Diversity in U.S. Mass Media Catherine A. Luther,Carolyn Ringer Lepre,Naeemah Clark,2017-09-12 An updated edition of the comprehensive resource that covers the various areas associated with representations of diversity within the mass media The second edition of Diversity in U.S. Mass Media presents a review of the evolution and the many issues surrounding portrayals of social groups in the mass media of the United States. Unfortunately, all too often mass media depictions play a crucial role in shaping our views about individuals and social groups. Filled with instructive insights into the ways social groups are represented through the mass media, Diversity in U.S. Mass Media offers a better understanding of groups and individuals different from ourselves. The revised second edition is filled with recent, illustrative examples from the media. Comprehensive in scope, the authors address a wide range of issues that include representations of race/ethnicity, gender, sexual orientation, disability, class, and religion in films, television, and the press. The authors encourage readers to question what is being presented and explore the extent to which they agree with the perspectives that are described. Diversity in U.S. Mass Media is an important resource that: Offers an understanding of how various social groups are being represented in the mass media Explores how diverse communities inform and intersect with one another Draws on updated studies on the topic and presents original research and observations Includes new chapters on media portrayals of mixed race relationships and multiracial/multiethnic people and representations of religion and faith Accompanied by a companion website for instructors including many useful pedagogical tools, such as a test bank, viewing list, exercises, and sample syllabi Revised and updated, the second edition of Diversity in U.S. Mass Media offers a broad perspective on the myriad issues that influence how the media portrays social groups. Throughout the text, the authors show consistencies as well as differences in media representations of minority groups in the United States.

Cultural Diversity and the U.S. Media Yahya R. Kamalipour,Theresa Carilli,1998-09-11 This book provides rich and detailed accounts of how the media filters racial/ethnic identity through economic or sensationalized perspectives in newspapers, films, television, and radio. By exploring media descriptions of various racial/ethnic groups, Cultural Diversity and the U.S. Media provides opportunities to discover, debate, and discuss issues surrounding race/ethnicity and the role of the media in American society.

How Television Shapes Our Worldview Deborah A. Macey,Kathleen M. Ryan,Noah J. Springer,2014-05-15 Despite the fractured media scape and ideological distortions, the voice from television offers important lessons and ways to understand who we are as humans and how we interact with others, both locally and globally. This book offers a global perspective on how television shapes our perception of the world.

The School Library Media Specialist as Manager Amy G. Job,MaryKay Schnare,1997 This collection of case studies emphasizes practical management techniques designed to be used by library media specialists in elementary, middle and high school settings.

Educating Media Literacy Allison T. Butler,2019-10-21 Educating Media Literacy argues that critical media literacy must be part of teacher education programs in order to strengthen students' and teachers' media literacy knowledge and to make public schools stronger in the face of neoliberalism.

Making Media Literacy in America Michael RobbGrieco,2018-09-15 This book provides a history of media literacy, presenting research that recovers how it has been conceived as reform, as understanding representation, and as pedagogy.

Administering the School Library Media Center Betty J. Morris,2010-08-16 This is the most comprehensive textbook on school library administration available, now updated to include the latest standards and address new technologies. This reference text provides a complete instructional overview of the workings of the library media center—from the basics of administration, budgeting, facilities management, organization, selection of materials, and staffing to explanations on how to promote information literacy and the value of digital tools like blogs, wikis, and podcasting. Since the publication of the fourth edition of Administering the School Library Media Center in 2004, many changes have altered the landscape of school library administration: the implementation of NCLB legislation and the revision of AASL standards, just to mention two. The book is divided into 14 chapters, each devoted to a major topic in school library media management. This latest edition gives media specialists a roadmap for designing a school library that is functional and intellectually stimulating, while leading sources provide guidance for further research.

Private Schools and Student Media Erica Salkin, 2019-11-15 Private Schools and Student Media: Support Mission, Students, and Community explores the activities of student media outlets, content creators and advisers in K–12 private schools in the United States. The unique nature of private schools, separate from government funding but not all government oversight, creates its own opportunities and challenges for students seeking their own outlets to pursue questions, answers and voice. Through surveys and content analysis of schools, student media advisers and student media work, Erica Salkin explores the reality of censorship in private schools—where the First Amendment does not play the same role as in public schools—and the perspectives of teachers who dedicate time, effort, and expertise to make the learning laboratory of the student newspaper or yearbook a reality. Ultimately, this book proposes that student media can be a significant asset to a private school’s mission, students, and school community: to prepare young people for lives of service and good citizenship. Scholars of communication, media studies, journalism, and education will find this book particularly useful.

Media Messages Linda Holtzman, Leon Sharpe, 2014-12-18 The new edition of this widely adopted book reveals how the popular media contribute to widespread myths and misunderstanding about cultural diversity. While focused on the impact of television, feature film, and popular music, the authors reach far beyond media to explore how our understanding, values, and beliefs about race, class, gender and sexual orientation are constructed. They analyze how personal histories, combined with the collective history of oppression and liberation, contribute to stereotypes and misinformation, as well as how personal engagement with media can impact prospects for individual and social freedom. Along with updated media examples, expanded theories and analysis, this edition explores even more deeply the coverage of race in two chapters, discusses more broadly how men and boys are depicted in the media and socialized, and how class issues have become even more visible since the Great Recession of the 21st century and the Occupy movements. Special activities and exercises are provided in the book and an online Instructor's Manual is available to adopters.

Media Literacy Education in Action Belinha S. De Abreu, Paul Mihailidis, 2013-12-17 Media Literacy Education in Action brings together the field’s leading scholars and advocates to present a snapshot of the theoretical and conceptual development of media literacy education—what has influenced it, current trends, and ideas about its future. Featuring a mix of perspectives, it explores the divergent ways in which media literacy is connected to educational communities and academic areas in both local and global contexts. The volume is structured around seven themes: • Media Literacy: Past and Present • Digital Media and Learning • Global Perspectives • Public Spaces • Civic Activism • Policy and Digital Citizenship • Future Connections Compelling, well-organized, and authoritative, this one-stop resource for understanding more about media literacy education across disciplines, cultures, and divides offers the fresh outlook that is needed at this point in time. Globally, as more and more states and countries call for media literacy education more explicitly in their curriculum guidelines, educators are being required to teach media literacy in both elementary and secondary education contexts.

Television and New Media Audiences Ellen Seiter, 1998-12-17 Why is talk about television forbidden at certain schools? Why does a mother feel guilty about watching Star Trek in front of her four-year-old child? Why would retired men turn to daytime soap operas for entertainment? Cliches about television mask the complexity of our relationship to media technologies. Through case studies, the author explains what audience research tells us about the uses of technologies in the domestic sphere and the classroom, the relationship between gender and genre, and the varied interpretation of media technologies and media forms. Television and New Media Audiences reviews the most important research on television audiences and recommends the use of ethnographic, longitudinal methods for the study of media consumption and computer use at home as well as in the workplace. The book discusses reactions of audiences to many internationally known television programmes including The Flintstones, The Jetsons, Street Fighter, Mighty Morphin Power Rangers, X-Men, Sesame Street, Dallas, Star Trek, The Cosby Show, Teenage Mutant Ninja Turtles, National Geographic, etc.

Media Knowledge James Schwoch, Mimi White, Miriam White, Susan Reilly, 1992-01-01 This book calls for a way of reading and responding to the media culture that is more than passive reception. It argues for the fostering of critical citizenship as the key to engaging, debating, and ultimately reconstructing the concepts and beliefs society brings to bear upon popular culture. The authors analyze contemporary media culture, including television news and dramatic programming, advertising, Hollywood film, and discuss the relationships between technology, culture, and society.

Critical Media Pedagogy Ernest Morrell, Rudy Duenas, Veronica Garcia, Jorge Lopez, 2015-04-25 This practical book examines how teaching media in high school English and social studies classrooms can address major challenges in our educational system. The authors argue that, in addition to providing underserved youth with access to 21st century learning technologies, critical media education will help improve academic literacy achievement in city schools. Critical Media Pedagogy presents first-hand accounts of teachers who are successfully incorporating critical media education into standards-based lessons and units. The book begins with an analysis of how media have been conceptualized and studied; it identifies the various ways that youth are practicing media, as well as how these practices are constantly increasing in sophistication. Finally, it offers concrete

examples of how to develop a rigorous, standards-based content area curriculum that embraces new media practices and features media production.

Media Diversity Mara Einstein, 2003-09-12 *Media Diversity: Economics, Ownership, and the FCC* provides a detailed analysis of the regulation of diversity and its impact on the structure and practices within the broadcast television industry. As deregulation is quickly changing the media landscape, this volume puts the changing structure of the industry into perspective through the use of an insider's point of view to examine how policy and programming get made. Author Mara Einstein blends her industry experience and academic expertise to examine diversity as a media policy, suggesting that it has been ineffective and is potentially outdated, as study after study has found diversity regulations to be wanting. In addition to reviewing diversity research on the impact of minority ownership, regulation of cable and DBS, duopolies, ownership of multiple networks and cross ownership of media on program content, Einstein considers the financial interest and syndication rules as a case study, due to their profound effects on the structure of the television industry. She also poses questions from an economic perspective on why the FCC regulates structure rather than content. Through the presentation of her research results, she argues persuasively that the consolidation of the media industry does not affect the diversity of entertainment programming, a conclusion with broad ramifications for all media and for future research about media monopolies. This volume serves as a defining work in its examination of the intersection of regulation and economics with media content. It is appropriate as a supplemental text in courses on communication policy, broadcast economic and media management, broadcast programming, political economy of the mass media, and media criticism at the advanced and graduate level. It is also likely to interest broadcast professionals, media policymakers, communication lawyers, and academics. It is a must-read for all who are interested in the media monopoly debate.

Racism, Sexism, and the Media Clint C Wilson II, Felix Gutierrez, Lena Chao, 2012-10-03 The Fourth Edition of *Racism, Sexism, and the Media* examines how different race, ethnic, and gender groups fit into the fabric of America; how the media influence and shape everyone's perception of how they fit; and how the media and advertisers are continuously adapting their communications to effectively reach these groups. The authors explore how the rise of class/group-focused communication, resulting from the convergence of new media technologies and continued demographic segmentation of audiences, has led media outlets and advertisers to see women and people of color as influential key audiences and target markets, as well as a source of stereotypes, which may lead to media insensitivity and may help perpetuate social inequity. The Fourth Edition includes updated content on topics covered in the previous editions, and new material on: women of color, including an integrated assessment of their media experiences; new material on Muslim, Arab, and Asian groups; new technologies; and social media use and their impact

Imaging Education Hechinger Institute on Education and the Media, 1998 This collection of essays by outstanding educators and policy makers looks closely at the influence of each facet of the media--from reporting in newspapers to findings in public opinion polls, to television sit-coms and documentaries, to feature films, to college rankings in popular magazines.
