The Catholic Tradition Thomas Langan,1998 Langan (philosophy, U. of Toronto) examines the history of the Catholic Church and the origins of its teachings since the Church's conception. Although committed to the Catholic religion, he does not obscure the Church's failings as he lays out the fundamentals of the faith. He provides insights into the great Christological councils, discusses the differences in the spiritualities of East and West, and portrays the crucial roles that the pope and bishops played during the Middle Ages. Incorporating the thought of Augustine, Aquinas, and medieval Catholicism, he traces the rise and decline of Christian Europe and the issues raised by reform. *Arthur Schnitzler und der Film* Claudia Wolf,2006  
Not yet available Die vorliegende Untersuchung liefert einen Gesamtüberblick über Arthur Schnitzlers Zusammenarbeit mit der Filmindustrie. Dabei wird seine Haltung zum Kino ebenso berücksichtigt, wie seine Wahrnehmung und seine theoretische Reflexion des neuen Mediums. Neben der Entstehungsgeschichte der Verfilmungen, die zu Schnitzlers Lebzeiten auf der Grundlage seiner literarischen Texte entstanden sind, gilt es, Schnitzlers eigene Filmentwürfe nach seinen Werken und schließlich seine Drehbücher und Filmskizzen anzuführen. Anhand Schnitzlers eigenen Filmentwürfen und seinen Äußerungen zu den

Verfilmungen wird der filmhistorische Kontext Schnitzlers, seine ästhetischen Forderungen an den Film, seine Filmtechnik und seine filmischen Erzählstrategien rekonstruiert.

Language, Culture, Computation: Computing - Theory and Technology Nachum Dershowitz,Ephraim Nissan,2014-12-03 This Festschrift volume is published in Honor of Yaacov Choueka on the occasion of this 75th birthday. The present three-volumes liber amicorum, several years in gestation, honours this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours. Yaacov's research has had a major impact not only within the walls of academia, but also in the daily life of lay users

of such technology that originated from his research. An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s, a project in which he is currently involved is proving to be a sensation, as will become apparent from what follows. Yaacov Choueka began his research career in the theory of computer science, dealing with basic questions regarding the relation between mathematical logic and automata theory. From formal languages, Yaacov moved to natural languages. He was a founder of natural-language processing in Israel, developing numerous tools for Hebrew. He is best known for his primary role, together with Aviezri Fraenkel, in the development of the Responsa Project, one of the earliest fulltext retrieval systems in the world. More recently, he has headed the Friedberg Genizah Project, which is bringing the treasures of the Cairo Genizah into the Digital Age. This first part of the three-volume set covers a range of topics in computer science. The papers are grouped in topical sections on: the jubilaris: Yaacov and his oeuvre; theory of computation; science computing and tools for engineering; information retrieval.

### **Twelve Minutes of Love** Kapka

Kassabova, 2011-11-03 Kapka Kassabova first set foot in a tango studio ten years ago and, from that moment, she was hooked. With the beat of tango driving her on and the music filling her head, she's danced across the world, from Auckland to Edinburgh, from Berlin to Buenos Aires, putting in hours of practice for fleeting moments of

dance-floor ecstasy, suffering blisters and heart-break along the way. Here, in sparkling, spring-heeled prose, Kapka takes us inside the esoteric world of tango to tell the story of the dance, from its Afro roots to its sequined stars and back. *Twelve Minutes of Love* is a timeless tale of exile and longing, death and desire, love and belonging.
