**Growing up in Mussolini's Fascist Italy** Christine Foster Meloni, 2020-07-16 Andrea Meloni was born in Year VI (1928) of the Fascist Era in Italy. In his memoir he tells stories about growing up in Mussolini's Italy. In elementary school he delighted in being a little fascist, participating in military drills in his schoolyard and the streets of Rome. As a teenager he gradually became disillusioned with fascism as Mussolini led Italy into World War II on the side of Germany and eventually fell from power when the Allies began their invasion of Italy. He describes the first years of his life living in extreme poverty in the village of Acuto (Frosinone), his move to Rome at age five, the years under Mussolini followed by the terrors of the German occupation of Rome and the dangerous civil war between fascists and partisans, and finally the overwhelming post-war devastation.

*Political Biology* M. Meloni, 2016-05-25 This book explores the socio-political implications of human heredity from the second half of the nineteenth century to the present postgenomic moment. It addresses three main phases in the politicization of heredity: the peak of radical eugenics (1900-1945), characterized by an aggressive ethos of supporting the transformation of human society via biological knowledge; the repositioning, after 1945, of biological thinking into a liberal-democratic, human rights framework; and the present postgenomic crisis in which the genome can no longer be understood as insulated from environmental signals. In *Political Biology*, Maurizio Meloni argues that thanks to the ascendancy of epigenetics we may be witnessing a return to soft heredity - the idea that these signals can cause changes in biology that are themselves transferable to succeeding generations. This book will be of great interest to scholars across science and technology studies, the philosophy and history of science, and political and social theory.

**Powdered Peas and Other Blessings** Christine Foster Meloni, 2003-03-21 Casa Materna was founded in Naples, Italy, in 1905 by Pastor Riccardo Santi. Since then thousands of children from Naples and other economically-depressed towns and villages of southern Italy have lived and been educated there. They have been given the opportunity to leave behind lives of poverty and to lead happier, more fulfilling lives. This book is a collection of the personal stories of 21 former residents who describe what it was like growing up in this home and the impact it has had on their lives. All speak of Casa Materna and the Santi family with gratitude and affection.

**Ways of Belonging** Francesca Meloni, 2023-10-13 Ways of Belonging examines the experiences of undocumented young people who are excluded from K-12 schools in Canada and are rendered invisible to the education system. Canadian law doesn't mention the existence of undocumented children, and thus their access to education rests on discretionary practices and is often denied altogether. This book brings the stories of undocumented young people

vividly alive, putting them into conversation with the perspectives of the different actors in schools and courts who fail to include these young people. Drawing on long-term ethnographic fieldwork, Francesca Meloni shows how ambivalence shapes the lives of young people who are caught between the desire to belong and the impossibility of fully belonging. Meloni pays close attention to these young people's struggles and hopes, showing us what it means to belong and to endure in contexts of social exclusion. *Ways of Belonging* reveals the opacities and failures of a system that excludes children from education and puts their lives in invisibility mode. **The St. Gallen Mafia: Exposing the Secret Reformist Group Within the Church** Julia Meloni, 2021-10-26 In the mid-1990s, a clandestine group of high-ranking churchmen began gathering in St. Gallen, Switzerland. Opposed to Cardinal Joseph Ratzinger, the circle plotted a revolution in stealth. By 2015, their secret ached to be told. Before an audience, Cardinal Godfried Danneels joked of being a part of a mafia. But as explosive as Danneels's confession was, a thick cloud of mystery still enshrouds the St. Gallen mafia. In this compelling book, Julia Meloni pieces together the eerie trail of confessional evidence about the St. Gallen group. Copiously researched and grippingly narrated, *The St. Gallen Mafia* sheds light on the following: The mysteries of the 2005 conclave, where mafia members grew divided over a plan to back Cardinal Jorge Mario Bergoglio as pope. The war against Benedict XVI by the mafia's Cardinal Achille Silvestrini - and the mysterious confessions believed to be linked to him. The enigmatic, complicated relationship between the mafia's Cardinal Carlo Maria Martini and Benedict XVI. The mafia writings that presaged a new Francis - and the 2013 conclave that elected him. Martini's enduring role as an ante-pope - a precursor for Pope Francis.

**A cat named israel** Tatiana Sabina Meloni, 2024-02-22 *Israel* is an orphaned kitten adopted by a girl named

Filastin, who provides him with shelter, food, and lots of love. However, month after month, Israel takes over every inch of the house, relegating Filastin to a few uncomfortable corners. One day, the girl decides to rebel and engages in a battle with the feline, only to be defeated. It will only be thanks to the intervention of three women "experts in complicated solutions" (Africa, Europe, and America) that Filastin and Israel manage to reach an agreement for peaceful coexistence. A fairy tale to never stop believing in peace, Israel is a kitten who, shortly after birth, loses his mother to a wicked man with the intention of exterminating all the cats in the world. It's Filastin, a splendid girl, who finds him hungry and frightened under a sage bush. She has no doubts about what to do: feed him, take care of him, and give him a safe place to live peacefully. Thanks to the love of the young girl, Israel grows strong and beautiful. Day after day, he captures Filastin's heart, and month after month, he also conquers her home. When she realizes it, it's already too late... Translator: Simona Casaccia PUBLISHER: TEKTIME

**Meloni's Prayer** Mark Stephan, 2023-09 Meloni's Prayer is about two well-intentioned people that get detoured as they try to navigate their way through life. It is a roller coaster ride that is comical for the most part, until it isn't. Love and crime have a lot of similarities; someone is always going to get hurt. It is one of life's unwritten rules. My mother once told me where you live is a reflection of who you are. Meloni and Leslie Sloan chose to live in Las Vegas, Nevada, where the streets are paved with gold for a few. There are lots of legal ways to make money in Las Vegas. There are also a lot of ways to make money illegally. I hope you do not engage in the latter like Leslie Dale Sloan. Meloni's name is pronounced Melanie. The spelling of Meloni's name is unique, and so is the story. Leslie goes by his middle name Dale for the most part. My story starts in Kansas which is a part of the fiction. With a bit of due diligence, it is quite easy to find the truth in this story. All fiction has some truth to it. The Catholic Church also has a major role in this story, and my life. Please have no misgivings. The Catholic Church is like Noah's Ark, it is a well-built ship that will get you to your destination, but it may get kind of stinky along the way. With all of the above in mind, I hope you enjoy Meloni's Prayer.

Impressionable Biologies Maurizio Meloni, 2019-01-16 During the twentieth century, genes were considered the controlling force of life processes, and the transfer of DNA the definitive explanation for biological heredity. Such views shaped the politics of human heredity: in the eugenic era, controlling heredity meant intervening in the distribution of good and bad genes. However, since the turn of the twenty-first century, this centrality of genes has been challenged by a number of postgenomic disciplines. The rise of epigenetics in particular signals a

shift from notions of biological fixedness to ideas of plasticity and impressionability of biological material. This book investigates a long history of the beliefs about the plasticity of human biology, starting with ancient medicine, and analyses the biopolitical techniques required to govern such permeability. It looks at the emergence of the modern body of biomedicine as a necessary displacement or possibly reconfiguration of earlier plastic views. Finally, it analyses the returning of plasticity to contemporary postgenomic views and argues that postgenomic plasticity is neither a modernistic plasticity of instrumental management of the body nor a postmodernist celebration of potentialities. It is instead a plasticity that disrupts clear boundaries between openness and determination, individual and community, with important implications for notions of risk, responsibility and intervention.
