change. This book is based on IESE's Advanced Management Program in Media & Entertainment, which IESE Business School has been running in New York and Los Angeles since 2011. It combines contributions from leading professors and practitioners, as well as real-life case studies, to establish a base upon which you can start to build the set of managerial tools that you will need to manage fast-changing media and entertainment businesses.

Privacy and Capitalism in the Age of Social Media Sebastian Sevignani,2015-08-27 This book explores commodification processes of personal data and provides a critical framing of the ongoing debate of privacy in the Internet age, using the example of social media and referring to interviews with users. It advocates and expands upon two main theses: First, people's privacy is structurally invaded in contemporary informational capitalism. Second, the best response to this problem is not accomplished by invoking the privacy framework as it stands, because it is itself part of the problematic nexus that it struggles against. Informational capitalism poses weighty problems for making the Internet a truly social medium, and aspiring to sustainable privacy simultaneously means to struggle against alienation and exploitation. In the last instance, this means opposing the capitalist form of association – online and offline.

   Regulating Artificial Intelligence Thomas Wischmeyer,Timo Rademacher,2019-11-29 This book assesses the normative and practical challenges for artificial intelligence (AI) regulation, offers comprehensive information on the laws that currently shape or restrict the design or use of AI, and develops policy recommendations for those areas in which regulation is most urgently needed. By gathering contributions from scholars who are experts in their respective fields of legal research, it demonstrates that AI regulation is not a specialized sub-discipline, but affects the entire legal system and thus concerns all lawyers. Machine learning-based technology, which lies at the heart of what is commonly referred to as AI, is increasingly being employed to make policy and business decisions with broad social impacts, and therefore runs the risk of causing wide-scale damage. At the same time, AI technology is becoming more and more complex and difficult to understand, making it harder to determine whether or not it is being used in accordance with the law. In light of this situation, even tech enthusiasts are calling for stricter regulation of AI. Legislators, too, are stepping in and have begun to pass AI laws, including the prohibition of automated decision-making systems in Article 22 of the General Data Protection Regulation, the New York City AI transparency bill, and the 2017 amendments to the German Cartel Act and German Administrative Procedure Act. While the belief that something needs to be done is widely shared, there is far less clarity about what exactly can or should be done, or what effective regulation might look like. The book is divided into two major parts, the first of which focuses on features common to most AI systems, and explores how they relate to the legal framework for data-driven technologies, which already exists in the form of (national and supra-national) constitutional law, EU data protection and competition law, and anti-discrimination law. In the second part, the book examines in detail a number of relevant sectors in which AI is increasingly shaping decision-making processes, ranging from the notorious social media and the legal, financial and healthcare industries, to fields like law enforcement and tax law, in which we can observe how regulation by AI is becoming a reality.

   Internet Jurisdiction Law and Practice Julia Hörnle,2021-01-07 From a technological standpoint, geography is largely irrelevant. Data flows through the internet without regard for political borders or territories. Services, communication, and interaction can occur online between persons who may be in different countries. Illegal activities, like hacking, cyberespionage, propagating terrorist propaganda, defamation, revenge porn, and illegal marketplaces may all be remotely targeted and accessed from various countries. As such, the internet has created an interesting and complex set of challenges for the concept of jurisdiction and conflicts of law. This title takes a comparative approach covering the EU, UK, US, Germany, and China. Broken into four parts, this book delves into the notion of

jurisdiction as it relates to the internet. Part I focuses on the different meanings of the concept of jurisdiction, from a legal and historical perspective, and distinguishing between the different branches of government. It will highlight the challenges created by the internet, including social media and cloud computing. Part II analyses criminal jurisdiction, in regards to both jurisdictions in cybercrime cases and jurisdictional issues relating to criminal investigations (access to the cloud) and enforcement. Part III examines jurisdiction and applicable law in civil and commercial matters, such as e-commerce B2B and B2C contracts, torts typically occurring online, and online defamation and privacy infringement. Finally, Part IV looks at regulatory jurisdiction, examining the power of the executive (whether an arm of government or independent regulator) to apply and enforce national law. It will look at aspects like the provision of online audio-visual media services and online gambling services, both of which are heavily regulated, but which can be easily provided remotely from different jurisdictions. The book concludes by analysing how the concept of jurisdiction should be adapted to ensure the rule of law by nation states and prevent international conflicts between states. This title gives a comprehensive look at the complicated subject of internet jurisdiction, essential for all dealing with jurisdictions in the modern age.

Online around the World Laura M. Steckman,Marilyn J. Andrews,2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Active and Programmable Networks David Hutchison,Spyros Denazis,Laurent Lefevre,Gary J. Minden,2009-04-07 This volume contains the proceedings of the 7th International Working Conference on Active and Programmable Networks (IWAN 2005) that was held during November 21–23, 2005, in Sophia Antipolis, Cote d' Azur, France, jointly organized by Hitachi Europe and INRIA. IWAN 2005 took place against a backdrop of questions about the viability and - cessity of a conference that deals with an area perceived by many as having

run its full course. The Organizing Committee, during the preparations of the conference, took these concerns seriously and reflected them in the theme of this year's event, entitled "Re-incarnating Active Networking Research," and expanding the scope of past calls for papers into topics that have emerged from active and programmable networks. The result was a success because we received 72 submissions, a number that - ceeded our expectations and in fact is one of the highest in the history of the conf- ence. The distinguished Technical Program Committee set high standards for the final program; each one of the submitted papers received three peer reviews with detailed comments and suggestions for the authors. In total, 13 papers were accepted for the main program sessions with 9 papers accepted unconditionally and the remaining 4 papers being conditionally accepted with shepherding by selected Program Committee members.
