Liem Sioe Liong's Salim Group Richard Borsuk, 2014-11-07 After Suharto gained power in Indonesia in the mid-1960s, he stayed as the country's president for more than three decades, helped by the powerful military, hefty foreign aid and support from a coterie of cronies. A pivotal business backer for his New Order government was Liem Sioe Liong, a migrant from China, who arrived in Java in 1938. A combination of the Suharto connection, serendipity and personal charm propelled him to become the wealthiest tycoon in Southeast Asia. This is the story of how Liem built the Salim Group, a conglomerate that in its heyday controlled Indonesia's largest non-state bank, the country's dominant cement producer and flour mill, as well as the world's biggest maker of instant noodles. The book features exclusive input from Liem, who died in 2012, and his youngest son, Anthony Salim. It traces the founder's life and the group's symbiosis with Suharto, his generals and family. After the tumultuous 1997-98 Asian financial crisis sparked Suharto's fall and a backlash against the strongman's cronies, Anthony staved off the crushing of the debt-laden group. Told in a journalistic style, the story of the Salim Group provides insights into Suharto's New Order. For business executives, students and anyone with an interest in Southeast Asia's largest economy, the volume makes a valuable contribution towards understanding the country's modern history.

Supplemental Nutrition Assistance Program National Research Council, Institute of Medicine, Committee on National Statistics, Food and Nutrition Board, Committee on Examination of the Adequacy of Food Resources and SNAP Allotments, 2013-05-23 For many Americans who live at or below the poverty threshold, access to healthy foods at a reasonable price is a challenge that often places a strain on already limited resources and may compel them to make food choices that are contrary to current nutritional guidance. To help alleviate this problem, the U.S. Department of Agriculture (USDA) administers a number of nutrition assistance programs designed to improve access to healthy foods for low-income individuals and households. The largest of these programs is the Supplemental Nutrition Assistance Program (SNAP), formerly called the Food Stamp Program, which today serves more than 46 million Americans with a program cost in excess of \$75 billion annually. The goals of SNAP include raising the level of nutrition among low-income households and maintaining adequate levels of nutrition by increasing the food purchasing power of low-income families. In response to questions about whether there are different ways to define the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet, USDA's Food and Nutrition Service (FNS) asked the Institute of Medicine (IOM) to conduct a study to examine the feasibility of defining the adequacy of SNAP allotments, specifically: the feasibility of establishing an objective, evidence-based, science-driven definition of the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet, as well as other relevant dimensions of adequacy; and data and analyses needed to support an evidence-based assessment of the adequacy of SNAP allotments. Supplemental Nutrition Assistance Program: Examining the Evidence to Define Benefit Adequacy reviews the current evidence, including the peer-reviewed published literature and peer-reviewed government reports. Although not

given equal weight with peer-reviewed publications, some non-peer-reviewed publications from nongovernmental organizations and stakeholder groups also were considered because they provided additional insight into the behavioral aspects of participation in nutrition assistance programs. In addition to its evidence review, the committee held a data gathering workshop that tapped a range of expertise relevant to its task.

*Valuation and Future Value of the 30 Stocks PSEI Index based on Financial Report Q II, 2015* Buddy Setianto,2015-09-14 This book covers the prospects of fair value of the stock in the PSEi, is a stock market index of the Philippine Stock Exchange consisting of 30 companies. The calculation of the fair value of the stock using Fundamental Analysis Warren Buffet and Benjamin Graham. Prospects of 30 companies for next 3-6 months (July-November 2015) by reference first quarter financial report (June 30, 2015) plus the fair value of the historical data from 2011 to 2015 will establish a trend fair value compared to the market price closure. The main parameters of the financial data used in the calculation of stock valuation is historically served since 2011-2015 (the main financial data has been annualized for the quarter 1, 2 and 3). Analysis for example such as: • Trend productivity shows slight downtrend since 2012. Revenue, profit and cash flow grew negative since 2013. Productivity on capital investment for business expansion improved from 13% to 44% though it is low productivity. Net margin is declining overtime and grows weaker. Cost of goods sold too high even though overhead cost kept low, but it is hurt productivity. Dividend pay-out ratio too high given the fact low productivity. • Trend liquidity shows slight downtrend since 2012. Surplus on working capital and ability to cover short term debt remains strong every year. • Long term liquidity surplus/deficit per share on balance sheet shows negative every year meaning long term debt is above working capital. This indicate liquidity risk in the long term. RECOMMENDATION • Fundamental company is not quite good and is expected remained the same in the future. Fair value based on stock valuation shows no potential upside, but potential downside at short term is 26%, but in the long term can be drop to the lowest price. • Avoid. The book comes in 2015 macro-economic analysis, analysis of industry sectors and qualitative analysis per quarter from 2011 to 2015, key financials history and charts the fair value compared to the market price and charts combined net income, free cash flow and working capital. Business description of each company also provided

*La No Car* M Huk,2019-06-04 Can you visit and enjoy Los Angeles without a car? YES! At one time in the early 20th Century, Los Angeles had the largest urban train transit system in the world. Then Los Angeles became the city of freeways, cars, suburbs, and smog. At the end of the 20th Century, Los Angeles citizens decided they had enough of the pollution and over-crowded roads and voted to build a mass train transit system. Today Los Angeles Metro is the third largest system in miles in the US, the eighth largest in ridership in the US, and the largest light rail

system in the US. What this means for visitors and residents is that a lot -- a whole lot of L.A. -- is accessible by public mass transit, including the fabulously revitalized Downtown L.A., Hollywood, and nearby cities such as Pasadena, Long Beach, and Santa Monica. And so very much in between. From the heights of the Hollywood Hills to the Pacific Ocean and the neighborhoods of Los Angeles, readers of LA NO CAR will find out that there is so much to do, see, eat, and enjoy that not even a few weeks is enough. For International visitors, using the L.A. Metro will be a familiar and less challenging way of getting around because not everyone is ready for L.A. traffic. Yes, many of the world's city traffic and driving is challenging, but not over such a wide expanse as L.A., where it is not so much the speed as it is the slow crawl that seems to happen day and night. LA NO CAR not only makes sense of visiting L.A. with the Metro system, it also saves money. L.A. Metro fares are more than reasonable, and with their TAP card system, riders have access to every other mass transit system in Los Angeles County, as well as their own expanding system of short term bicycle rentals. LA NO CAR is laid-out starting in Downtown and travels to Hollywood, North Hollywood, Highland Park, Pasadena, Long Beach and Santa Monica, all by using Metro subway, light rail, BRT, and DASH buses. Each Metro Station that is highlighted has places to visit, see, enjoy and, of course, eat and drink. (LA NO CAR confirms that L.A. is a foodie town.) Throughout LA NO CAR are QR Codes that help navigate the way from the stations and stops to featured locations, and almost all are under one mile/1.6 KM from the nearest Metro Station. Most are under a half a mile/.80 KM walk, and many are adjacent to the Metro Station. All of this proximity makes it possible to easily travel from Metro Station to Metro Station and at each stop find more than enough to enjoy. This is especially true in Downtown Los Angeles where Chinatown, Olvera Street, and Little Tokyo blend in with the Arts and Fashion Districts, as well as the cultural attractions of Bunker Hill to make a visit to Downtown a multi-day destination. All along the way is history, unexpected places, and the full flavor of one of the world's great cities. And of course, there is Hollywood where the subway has multiple stops, and most of the world famous attractions are just steps from the subway. That one of the major theme park attractions, Universal Studios Hollywood, has a subway stop steps from its free trolleys makes it easy to understand how LA NO CAR isn't some Hollywood fantasy. It is completely for real.

The Rise of International Capital Faris Al-Fadhat, 2019-01-09 This book analyzes the social forces and political coalitions driving regional integration projects in Asia with a focus on ASEAN and Indonesian conglomerates. It asks which social forces, within the domestic political economy of Asian states, are driving governments to seek regional arrangements for economic governance. In particular the book asks how the emergence, reorganization, and expansion of capitalist class have conditioned political support for regional economic integration. By addressing these issues, the book emphasizes that the wellspring of regional economic institution projects stem from the process of capitalist development and the social forces it has unleashed. The book's aims place the social and class relations that underpin regional projects -- rather than the institutions which result from them -- at the centre of the analysis of regional integration. The research for this account draws primarily on primary documents from archival and field research conducted by the author -- including company documents and in-depth interviews,

government reports and policies, and trade publications and data sources, which is supplemented with secondary sources where relevant.

*A Better Metro Manila?* Teresa S. Encarnacion Tadem, Maria Ela L. Atienza, 2023-02-28 This book contributes to efforts in furthering the democratization and development processes in the Philippines by examining the decentralization efforts in Metro Manila. It explores existing as well as proposed development models for governance with focus on the effective and efficient delivery of social services, bringing forth growth with equity through development efforts, and addressing national-local concerns to promote political and socio-economic stability in the country. In doing so, the book examines the strong and weak governance points in the National Capital Region of the Philippines, and identifies areas for reform.

**Directors of Urban Change in Asia** Peter J.M. Nas, 2005-03-10 Bringing together a group of international scholars, Directors of Urban Change in Asia examines who the 'directors' for urban change are in an eclectic mix of Asian

cities. The books discusses how, in the majority of cases, urban change has come about primarily as the result of visionary leaders, on national, regional and local levels. It also makes clear that the less successful cities have tended to lack such leaders.

**The Report: Philippines 2016** Oxford Business Group,2016-04-08 The Philippines emergence as a growth leader has been building gradually since the 1990s, following a long period of low growth and political upheaval. As of the 2010s improved governance under the administration of President Benigno Aquino III has helped to accelerate foreign direct investment (FDI) in business process outsourcing while reviving FDI into the manufacturing sector. This, and a demographic bulge in the young adult bracket, helped bring the average pace of growth in the first half of the 2010s to 6.3%, beating all the country's main South-east Asian peers.

**The Steel Ceiling** Peter Wilkinson,2022-09-21 What needs to change for your business to grow sustainably?
