Software as Hermeneutics Luca M. Possati, 2022-06-24 This book claims that continental philosophy gives us a new understanding of digital technology, and software in particular; its main thesis being that software is like a text, so it involves a hermeneutic process. A hermeneutic understanding of software allows us to explain those aspects of software that escape a strictly technical definition, such as the relationship with the user, the human being, and the social and cultural transformations that software produces. The starting point of the book is the fracture between living experience and the code. In the first chapter, the author argues that the code is the origin of the digital experience, while remaining hidden, invisible. The second chapter explores how the software can be seen as a text in Ricoeur's sense. Before being an algorithm, code or problem solving, software is an act of interpretation. The third chapter connects software to the history of writing, following Kittler's suggestions. The fourth chapter unifies the two parts of the book, the historical and the theoretical, from a Kantian perspective. The central thesis is that software is a form of reflective judgment, namely, digital reflective judgment.

Software Takes Command Lev Manovich, 2013-07-04 Offers the first look at the aesthetics of contemporary design from the theoretical perspectives of media theory and 'software studies'.

Social Media Tools and Platforms in Learning Environments Bebo White, Irwin King, Philip Tsang, 2011-09-20 Online social media have transformed the face of human interaction in the 21st century. Wikis, blogs, online groups and forums, podcasts, virtual worlds, and social tagging are but a few of the applications enabling innovative behaviors that support acquisition, access, manipulation, retrieval, and visualization of information. It is, therefore, no surprise that educational practitioners and theorists have begun to explore how social media can be harnessed to describe and implement new paradigms for communication, learning, and education. The editors' goal in publishing this book was to identify original research on the application of online social media and related technologies in education as well as emerging applications in Web technologies that could provide and shape future educational platforms. The selected contributions deal with questions such as how social media can truly enrich and enhance learning and teaching experiences in ways not otherwise possible; how learning can be integrated in a distributed and ubiquitous social computing environment; or what theories, paradigms, and models are applicable for the support of social

computing in education. Researchers in education or educational software will find interesting and sometimes provocative chapters on paradigms and methodologies, virtual and mobile learning spaces, and assessment and social factors. Practitioners in these fields will benefit from an additional section devoted to case studies and first experience reports.

Disability and Social Media Katie Ellis, Mike Kent, 2016-11-10 Social media is popularly seen as

an important media for people with disability in terms of communication, exchange and activism. These sites potentially increase both employment and leisure opportunities for one of the most traditionally isolated groups in society. However, the offline inaccessible environment has, to a certain degree, been replicated online and particularly in social networking sites. Social media is becoming an increasingly important part of our lives yet the impact on people with disabilities has gone largely unscrutinised. Similarly, while social media and disability are often both observed through a focus on the Western, developed and English-speaking world, different global perspectives are often overlooked. This collection explores the opportunities and challenges social media represents for the social inclusion of people with disabilities from a variety of different global perspectives that include Africa, Arabia and Asia along with European, American and Australasian perspectives and experiences.
