**Dwelling in Mobile Times** Sybille Frank,Lars Meier,2019-04-30 In an era of increasing mobilities, places of residence are still vital. Unlike commuting, migrating or travelling, dwelling usually evokes – at least in modern Western thought – the idea of an immobile, private place to rest. This book explores the places, spaces and practices of dwelling in mobile times, and considers dwelling under the umbrella of broader transformations in society. The manifestations of these transformations are carved out on the level of everyday practices and experiences. Bringing together eight case studies from Europe, the USA and Asia on subjects such as gentrification, homelessness and displaced persons, multi-local and diasporic lifeworlds, professional elites, and tourism, the book explores various and complex entanglements of mobilities and dwelling in detail. In doing so, the contributors critically analyse who may be, or has to be, mobile under which circumstances at present. This book thus demonstrates that mobility is more than movement between localities, and that to dwell is more than to be at a locality. Instead, mobilities and dwelling are both shaped and challenged by strong but shifting power relations and are thus deeply contested. This book was originally published as a special issue of Cultural Studies.

Historic Photos of Mobile ,2008-04-01 Mobile's long history includes joyous Mardi Gras celebrations and tragic natural disasters. Civil War and segregation, shipping and manufacturing, dirt streets and booming wharves are part of its fascinating story. Cargo shipped to and from its busy docks gradually shifted from cotton to timber to bananas to manufactured goods. In World War II, its population grew exponentially as the city became an important shipbuilder for America's arsenal. Historic Photos of Mobile transports readers to a time of hoop skirts and horse-drawn carriages, then shows them how the city changed during the first half of the twentieth century. Timeless, rarely seen, black-and-white images capture historic colleges, family-owned shops, the longest American flag ever displayed, hurricane damage, social change, tall ships, and scenes of daily life in generations long gone.

*Mobile Chinese Entrepreneurs* Chan Kwok-bun,Chan Wai-wan,2011-07-26 Mobile Chinese Entrepreneurs draws extensively on the narratives of sixteen small-to-medium business owners, born on the mainland, who have immigrated to Hong Kong and returned to their ancestral hometowns in China to establish their enterprises. For these executives, business and social life alike are marked by constant interplay of identities, such as individual identity/group membership and ancestral/immigrant identity. Yet as often as this juggling of multiple “selves” can be beneficial in the economic sphere, it can also lead to feelings of rootlessness and alienation. Writing with rare sensitivity, the two authors synthesize insights from economic sociology, psychology, ethnic relations, emotions, and social networks, creating an exploration of social capital and social identity comparable to similar groups of businessmen and –women in other parts of the world.

Mbusiness: The Strategic Implications of Mobile Communications Stuart Barnes,2012-05-04 MBusiness: The Strategic Implications of Mobile Communications presents recent theory and evidence on wireless information technologies and their application in business. Such information is useful in both the classroom and for interested practitioners contemplating new technological developments. MBusiness is a very fast moving area and consequently there is a need to provide relevant material for those who wish to understand the subject. This text provides recent teachings, moving beyond existing wireless technology publications, and differentiates itself strongly via its emphasis on the strategic business application of mobile communications. It stands apart by virtue of the degree of academic rigour with which it tackles the material and is an excellent resource for teaching and learning in the classroom.

**Mobile Learning** John Traxler,Agnes Kukulska-Hulme,2015-11-06 Mobile Learning: The Next Generation documents the most innovative projects in context-aware mobile learning in order to develop a richer theoretical understanding of learning in modern mobile-connected societies. Context-aware mobile learning takes advantage of cell phone, mobile, and pervasive personal technologies to design learning experiences that exploit the richness of both indoor and outdoor environments. These technologies detect a learner's presence in a particular place, the learner's history in that place or in relation to other people and objects nearby, and adapt learning experiences accordingly, enabling and encouraging learners to use personal and social technologies to capture aspects of the environment as learning resources, and to share their reactions to them.

**Mobile Bay and the Mobile Campaign** Chester G. Hearn,2010-06-21 In the Civil War, both sides understood that closing the South's ports would halt the introduction of war materiel to the industrially weak region. Though the North captured New Orleans in 1862, they did not attack the Confederate navy in Mobile Bay or the city of Mobile, Alabama, until 1864. The two-year delay allowed much needed supplies to enter the Confederacy and changed the face of the ensuing Mobile Campaign, as technological advances in ships submarines, mines and fortification made a striking difference in the fighting. This book examines the politics, preparations, leaders, and battles that made the Mobile Campaign a microcosm of the overall conduct of the Civil War.

**Time for Revolution** Antonio Negri,2013-06-27 Antonio Negri wrote the two essays that comprise Time for Revolution while serving a prison sentence for alleged involvement with radical left-wing groups. Although the essays were written two decades apart, their concerns are the same: is there a place for resistance in a society utterly subsumed by capitalism? In the wake of the global crisis of capitalism heralded by the 2008 crash, the question has never been more relevant and Negri remains an insightful and passionate guide to any attempt to answer it.

**Mobile Entrepreneurs** Katrin Sontag, 2018-07-16 Migration, mobility, and globalization are transforming ways of working and living. Business activities, relationships and a sense of belonging are often not tied to any one place. This book explores biographies of highly mobile startup founders who often run startups that have been called „born global“. It describes how they move, how they orientate and perceive themselves, and how migration and mobility play a role beyond the physical act of 'moving'. Presenting current ethnographic research, the book critically discusses approaches in migration and mobility studies and the research field of the „migration of the highly skilled“.

**The Routledge Handbook of Mobile Socialities** Annette Hill, Maren Hartmann, Magnus Andersson, 2021-05-06 This is a state-of-the-art survey of an emerging area of study in media, communication and cultural studies, mobility studies and mobile communications. 'Mobile socialities' demarcates a new area of research that captures people's various and contrary experiences of media in relation to their mobilities and socialities. The chapters in this volume are written by a range of international scholars offering a comprehensive overview and source of inspiration for a diverse range of topics on the contingent practices and finite resources of people and media on the move. The book demonstrates through empirical and theoretical research how mobile socialities is a generative concept for thinking through power, identity and the contexts of media in public and mediated spaces, work and everyday life, addressing a spectrum of mobile socialities and lived politics. The research and various cases make visible previously hidden, or obscured, social practices and allow us to rethink the meanings of mobility, digital media or the home in these examples of people living within the centre and peripheries of society. The Handbook establishes mobile socialities as a new area of academic enquiry, ideal for advanced undergraduate students and scholars across the disciplines of media, communication and cultural studies, anthropology, cultural geography and sociology.

**Mobile Marketing Management** Hongbing Hua, 2019-03-18 With the development of mobile internet technology, people's lifestyle and consumer behavior are changing rapidly. Nowadays, the products on the market are updating more and more frequently, and the traditional marketing theory and brand theory fail to get with the mobile internet. So, what's the innovative marketing to take in the new era? Since 2012, China has entered into the mobile era, and became a major country of mobile internet application. The book summarizes the experience of the author

accumulated from many trials and errors in management and marketing innovation, so as to form the pattern of management and marketing for the next 30 years. Mobile Marketing Management lays the foundation for the new era with four pillars: service, substance, superuser, space, known as 4S theory for short. In view of the concept of customer-first, it is all about service, and products become productized service concepts. In view of the failure of mass communication, the competition among all services becomes the competition of substance differentiation. Regarding the popularity of self-organization, it becomes a trend to cooperate with people rather than the company to develop the market. In view of the principle of fuzzy market boundary, the enterprises shall optimize their living space and evolve their development space. This book contains numerous case studies along with analysis and creates the discipline of mobile marketing management, providing innovative theories, methods and tools for the marketing of enterprises. Through this book, readers can master the marketing methods of the mobile internet era. They can apply the marketing theory in this book to guide the marketing practice, thus improving marketing efficiency and reducing marketing costs.

**Mobile Communication and Society** Manuel Castells,Mireia Fernandez-Ardevol,Jack Linchuan Qiu,Araba Sey,2009-09-18  
How wireless technology is redefining the relationship of communication, technology, and society around the world—in everyday work and life, in youth culture, in politics, and in the developing world. Wireless networks are the fastest growing communications technology in history. Are mobile phones expressions of identity, fashionable gadgets, tools for life—or all of the above? Mobile Communication and Society looks at how the possibility of multimodal communication from anywhere to anywhere at any time affects everyday life at home, at work, and at school, and raises broader concerns about politics and culture both global and local. Drawing on data gathered from around the world, the authors explore who has access to wireless technology, and why, and analyze the patterns of social differentiation seen in unequal access. They explore the social effects of wireless communication—what it means for family life, for example, when everyone is constantly in touch, or for the idea of an office when workers can work anywhere. Is the technological ability to multitask further compressing time in our already hurried existence? The authors consider the rise of a mobile youth culture based on peer-to-peer networks, with its own language of texting, and its own values. They examine the phenomenon of flash mobs, and the possible political implications. And they look at the relationship between communication and development and the possibility that developing countries could leapfrog directly to wireless and satellite technology. This sweeping book—moving easily in its analysis from the United States to China, from Europe to Latin America and Africa—answers the key questions about our transformation into a mobile network society.

*Wicked Mobile* Brendan Kirby,2015-11-09 Since its founding in 1702 as the first capital of the French colony of Louisiana, Mobile has witnessed all manner of salacious scandals. An 1847 murder resulted in the hanging of Charles Boyington, who maintained his innocence to the very end, and a great oak tree near his grave site seems to

support him. Many believe the notorious Copeland gang started one of the city's worst fires as cover to escape with stolen loot. A 1932 murder case involved a slaying at the landmark Battle House Hotel and proved that Mobile juries could not always be trusted. Local author Brendan Kirby revives Mobile's history of gangsters, gambling, theft and arson.

*Everyday Mobile Belonging* Kirsty Finn, Mark Holton, 2019-06-13 This book presents a framework for a new kind of thinking about student mobilities and belonging, which foregrounds the everyday and rhythmic dimensions of students' experiences. Using case studies from a variety of UK higher education contexts, this book develops the concepts of everyday mobilities and mobile belongingness. The authors draw on key ideas about the changing characteristics of UK higher education and of student belonging, exploring the central themes of the sensory, affective and emotional aspects of student mobilities; contested and mobile belongings; and the significance of everyday life, to bring a new dimension to the literature on inter and intra-national student mobilities. This is achieved through an examination of the innovative ways in which social science methods have been (re)imagined through mobility, with a specific focus on youth and education. Kirsty Finn and Mark Holton bring together theory and research from the fields of education studies, geography and sociology, and combine this with a discussion of rich empirical data from three UK-based research projects to set out an explicitly mobility-centred approach to 21st-century student experiences. The findings can be recognised globally because they synthesise debates about travel and transport, students' sense of place and feelings of belonging, and the interrelationship between physical, social and virtual mobilities that higher education brings together. In doing so, this text offers a coherent and grounded campaign for theory and research within studies of higher education that foreground multiple mobilities and diverse feelings of belonging.

*New Men, New Cities, New South* Don H. Doyle, 2014-03-24 Cities were the core of a changing economy and culture that penetrated the rural hinterland and remade the South in the decades following the Civil War. In *New Men, New Cities, New South*, Don Doyle argues that if the plantation was the world the slaveholders made, the urban centers of the New South formed the world made by merchants, manufacturers, and financiers. The book's title evokes the exuberant rhetoric of New South boosterism, which continually extolled the new men who dominated the city-building process, but Doyle also explores the key role of women in defining the urban upper class. Doyle uses four cities as case studies to represent the diversity of the region and to illuminate the responses businessmen made to the challenges and opportunities of the postbellum South. Two interior railroad centers, Atlanta and Nashville, displayed the most vibrant commercial and industrial energy of the region, and both cities fostered a dynamic class of entrepreneurs. These business leaders' collective efforts to develop their cities and to establish formal associations that served their common interests forged them into a coherent and durable urban upper class by the late nineteenth century. The rising business class also helped establish a new pattern of race relations shaped by a commitment to economic progress through the development of the South's human resources, including the black labor force. But the new men of the cities then used legal segregation to control competition between the races.

Charleston and Mobile, old seaports that had served the antebellum plantation economy with great success, stagnated when their status as trade centers declined after the war. Although individual entrepreneurs thrived in both cities, their efforts at community enterprise were unsuccessful, and in many instances they remained outside the social elite. As a result, conservative ways became more firmly entrenched, including a system of race relations based on the antebellum combination of paternalism and neglect rather than segregation. Talent, energy, and investment capital tended to drain away to more vital cities. In many respects, as Doyle shows, the business class of the New South failed in its quest for economic development and social reform. Nevertheless, its legacy of railroads, factories, urban growth, and changes in the character of race relations shaped the world most southerners live in today.
