Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

News and Democratic Citizens in the Mobile Era Johanna Dunaway, Kathleen Searles, 2022-12 People increasingly use mobile phones for many tasks including consuming news, which affects what they pay attention to and learn. Using mobile devices as a case, this book argues that by differentiating between physical and cognitive access to content we can better understand how technology structures information delivery and presentation. Moreover, a model for post-exposure processing offers a means to generate and test for communication technology's effects on cognitive access. This book helps to reconcile accounts that paint smartphones as either the democratic leveler or divider and offers a researcher an approach to understanding media effects as situated in the context of changing information communication technology. The authors argue that this approach adds to our understanding of how communication technology changes what we know about media effects, with consequences for the informed citizenry a democracy requires--

This text has made it easy for my students to learn about research and theory related to political journalism and the political communication system in America. It has great utility and insight while being comprehensive but not overwhelming for students. —Jason Martin, DePaul University Known for its readable introduction to the literature and theory of the field, *Mass Media and American Politics* is a trusted, comprehensive look at media's impact on attitudes, behavior, elections, politics, and policymaking. New Media and Society Deana A. Rohlinger,2019-02-05 A sociological approach to understanding new media’s impact on society We use cell phones, computers, and tablets to access the Internet, read the news, watch television, chat with our friends, make our appointments, and post on social networking sites. New media provide the backdrop for most of our encounters. We swim in a technological world yet we rarely think about how new media potentially change the ways in which we interact with one another or shape how we live our lives. In *New Media and Society*, Deana Rohlinger provides a sociological approach to understanding how new media shape our interactions, our experiences, and our institutions. Using case studies and in-class exercises, Rohlinger explores how new media alter everything from our relationships with friends and family to our experiences in the workplace. Each chapter takes up a different topic – our sense of self and our relationships, education, religion, law, work, and politics – and assesses how new media alter our worlds as well as our expectations and experiences in institutional settings. Instead of arguing that these changes are “good” or “bad” for American society, the book uses sociological theory to challenge readers to think about the consequences of these changes, which typically have both positive and negative aspects. *New Media and Society* begins with a brief explanation of new media and social institutions, highlighting how sociologists understand complex, changing relationships. After outlining the influence of new media on our identities and relationships, it discusses the effects new media have on how we think about education, practice our religions, understand police surveillance, conceptualize work, and participate in politics. Each chapter includes key sociological concepts, engaging activities that illustrate the ideas covered in the chapter, as well as links, films, and references to additional online material.
