**Indian Business Case Studies Volume V** Roopa Praveen,2022-09-15 It has been decades since many business schools outside India adopted the case study methodology for teaching almost all branches of management studies. This trend has been seen in India, too, where top management institutes have implemented the case study-based methodology as an importantpedagogical tool in business education. The major issue in India, however, is a severe shortage of Indian case studies through which business schools can provide industry insights to students. This volume fills that gap. It has twenty Indian cases related to different aspects of business management.The cases cover some of the prominent disciplines of management like marketing, finance, human resource management, strategy management, operations management, accounting, and mergers and acquisitions. These cases best serve the purpose of adoption of 'case methodology' in classroom teaching oronline lecture sessions for the faculty and students of business management.
