Japanese Media at the Beginning of the 21st Century Katsuyuki Hidaka, 2016-12-01 Hailed by Japanese critics as a milestone in the study of contemporary Japanese media, this book explores the contemporary 'boom' in Japanese media representations of the recent past. Recent years have seen the production of an unprecedented number of films, animation, manga, and television programmes representing a deeply nostalgic longing for the Japanese heyday of high economic growth in the 1960s and occasionally the 1970s known in Japan as the Shōwa '30s and '40s. Hidaka provides a comprehensive account of an under researched contemporary Japanese media phenomenon by exploring why this nostalgia has been sparked at this particular historical juncture and how that period is represented in the Japanese media today. The book accomplishes this through a detailed textual and narrative analysis of representative films and television programmes, in relation to their social and cultural context. While these nostalgic media renderings are seen by many critics as innocuous, this study demonstrates that they do not show a simple yearning for the period, but reflects a growing discontent with Japanese post-war society. In this regard, this book concludes that the current nostalgia wave is a critical reaction to the recent past as it seeks to revise historiography through a processes of introspection within popular conceptions of the meta narrative of 'nostalgia'. Winner of the Japan Communication Association 2015 Outstanding Book Award.

Media and Male Identity J. Macnamara, 2006-08-11 This book presents a landmark in-depth study of how mass media contributes to the making and remaking of male identity. It concludes that, unless addressed, the effects of negative discourse on the self-identity and self-esteem of men, are potentially devastating and that the longer-term and wider social implications will also be costly.

Say It Loud! Robin R. Means Coleman, 2013-08-21 In a collection of essays based on direct interview research, Say it Loud! amplifies the voice of ordinary African-Americans as they respond to media presentations of Black society. Each chapter investigates ways in which African-American identity is constructed, maintained, and represented in mass media and how these portrayals are interpreted within the African-American community. Together the essays cover a vast array of media messages in television, film, music, print and cyberspace. From the Boondocks comic strip, The Cosby Show, and The Color Purple to the music of rap artist DMX and original testimony from a Menace II Society copycat killer, the material included in this volume is examined as context for the African-American struggle to achieve definition, meaning, and power. Say it Loud! offers rare insight into how this struggle is both helped and hindered by the representation of race in our media culture.

The Oxford Handbook of Sport and Society Lawrence A. Wenner, 2022-09-27 Sport has come to have an increasingly large impact on daily life and commerce across the globe. From mega-events, such as the World Cup or Super Bowl, to the early socialization of children into sport, the study of sport and society has developed as a distinctly wide-ranging scholarly enterprise, centered in sociology, sport studies, and cultural, media, and gender studies. In The Oxford Handbook of Sport and Society, Lawrence Wenner brings together contributions from the world's leading scholars on sport and society to create the premier comprehensive and interdisciplinary reference for scholars and students looking to understand key areas of inquiry about the role and impacts of sport in contemporary culture. The Handbook offers penetrating analyses of the key ways that today's outsized sport is integrated into the lives of both athletes and fans and increasingly shapes the social fabric and cultural logics across the world. Featuring 85 leading international scholars, the volume is organized into six sections: society and values, enterprise and capital, participation and cultures, lifespan and careers, inclusion and exclusion, and spectator engagement and media. To aid comprehension and comparison, each chapter opens with a brief introduction to the area of research and features a common organizational scheme with three main sections of key issues, approaches, and debates to guide scholars and students to what is currently most important in the study of each area. Written at an accessible level and offering rich resources to further study each topic, this handbook is an essential resource for scholars and students as well as general readers who wish to understand the growing social, cultural, political, and economic influences of sport in society and our everyday lives.

Climate Change Denial and Public Relations Núria Almiron, Jordi Xifra, 2019-06-26 This is the first book on climate change denial and lobbying that combines the ideology of denial and the role of anthropocentrism in the study of interest groups and communication strategy. Climate Change Denial and Public Relations: Strategic Communication and Interest Groups in Climate Inaction is a critical approach to climate change denial from a strategic communication perspective. The book aims to provide an in-depth analysis of how strategic communication by interest groups is contributing to climate change inaction. It does this from a multidisciplinary perspective that expands the usual approach of climate change denialism and introduces a critical reflection on the roots of the problem, including the ethics of the denialist ideology and the rhetoric and role of climate change advocacy.

Topics addressed include the power of persuasive narratives and discourses constructed to support climate inaction by lobbies and think tanks, the dominant human supremacist view and the patriarchal roots of denialists and advocates of climate change alike, the knowledge coalitions of the climate think tank networks, the denial strategies related to climate change of the nuclear, oil, and agrifood lobbies, the role of public relations firms, the anthropocentric roots of public relations, taboo topics such as human overpopulation and meat-eating, and the technological myth. This unique volume is recommended reading for students and scholars of communication and public relations.

Journalism and PR John Lloyd,Laura Toogood,2014-11-18 Public relations and journalism have had a difficult relationship for over a century, characterised by mutual dependence and - often - mutual distrust. The two professions have vied with each other for primacy: journalists could open or close the gates, but PR had the stories, the contacts and often the budgets for extravagant campaigns. The arrival of the internet, and especially of social media, has changed much of that. These new technologies have turned the audience into players - who play an important part in making the reputation, and the brand, of everyone from heads of state to new car models vulnerable to viral tweets and social media attacks. Companies, parties and governments are seeking more protection - especially since individuals within these organisations can themselves damage, even destroy, their brand or reputation with an ill-chosen remark or an appearance of arrogance. The pressures, and the possibilities, of the digital age have given public figures and institutions both a necessity to protect themselves, and channels to promote themselves free of news media gatekeepers. Political and corporate communications professionals have become more essential, and more influential within the top echelons of business, politics and other institutions. Companies and governments can now - must now - become media themselves, putting out a message 24/7, establishing channels of their own, creating content to attract audiences and reaching out to their networks to involve them in their strategies Journalism is being brought into these new, more influential and fast growing communications strategies. And, as newspapers struggle to stay alive, journalists must adapt to a world where old barriers are being smashed and new relationships built - this time with public relations in the driving seat. The world being created is at once more protected and more transparent; the communicators are at once more influential and more fragile. This unique study illuminates a new media age.

Philosophy and Geography III Andrew Light,Jonathan M. Smith,1998 Places are today subject to contrary tendencies. They lose some functions, which may scale up to fewer more centralized places, or down to numerous more dispersed places, and they gain other functions, which are scaling up and down from other places. This prompts premature prophecies of the abolition of space and the obsolescence of place. At the same time, a growing literature testifies to the persistence of place as an incorrigible aspect of human experience, identity, and morality. Place is a common ground for thought and action, a community of experienced particulars that avoids solipsism and universalism. It draws us into the philosophy of the ordinary, into familiarity as a form of knowledge, into the wisdom of proximity. Each of these essays offers a philosophy of place, and reminds us that such philosophies ultimately decide how we make, use, and understand places, whether as accidents, instruments, or fields of care.

CURRICULUM REFORM IN PAKISTAN Amna Afreen,2022-02-25 I have written this book in an effort to explore how the history of Pakistan has resulted in the critical problems weighing down its education system. The book examines the questions: Why and how has a small elite class come to rule Pakistan? And how has their rule worsened the country's problems? The focus will be to critically examine the elements of the Pakistani national curriculum and madrasas and their effects on Pakistani society. The book represents the fusion of my experiences in Pakistan with extensive literature analysis, interviews, and textbook analysis. This research began when I came to the United States in January 2015 through the SAR program. I wanted to know the answers to profoundly unsettling questions. How can a society be so intolerant that a scholar educated solely in Pakistan is disregarded and assassinated while many Western-educated scholars with traditional insular thoughts are not only appreciated but flourishing? I wanted to know why Pakistani elites have so much power and freedom while lower classes are profoundly oppressed. Elites who barely pay taxes have been in power for generations while those that pay taxes suffer from sky-high inflation. The influential religious leaders mostly belong to the elite class while their followers are mostly lower class. Ruling families and social classes mostly control appointed positions. Do those in power not have a responsibility to speak on issues of social justice rather than limiting themselves in claiming that theirs is the only true form of Islam? Why don't they work to end the disparity of quality education between classes in Pakistan? Instead, many elites run their own lucrative elite Islamic schools. More importantly, why do the ulama (which literally means "those who possess knowledge [ilm], particularly of Islam") maintain a tight hierarchical system in the madrasa (Islamic seminary) community that rarely allows poor intelligent students to attain leadership positions? Why are the ulama silent in the face of ruthless murder of and discrimination against Pakistani minorities? Book Review: Pakistan Educational Reforms is a major study of education in Pakistan and its national and madrasa curriculum that fosters national and religious sectarian divisions, intolerance and conflicts. Dr. Amna Afreen documents the political, socio-economic and religious causes-limited government funding, widespread poverty and illiteracy and the poor training and performance of teachers- that have produced a failed educational system at urban and rural government and religious schools (madrasa) and offers a series of potential solutions and reforms. -- John L. Esposito, University Professor and Founding Director of The Alwaleed Center for Muslim-Christian Understanding, Georgetown University.

The Routledge Handbook of Environment and Communication Anders Hansen,Robert Cox,2022-12-26 This revised and fully updated second edition of the Routledge Handbook of Environment and Communication provides a state-of-the-art overview of environmental communication theory, practice and research. The momentous changes witnessed in the politics of the environment as well as in the nature of media and public communication in recent years have made the study and understanding of environmental communication ever more pertinent. This is reflected in this second edition, including a number of exciting new chapters concerned with: environmental communication in an age of misinformation and fake news; environmental communication, community and social transformation; environmental

justice; and advances in methods for the analysis of mediated environmental communication. Signalling the key dimensions of public mediated communication, the Handbook is organised around five thematic parts: the history and development of the field of environmental communication research, the sources, communicators and media professionals involved in producing environmental communication, research on news, entertainment media and wider cultural representations of the environment, the social and political implications of environmental communication, and the likely future trajectories for the field. Written by leading scholars in the field, this authoritative text is a must for scholars and students of environmental communication across multiple subject areas, including environmental studies, media and communication studies, cultural studies and related disciplines.

Open Science Julian Cribb, Tjempaka Sari, 2010-02-01 Open Science is about how we address the profound challenges which now confront humanity: climate, the food crisis, environmental degradation, resource scarcity and disease; through science communication. These call for the sharing of scientific knowledge among billions of humans, on a scale never before attempted. Open Science offers practical ways to communicate science in a highly networked world where billions of people still have little or no access to advanced knowledge or technologies. The authors describe low-cost, effective means to transfer knowledge to target audiences in industry, government, the community and to the public at large. The book features sections on good science writing, practical advice on how to develop communication and media strategies, ways to measure communication performance, how to handle institutional 'crises', how to deal with politicians and much more.

Intermedial Praxis and Practice as Research Joanne Scott, 2016-11-17 Nominated for the TaPRA Early Career Research Prize 2018 In this book, Jo Scott shares writing and documentation from her practice as research (PaR) project, which explored and analysed a mode of performance she developed, called live intermediality. The book offers a much-needed example of fully developed writing in relation to a practice as research (PaR) project. Weaving together theory, documentation and critical reflection, it offers fresh insights into both the process and presentation of PaR work, as well as theories around intermediality in performance, the role and actions of the live media performer and how live media events are created. It can be read alongside Robin Nelson's 2013 text, *Practice as Research in the Arts*, as it demonstrates how Nelson's model for PaR can be applied and developed. It also includes a set of online videos and commentaries, which complement and reflect on the writing in the core text.

The Routledge Companion to Environmental Planning Simin Davoudi, Richard Cowell, Iain White, Hilda Blanco, 2019-07-31 This Companion presents a distinctive approach to environmental planning by: situating the debate in its social, cultural, political and institutional context; being attentive to depth and breadth of discussions; providing up-to-date accounts of the contemporary practices in environmental planning and their changes over time; adopting multiple theoretical and analytical lenses and different disciplinary approaches; and drawing on knowledge and expertise of a wide range of leading international scholars from across the social science disciplines and beyond. It aims to provide critical reviews of the state-of-the-art theoretical and practical approaches as well as empirical knowledge and understandings of environmental planning; encourage dialogue across disciplines and national policy contexts about a wide range of environmental planning themes; and, engage with and reflect on politics, policies, practices and decision-making tools in environmental planning. The Companion provides a deeper understanding of the interdependencies between the themes in the four parts of the book (Understanding 'the environment', Environmental governance, Critical environmental pressures and responses, and Methods and approaches to environmental planning) and its 37 chapters. It presents critical perspectives on the role of meanings, values, governance, approaches and participations in environmental planning. Situating environmental planning debates in the wider ecological, political, ethical, institutional, social and cultural debates, it aims to shine light on some of the critical journeys that we have traversed and those that we are yet to navigate and their implications for environmental planning research and practice. The Companion provides a reference point mapping out the terrain of environmental planning in an international and multidisciplinary context. The depth and breadth of discussions by leading international scholars make it relevant to and useful for those who are curious about, wish to learn more, want to make sense of, and care for the environment within the field of environmental planning and beyond.

Global Advertising Practice in a Borderless World Robert Crawford, Linda Brennan, Lukas Parker, 2017-07-14 Cultural and regional differences in creating and managing advertising require unique responses to a dynamic, rapidly globalising business environment. To be global in advertising is no longer to be homogenised or standardised, it is to be at the leading edge of social and cultural trends that are changing the world as we know it. *Global Advertising Practice in a Borderless World* covers a wide range of adaptive advertising practices, from major and emerging markets, in mainstream and digital advertising. It focuses on understanding how the globalisation of advertising works in practice, explored in three sections: globalising advertising in a media and communications context; advertising in a global world; and global advertising in a digital world. Covering past, present and potential futures, through an impressive ensemble of global advertising practitioners and academics, the book combines academic rigour with practical insights to provide a comprehensive analysis of the changing dynamics between advertising and globalisation. It will be of great interest to researchers, educators and advanced students in advertising, global branding, international marketing, international business media, communication and cultural studies.
