C-Projective Geometry David M Calderbank, Michael G. Eastwood, Vladimir S. Matveev, Katharina Neusser, 2021-02-10 The authors develop in detail the theory of (almost) c-projective geometry, a natural analogue of projective differential geometry adapted to (almost) complex manifolds. The authors realise it as a type of parabolic geometry and describe the associated Cartan or tractor connection. A Kähler manifold gives rise to a c-projective structure and this is one of the primary motivations for its study. The existence of two or more Kähler metrics underlying a given c-projective structure has many ramifications, which the authors explore in depth. As a consequence of this analysis, they prove the Yano–Obata Conjecture for complete Kähler manifolds: if such a manifold admits a one parameter group of c-projective transformations that are not affine, then it is complex projective space, equipped with a multiple of the Fubini-Study metric.

Peter the Great Paul Bushkovitch, 2003 In Peter the Great, Yale historian and Russian scholar Paul Bushkovitch offers a brilliant, but concise, biography of this enigmatic leader.

Safe Robot Navigation Among Moving and Steady Obstacles Andrey V. Savkin, Alexey S. Matveev, Michael Hoy, Chao Wang, 2015-09-25 Safe Robot Navigation Among Moving and Steady Obstacles is the first book to focus on reactive navigation algorithms in unknown dynamic environments with moving and steady obstacles. The first three chapters provide introduction and background on sliding mode control theory, sensor models, and vehicle kinematics. Chapter 4 deals with the problem of optimal navigation in the presence of obstacles. Chapter 5 discusses the problem of reactively navigating. In Chapter 6, border patrolling algorithms are applied to a more general problem of reactively navigating. A method for guidance of a Dubins-like mobile robot is presented in Chapter 7. Chapter 8 introduces and studies a simple biologically-inspired strategy for navigation a Dubins-car. Chapter 9 deals with a hard scenario where the environment of operation is cluttered with obstacles that may undergo arbitrary motions, including rotations and deformations. Chapter 10 presents a novel reactive algorithm for collision free navigation of a nonholonomic robot in unknown complex dynamic environments with moving obstacles. Chapter 11 introduces and examines a novel purely reactive algorithm to navigate a planar mobile robot in densely cluttered environments with unpredictably moving and deforming obstacles. Chapter 12 considers a multiple robot scenario. For the Control and Automation Engineer, this book offers accessible and precise development of important mathematical models and results. All the presented results have mathematically rigorous proofs. On the other hand, the Engineer in Industry can benefit by the experiments with real robots such as Pioneer robots, autonomous wheelchairs and autonomous mobile hospital. First book on collision free reactive robot navigation in unknown dynamic environments

Bridges the gap between mathematical model and practical algorithms Presents implementable and computationally efficient algorithms of robot navigation Includes mathematically rigorous proofs of their convergence A detailed review of existing reactive navigation algorithm for obstacle avoidance Describes fundamentals of sliding mode control

Erich Maria Remarque aus heutiger Sicht Alice Cadeddu,Renata Dampc-Jarosz,Claudia Junk,Paweł Meus,Thomas F. Schneider,2021-12-06 50 Jahre nach Erich Maria Remarques Tod werden von der aktuellen Remarque-Forschung auch bislang wenig beachtete Aspekte vermehrt in den Blick genommen. Die Beiträge dieses Bandes, die auf eine Tagung zum 50. Todestag an der schlesischen Universität Katowice/Sosnowiec zurückgehen, betrachten daher neben den klassischen Romanen so unterschiedliche Werke wie die frühen Romane oder die Erzählungen zum Ersten Weltkrieg. Zum Teil erstmals werden die Interviews Remarques, seine aktuelle Rezeption in unterschiedlichen Kultur- und Sprachräumen, die Adaption der Werke in Medien wie Graphic Novels und ihre internationale Verwendung im universitären und schulischen Unterricht untersucht und dargestellt. 50 years after the death of Erich Maria Remarque the research on Remarque intensifies its focus on hitherto almost unnoticed aspects. The contributions of this volume, which were created on a conference to mark the 50th anniversary of his death at the Silesian University Katowice/Sosnowiec, therefore not only focus on his popular novels but also on various works like his early novels or narratives on World War I. In parts for the first time, Remarque's interviews, his recent reception in various cultural and linguistic regions, the adaptation of his works in media e.g. graphic novels and its international application in both universities and schools are being highlighted.

Collected Shorter Fiction of Leo Tolstoy, Volume I Leo Tolstoy,2001-08-07 Written over a period of more than half a century, Leo Tolstoy's stories reflect every aspect of his art and personality. They cover his experiences

as a soldier in the Caucasus, his married life, his passionate interest in the peasantry, his cult of truth and simplicity, and his growing preoccupation with religion. The stories in Volume 1 of the Collected Shorter Fiction date from the period in which the young Tolstoy wrote Anna Karenina and War and Peace. Ranging from brief, masterfully sketches of military life such as “The Wood-Felling” to novellas like Family Happiness, an uneasy imagining of the idyllic possibilities of marriage by the not-yet-married writer, all feature Tolstoy’s characteristically lavish deployment of detail, shrewd observation, and imaginative power.
