Culture Media, Solutions, and Systems in Human ART Patrick Quinn, 2014-03-27 This volume describes culture media and solutions used in human ART; how they have been developed for in vitro human pre-implantation embryo development, the function and importance of the various components in media and solutions and how they interact, and how the systems in which these are used can influence outcomes. Chapters discuss inorganic solutes, energy substrates, amino acids, macromolecules, cytokines, growth factors, buffers, pH, osmolality, and the interaction of these parameters. The role of

incubators and other physical factors are reviewed, along with the relevance and prospects of emerging technologies: morphokinetic analysis using time-lapse imaging and dynamic fluid incubation systems. Results of prospective randomized trials are emphasized to ascertain the added value of these techniques for selecting viable embryos. This comprehensive guide will be invaluable for embryologists, physicians and all personnel involved in the fluid products used in human ART seeking to optimize their successful use of these components.

Fixing American Politics Roderick P. Hart, 2021-11-29 *Fixing American Politics: Solutions for the Media Age* brings together original chapters from 34 noted scholars from two disciplines – political science and communication – asked to identify the most pressing problems facing the American people and how they can be solved. Authors address the questions succinctly and directly, with their favored solutions featured in chapter titles that exhort and inspire. The book gives the reader much to think about and debate. Should news outlets be funded with public money rather than by private enterprise? Are the new social media a boon or a bane to political elections? Is the American past dead, or is it living once again? Do churchgoers and environmentalists have

anything to discuss? Is the FCC doing its job? Can political ads be made less toxic? Should Fox News be cancelled? Should cancel cultures be cancelled? Can we become more civil to one another and, if so, how? *Fixing American Politics* poses all the best questions ... and offers some concrete answers as well. This book is perfect for students, citizens, the media, and anyone concerned with contemporary challenges to civic life and discourse today.

Solutions Journalism Bill Dodd, 2021-02-15 As audiences avoid negative news and public risk perceptions fracture across polarized media ecologies, journalists are being called upon to tell engaging and optimistic stories about the future. Consequently, solutions journalism has moved from the margins to the global mainstream, resulting in a plurality of new solutions-focused practices. *Solutions Journalism: News at the Intersection of Hope, Leadership, and Expertise* explores the professional dynamics and tensions concerning solutions journalism, clarifies these related practices and, in so doing, provides scholars and journalists with a nuanced appreciation of the opportunities and liabilities of reporting solutions. Drawing upon a year-long study of journalism in Tasmania, Bill Dodd develops a tripartite theory of solutions journalism at the intersection of three core concepts: hope, leadership, and expertise. In Australia's lagging southernmost province, where development propositions have sparked global protest movements, 'New Tasmania' represented a newly optimistic spirit of bipartisanship. Yet, in this book, a close reading of solutions-focused discourse reveals deeper asymmetries regarding whose voices are routinely privileged in framing the future. On this basis, the book argues for a solutions

journalism founded on a nuanced understanding of hope and a plurality of community leaders and practical expertise.
