**Hindy Lauer Schachter**

Frederick Taylor and the Public Administration Community Hindy Lauer Schachter,1989-01-01 This book argues that the authoritarian depiction of Frederick Taylor trivializes his important contribution. Schachter's analysis of Taylor's work shows that he actually originated many of the human relations insights that the literature attributes to Mayo, Maslow, and McGregor. Introduced are two major arguments. Through an examination of Taylor's work, a new way of understanding his actual approach to management is opened. Also discussed are the political and historical reasons that led to the distortion of his work.

**F. W. Taylor** John Cunningham Wood,Michael C. Wood,2002 Following the volumes on Henri Fayol, this next mini-set in the series focuses on F.W. Taylor, the initiator of scientific management. Taylor set out to transform what had previously been a crude art form in to a firm body of knowledge.

A Mental Revolution Daniel Nelson,1992 A Mental Revolution includes eight original essays that analyze how the scientific management principles developed by legendary engineer Frederick W. Taylor have evolved and been applied since his death in 1915. Taylor believed that a business or any other complex organization would operate more effectively if its practices were subjected to rigorous scientific study. His classic Principles of Scientific Management spread his ideas for organization, planning, and employee motivation throughout the industrialized world. But scientific management, because it required, in Taylor's words, a complete mental revolution, was highly disruptive, and Taylor's famous time-motion studies, especially when applied piecemeal by many employers who did not adopt the entire system, helped make the movement enormously unpopular with the organized labor movement. Though its direct influence diminished by the 1930s, Taylorism has remained a force in American business and industry up to the present time. The essays in this volume discuss some of the important people and organizations involved with Taylorism throughout this century, including Richard Feiss and Mary Barnett Gilson at Joseph & Feiss, Frank and Lillian Gilbreth, and Mary Van Kleeck, and explore the influence of scientific management at the Bedaux Company, the Link-Belt Company, and Du Pont. Chapters on the Taylor movement's influence on university business education and on Peter Drucker's theories round out the collection. Written by some of the finest scholars of the scientific management movement, A Mental Revolution provides a balanced and comprehensive view of its principles, evolution, and influence on business, labor, management, and education.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Application of Visual Data in K-16 Science Classrooms Kevin D. Finson,Jon Pedersen,2015-03-01 This book examines visual data use with students (PK-16) as well as in pre-service in- service science teacher preparation. Each chapter includes discussion about the current state of the art with respect to science classroom application and utilization of the particular visual data targeted by the author(s), discussion and explanation about the targeted visual data as applied by the author in his/her classroom, use of visual data as a diagnostic tool, its use as an assessment tool, and discussion of implications for science teaching and/or science teacher preparation. Although the body of research and practice in this field is growing, there remains a gap in the literature about clearly explicating the use of visual data in the science classroom. A growing body of literature discusses what visual data are (although this topic is still viewed as being at the beginning of its development in educators' thinking), and there are some scattered examples of studies exploring the use of visual data in science classrooms, although those studies have not necessarily clearly identified their foci as visual data, per se. As interest and attention has become more focused on visual data, a logical progression of questioning has been how visual data are actually applied in the science classroom, whether it be early elementary, college, or somewhere in between. Visual data applications of interest to the science education community include how it is identified, how it can be used with students and how students can generate it themselves, how it can be employed as a diagnostic tool in concept development, and how it can be utilized as an assessment tool. This book explores that, as well as a variety of pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction.

*Beyond the Frontier* Jill Dahlman,Piper Selden,2015-10-05 Beyond the Frontier: Innovations in First-Year Composition is a compilation of the latest research in first-year composition presented at, and inspired by, the Rocky Mountain Modern Language Association's "Beyond the Frontier" panels. The book is divided similarly into panels, with the editors having collected a sampling of the composition practices that will stand the test of time. The purpose of the book is to present the reader with innovative methods and techniques for incorporation into the first-year composition classroom, or simply to provide food for thought - passing the torch, as it were - so that new research can be conducted and new findings disseminated. The division of the book mimics the panels one would typically find on a particular day during the Rocky Mountain Modern Language Association Conference, providing the reader with a taste of what it's like to be in the room with first-year composition scholars.

**Apps for Librarians** Nicole Hennig,2014-09-24 How can your library—and your patrons—benefit from mobile apps? This guidebook offers a solid foundation in app-literacy, supplying librarians with the knowledge to review and recommend apps, offer workshops, and become the app expert for their communities. Smartphones and other mobile devices that support downloadable applications—universally referred to as apps—can be used to foster productivity, conduct research, or read and study. Additionally, savvy librarians can better serve their communities by gaining expertise in mobile technologies and being qualified to make app recommendations to patrons. This book introduces you to the apps that can help you save time and increase your own productivity as well as serve as a curator and reviewer of apps and resident expert to benefit your patrons. Apps for Librarians: Using the Best Mobile Technology to Educate, Create, and Engage will save you from wading through and learning about the millions of apps available today and direct you to the very best apps in areas important to education, the workplace,

and professional development. Organized by function—reading, writing, reference, multi-media, and productivity—apps are profiled with the following information: title, developer, price, platforms, general description, examples of use, and key features that make it worthwhile for learning and creative work.

**E-Learning and the Academic Library** Scott Rice,Margaret N. Gregor,2016-04-25 Focusing on academic libraries and librarians who are extending the boundaries of e-learning, this collection of essays presents new ways of using information and communication technologies to create learning experiences for a variety of user communities. Essays feature e-learning projects involving MOOCs (massive open online courses), augmented reality, chatbots and other innovative applications. Contributors describe the process of project development, from determination of need, to exploration of tools, project design and user assessment.

Living with Nature's Extremes Robert E. Hinshaw,2006 Gilbert White has been called the most renowned geographer internationally of the twentieth century, and one who personifies the ideal of a natural resources scientist committed to the stewardship of our planet. He has educated the nation and the world on how to change the ways we manage water resources, mitigate natural hazards, and assess the environment.

*Power Plays* Richard A. Colignon,1997-01-01 Power Plays provides a conflict model of organizational behavior based on a historical reanalysis of the creation and early development of the Tennessee Valley Authority (TVA) from its origins as a World War I munitions plant to its consolidation as the largest electric utility in the United States. It also examines Philip Selznick's classic work, TVA and the Grass Roots. The book shows how the interactions among the Depression, New Deal politics, the promise of electricity, and diverse ideologies with the strategic and tactical maneuvers of a policy network explain the institutionalization of the TVA.
