JOSMA ETTUMANUR

Stock To Buy in 2022 JOSMA ETTUMANUR,2022-02-11 This is a nontechnical book on stock trading and this does not propagate any strategy. This is for common man. Strategies in stock market are like Jackfruit that fell up on a rabbit. Rabbits are not there always to be killed by a falling jack fruit. Many people in rural towns in India are still suspicious about the stock market. They are unaware of the lakhs and crores lying in the stock market as for many of them it is something that steals your money. „You invest in land, your money doubles in few years. Gold will not let you down“ These are advices that you hear again and again. Very few say nice things about the stock market as they have heard only about losses in shares. It is like a puzzle that a common man finds hard to understand. In stock market „Mr. A“ lost money, „Mrs. B“ lost money and still, you claim you can mint money there. How is this possible?“ One of the reasons for this illiteracy about the stock market is the use of technical meters and standards to people who cannot understand Fibonacci, Camarilla, head and shoulder pattern or such technical meters to explain the stock movement. In real terms, stocks move as per situations prevalent and new investors and traders who try to evaluate this on pure technical basis to invest may lose money as all are not capable of this assessment and it is not necessary to think that stocks move accordingly always. Newcomers need just overall directions based on the performance and this book gives just that. This does not propagate intraday

trading. Some like Yes bank and Adani Power are included as we are sure about a better future in those counters although their balance sheet shows a net loss. Please understand that there are lakhs of housewives and fixed employed people who are slow and silent in buying and selling stocks over a period of time and enlarging their wealth. You cannot sell land in one day. You have to be careful in keeping gold which is an asset but will not grow that much except in certain volatile times. And fixed deposits are safe but give you peanuts as interest in return. But the stocks that are mentioned here are ones which gave their holder three times to 12 times their value in one year! To give an example a stock called Intellect Design Arena which deals in IT financials cost Rs44 in March 2020. In March 2021 its price is above Rs 750 (now 848) Suppose a poor man or woman who earns paltry sums had bought just 100 shares of Intellect Design Arena during the start of Corona chaos. Now it is Rs75000 which may help them sizably for something. Or in other words, a lady sold one sovereign or 8gram gold last year and bought 500 shares of Intellect Design Arena. This year her investment in this particular share grows to Rs375000 with which she can buy 75 grams or nine sovereign gold. (And the Gold rate has come down now) These are rough estimates to show the potential in certain stocks. And all stocks are not the same in growth. Now after all what is a stock or share? It is a part or smallest unit of ownership of a company registered audited and listed as per all government norms. It is offered to the public to invest in them. If the company grows

and makes a profit, the price of the shares of that company will grow and you can sell them at ease in profit. Remember that as everything is computerized and controlled by National Stock Exchange and Bombay Stock Exchange buying or selling shares can be done in a second's time being anywhere in the world and no need to go anywhere to collect the money as it comes into your registered bank account within two days if you have sold shares of any company. And how can you buy and sell shares? Now stock broking firms are opened at all nooks and corners of the country. You can go there or simply sit at home and open an account online through which you can buy and sell. Remember that certain share prices move up and down several times a day and you may get profit at low cost in a day and be tempted to do intraday trading as it is called. But do remember that when you gain someone had lost. So next day you could be the victim and avoid day trading which can sometimes grab your funds. Here we are not discussing same-day trading because cartels and „operators“ are active in high jacking certain stocks by which some stocks will appear going up tempting us to buy. But in the next moment, it comes down in few seconds giving you losses. But if you are holding those shares you need not sell them on the same day. Next day or in the next opportunity you will get a chance to sell in profit. Buy Today Sell Tomorrow (BTST) or Delivery (buying forever) are schemes under which you can avoid loss and wait till the stock price comes up. For this, stock selection is important as all share prices will not come up every time. But in Intraday or same day or day trade, you have to

close the deal around 3 8 PM regardless of profit or loss. So, it is a game of time also. Between 9.15 and 3.15 PM, you can mint money or lose money if it is a day trade. Being a small timeframe, you may not understand back scene tactics of players or operators, or brokers who form cartels and take certain stocks to their control. So, the share price moves up and down which may add profit to the operators but losses to the ordinary trader as he does not understand that it is a game plan. This is only about intraday trading. But what happens otherwise? You bought a reputed stock like State Bank of India at Rs150 in May 2020 giving full price, ie, 100 shares at Rs15000. On 2021 February 18 the price was Rs427 or the investment became Rs 42700 in nine months. If you deposit 15000 rupees in SBI for nine months as a deposit it will not earn you even Rs1000 as interest. The difference between a thousand and 27 thousand is what this book is about. On a certain day of May 2020, the SBI share price went down to Rs155 when you decided to enter for a same-day trade. It closed at Rs150 and you are forced to sell at that price at a loss of Five rupees per share. This is an example of how losses are created for individuals. But if you bought it to hold on BTST (for three days) on the second day it became Rs160 and on the sixth day (if bought on delivery) it became Rs171. Or after one month, the price was Rs194. And it has never gone down. So, if you sell then, you get 26.6% profit in one month! These are actual rates. The importance of stock selection is another factor. A person who had bought 2000 Adani Green shares at Rs32 in 2018 was advised by his

broker company staff to change into a „promising“ new realty stock at Rs60. Now Adani 9 Green is Rs1300 a share and the other one is Rs20 a share. What he lost is 2000×1268 or 25,36000 lakhs! Understand that all staff at broker firms do not read stock market stuff and do research. They simply advise what they heard somewhere or what their company promotes as some brokers do the role of market-making for certain companies for a price. Sometimes shares like Adani Green or Adani Power may get affected by market scams and people frantically sell. Now in such situations, you have to look at whether the problem is within the company or in the market. If it is outside the company need not worry. The market will take care of that and the share price will bounce back as everything in the company is working well. Then why people are attracted to Intraday or same-day trading? It is because brokers used to offer leverage or Margin money to you for Intraday. If you have Rs10000, you get leverage or margin of 40000 to two lakhs. Or four times to 20 times. (Now this has been reduced and warned to be stopped by SEBI) So you can buy more. If it is profit, it will be more and if it is loss it will be also many folds. The Stop-loss mechanism becomes useless in volatile stocks. Here share trading becomes a game like azz football or cricket when you cannot decide in advance which team will win. As it is a matter of hours you do not have much choice. Whether it is loss or profit you have to close at 3 PM. Or else the broker"s system will automatically square off your trade. Through this process, many people lose their money. This book gives an answer to these

questions and gives you details of the 77 most profitmaking stocks in the Indian stock market last year. This book is not intended to teach you technically about trading or do not say anything about various theories and charts that schools teach you in this regard. So anyone can understand the book and buy shares. Since share prices move up and down on a daily basis some data were revised in this book and hence it is strictly not the 2021 March data.

This expanded new edition provides in-depth answers, and lets you experiment with several labs and more than 100 recipes--from the sweet (a patent-violating chocolate chip cookie) to the savory (pulled pork under pressure).

Principles and Labs for Deep Learning Shih-Chia Huang, Trung-Hieu Le, 2021-07-06 Principles and Labs for Deep Learning provides the knowledge and techniques needed to help readers design and develop deep learning models. Deep Learning techniques are introduced through theory, comprehensively illustrated, explained through the TensorFlow source code examples, and analyzed through the visualization of results. The structured

methods and labs provided by Dr. Huang and Dr. Le enable readers to become proficient in TensorFlow to build deep Convolutional Neural Networks (CNNs) through custom APIs, high-level Keras APIs, Keras Applications, and TensorFlow Hub. Each chapter has one corresponding Lab with step-by-step instruction to help the reader practice and accomplish a specific learning outcome. Deep Learning has been successfully applied in diverse fields such as computer vision, audio processing, robotics, natural language processing, bioinformatics and chemistry. Because of the huge scope of knowledge in Deep Learning, a lot of time is required to understand and deploy useful, working applications, hence the importance of this new resource. Both theory lessons and experiments are included in each chapter to introduce the techniques and provide source code examples to practice using them. All Labs for this book are placed on GitHub to facilitate the download. The book is written based on the assumption that the reader knows basic Python for programming and basic Machine Learning. Introduces readers to the usefulness of neural networks and Deep Learning methods Provides readers with in-depth understanding of the architecture and operation of Deep Convolutional Neural Networks Demonstrates the visualization needed for designing neural networks Provides readers with an in-depth understanding of regression problems, binary classification problems, multi-category classification problems, Variational Auto-Encoder, Generative Adversarial Network, and Object detection

LIMS Richard Mahaffey, 2012-12-06 Computing and information management technologies touch our lives in the environments where we live, play and, work. High tech is becoming the standard. Those of use who work in a laboratory environment are faced with an obvious challenge. How do we best

apply these technologies to make money for our companies? The first level of deliverable benefits is achieved through task automation. The second level is obtained by integrating the individual islands of automation. The third, or top level, of benefits is related to applying intelligence to computing applications. The use of computing technology, at level one, to automate lab procedures, methods, and instruments has been profitable for many years. We can easily find yearly returns in the range of 10-50% for investments at this level. For level two, the integration of some applications has evolved and has led to data management systems and local area net working in the lab environment. Investment paybacks at level two are substantially higher, in the range of 200-400%. Examples of applications at the top level, that of intelligent systems and applications, are few and far between. And what about the payback for investments at this level? With such limited experience at level three, we can only estimate the benefits. But again, they appear to be much higher, in the range of 2000- 4000%.

Masala Lab Krish Ashok, 2021-04-15 Ever wondered why your grandmother threw a teabag into the pressure cooker while boiling chickpeas, or why she measured using the knuckle of her index finger? Why does a counter-intuitive pinch of salt make your kheer more intensely flavourful? What is the Maillard reaction and what does it have to do with fenugreek? What does your high-school chemistry knowledge, or what you remember of it, have to do with perfectly browning your onions? Masala Lab by Krish Ashok is a science nerd's

exploration of Indian cooking with the ultimate aim of making the reader a better cook and turning the kitchen into a joyful, creative playground for culinary experimentation. Just like memorizing an equation might have helped you pass an exam but not become a chemist, following a recipe without knowing its rationale can be a sub-optimal way of learning how to cook. Exhaustively tested and researched, and with a curious and engaging approach to food, Krish Ashok puts together the one book the Indian kitchen definitely needs, proving along the way that your grandmother was right all along.

Labcorp Don Bolden, 2017-05-31 It began as an idea in the mind of a medical student at Duke University. Later in 1969 that idea became a reality. In that year Dr. Jim Powell, with Ernie Knesel as the laboratory manager and Powell's brothers, Ed and John, as coinvestors, started a medical testing laboratory in Burlington, a small North Carolina town. As time passed, the company and its successors revolutionized medical treatment and assured millions of patients faster and more thorough testing to determine their health problems and how they should be treated. In the past it might have taken two weeks to get test results, often delaying treatment necessary for the patient's well-being. This new company, however, soon made it possible, even in rural areas, to get sophisticated, state-of-the-art lab testing with twenty-four-hour turnaround, resulting in better medicine. Today, that company, after internal growth and many mergers and acquisitions, is the largest of its kind in the world, serving millions of people not only in the United States but in several

foreign countries as well. It is one of the few S&P 500 companies headquartered in North Carolina, and those facilities remain in Burlington. We now know it as LabCorp.

Staying Alive Vandana Shiva, 2016-03-01 Inspired by women's struggles for the protection of nature as a condition for human survival, award-winning environmentalist Vandana Shiva shows how ecological destruction and the marginalization of women are not inevitable, economically or scientifically. She argues that "maldevelopment"—the violation of the integrity of organic, interconnected, and interdependent systems that sets in motion a process of exploitation, inequality, and injustice—is dragging the world down a path of self-destruction, threatening survival itself. Shiva articulates how rural Indian women experience and perceive ecological destruction and its causes, and how they have conceived and initiated processes to arrest the destruction of nature and begin its regeneration. Focusing on science and development as patriarchal projects, *Staying Alive* is a powerfully relevant book that positions women not solely as survivors of the crisis, but as the source of crucial insights and visions to guide our struggle.

Organic Spices Parthasarathy, V.A, 2008-01-05 The global changes warranted fastness in food production system and fast foods. In tune with demand, crop production also oriented accordingly. However, the proverb 'Health is a Wealth' is reminded us to keep vigil on system and method of food production

and food safety. The ill-effect of conventional chemical based farming well documented and public realized the importance organically produced food and efforts are being made to popularize the organic production. India is a Land of Spices, each state or union territory in India cultivates one or other spice. Since spices form a part of many medicines the demand for organically produced spices is increasing considerably. Assuming a market growth of 10% in Europe, USA and Japan for organic spice products the world demand for organic spices may grow to 57000 tonnes in the next 10 years. Large scale use of high analysis fertilizers and pesticides result environmental hazards and imbalances in soil nutrients. Since spices are high valued and export oriented in nature it is imperative to keep the levels of pesticide residues below tolerance limits in view of the standards set by the importing countries. Hence the book on Organic Spices is timely and covers all aspects of organic spice production. The topic includes historical spice trade and importance of spices in food chain. Brief account on organic agriculture movement in the world and its present status and opportunity for organic spices in the world market are given. The chemistry and different methods of composting are included in the organic manures chapter will be informative. Microbes play a greater role in agriculture, a separate chapter devoted on microbes and plant growth promoting rhizobacteria would definitely enrich the reader. Not only that, the topics on biological control of insect pests, nematodes, fungus and bacteria of spices highlighted in separate chapters

would be of interest in organic production system. The importance, composition, uses, botany and varieties, organic way of production of spices like black pepper, cardamom, ginger, turmeric, chillies and paprika, nutmeg, vanilla, seed spices like cumin, fennel, fenugreek, coriander and their harvest and post harvest processing are enumerated. The chapters on good agricultural practices (GAP) and organic certification procedures outlined for adoption. This would serve as a reference book for researchers, teachers and students besides farmers, traders and consumers.

History of Great Nicobar Island The Ascent Tara Singh Pabla, 2018-12-21 This book is all about the incredible last point of India, Great Nicobar. It was the ex-servicemen from Punjab who first inhabited in the Great Nicobar Island on 23.4.1969 AD and this paved way from other states for settlement in Great Nicobar Island. Induction of ex-servicemen settlers brought life into the Great Nicobar Island. Their struggle and sacrifice in developing this island, braving the severe weather conditions and non-availability of adequate medical facilities brought Great Nicobar Island into the limelight. The dedication, struggle and sacrifice shown by all Ex-servicemen of Great Nicobar Island is beyond comparison and put Great Nicobar Island on the map of progress. This encouraged me to write about "Induction of Ex-servicemen settlers to Great Nicobar Island"
