Videogames in the Indian Subcontinent Souvik Mukherjee,2022-11-25 Videogames in the Indian Subcontinent: Development, Culture(s) and Representations explores the gaming culture of one of the most culturally diverse and populous regions of the world-the Indian subcontinent. Building on the author's earlier work on videogame culture in India, this book addresses issues of how discussions of equality and diversity sit within videogame studies, particularly in connection with the subcontinent, thereby presenting pioneering research on the videogame cultures of the region. Drawing on a series of player and developer interviews and surveys conducted over the last five years, including some recent ones, this book provides a sense of how games have become a part of the culture of the region despite its huge diversity and plurality and opens up avenues for further study through vignettes and snapshots of the diverse gaming culture. It addresses the rapid rise of videogames as an entertainment medium in South Asia and, as such, also tries to better understand the recent controversies connected to gaming in the region In the process, it aims to make a larger connection between the development of videogames and player culture, in the subcontinent and globally, thus opening up channels for collaboration between the industry and academic research, local and global.

Cricket and Globalization Stephen Wagg,2010-08-11 Cricket has changed dramatically in recent years and now can claim to be a truly global game, thanks in large part to new media technologies which bring a global audience for World Cups and other major competitions. However, the globalization of cricket has not followed a pattern familiar in other sports: concentrations of wealth, media, and marketing leading to the domination of Western countries over the rest, and this fact alone makes it interesting for scholars of the globalization of sport. Cricket has followed a very different global path; the non-Western countries (former British colonies) have begun to dominate and have taken control of the economics and politics of the game. In short, cricket has been “Indianized”. The globalization of cricket has received a massive boost from the popularity of the newest form of the game (Twenty20) which is helping promote cricket as a mass TV sport. The rise of Twenty20, particularly the Indian Premier League (IPL), is transforming the way cricket is organized, played, and watched all over the world. This development both reinforces the globalization of cricket and also underlines that the “movers and shakers” within cricket are no longer the traditional elites in metropolitan centres but the businessmen of India and the media entrepreneurs world-wide who seek to shape new audiences for the game and create new marketing opportunities on a global scale.
