*What Makes a Balanced Leader?* Noha El-

Bassiouny,Ahmed Amin,Jonathan A. J. Wilson,2023-01-30

Despite continuous public interest in leadership studies as well as the abundance of extant literature, the world continues to face leadership predicaments. Given the global crises mankind has been recently exposed to, which include the financial crisis of 2008 as well as the COVID-19 pandemic, further exploration of leadership concepts seems warranted. This edited book aims at introducing the concept of Balanced Leadership from an Islamic perspective.

Drawing on both leadership and Islamic studies, the book synchronizes between secular and religious knowledge domains whilst introducing the notion of balance to mainstream leadership literature. The conceptualizations presented in the book serve to dissect the leadership literature, present historical and philosophical accounts of the balanced leadership concept and infuse that with Islamic theology. The book is useful for practitioners interested in leadership studies as well as scholars and researchers aiming at extending the leadership literature.

**Egypt under El-Sisi** Maged Mandour,2024-01-25 Since the coup of 2013 ended Egypt's brief democratic experiment and retired army chief, Abdel Fattah El-Sisi, became president of Egypt, his regime has unleashed mass repression and severe restrictions on an unprecedented scale. This has been characterized by arbitrary arrests, forced disappearances, and the torture of real - or suspected - political activists and dissidents. The Sisi regime has not only entangled the country in political violence, but

has also mired Egypt in a deep economic crisis. This book follows President Sisi's regime in the aftermath of the coup that brought him to power. It is a chronology of the devastating political, economic and social consequences of direct military rule. Written by Egyptian political analyst and Egypt pundit, Maged Mandour, it is a compelling account built on years of writing and research. This includes analysis of primary sources, such as laws, constitutional amendment issued by the regime, statements made by regime officials, and local media, as well as official economic data from state sources and international organisations. Mandour explains exactly how Sisi operates and what makes his regime so different, and so dangerous, compared to those that came before. It shows, for the first time, how Egypt has been pushed to the brink of the abyss and why this will change the country for decades to come.

Politics in the Crevices Sarah El-Kazaz, 2023-09-29 In *Politics in the Crevices*, Sarah El-Kazaz takes readers into the world of urban planning and design practices in Istanbul and Cairo. In this transnational ethnography of neighborhoods undergoing contested rapid transformations, she reveals how the battle for housing has shifted away from traditional political arenas onto private crevices of the city. She outlines how multiple actors—from highly capitalized international NGOs and corporations to city dwellers, bureaucrats, and planning experts—use careful urban design to empower conflicting agendas, whether

manipulating property markets to protect affordable housing or corner luxury real estate. El-Kazaz shows that such contemporary politicizations of urban design stem from unresolved struggles at the heart of messy transitions from the welfare state to neoliberalism, which have shifted the politics of redistribution from contested political arenas to design practices operating within market logics, ultimately relocating political struggles onto the city's most intimate crevices. In so doing, she raises critical questions about the role of market reforms in redistributing resources and challenges readers to rethink neoliberalism and the fundamental ways it shapes cities and polities.

Classless Politics Hesham Sallam, 2022-10-25 Since the 1970s, the Egyptian state has embarked on a far-reaching and destabilizing project of economic liberalization, reneging on its commitments to social welfare. Despite widespread socioeconomic grievances stemming from these policies, class politics and battles over wealth redistribution have largely been sidelined from elite-led national politics. Instead, conflicts over identity have raged, as Islamist movements became increasingly prominent political players. Classless Politics offers a counterintuitive account of the relationship between neoliberal economics and Islamist politics in Egypt that sheds new light on the worldwide trend of "more identity, less class." Hesham Sallam examines why Islamist movements have gained support at the expense of the left, even amid conflicts over the costs of economic reforms. Rather than highlighting the stagnancy of the left or the agility of Islamists, he pinpoints the historical legacies of authoritarian survival strategies. As the regime resorted to economic liberalization in the 1970s, it tacitly opened political space for Islamist movements to marginalize its leftist opponents. In the long run, this policy led to the fragmentation of opponents of

economic reform, the increased salience of cultural conflicts within the left, and the restructuring of political life around questions of national and religious identity. Historically rich and theoretically insightful, this book demonstrates how the participation of Islamist groups shapes the politics of neoliberal reform and addresses why economic liberalization since the 1970s has contributed to the surge in culture wars around the world today.

*Enhanced Learning Environments* Zeynep

Taçgın,Andrew Hagan,2022-08-17 Representing a diverse range of academic perspectives from various disciplines to provoke original thinking, engage critical analysis, and fuel the desire to improve education, this book is for those readers with a genuine interest in quality education and supporting technology. One often hears the words “Enhanced”, “Learning Environments”, “Technology”, and “Innovation” liberally applied in conversations with an assumption that their inclusion automatically improves the quality of education. This book looks beyond mere buzzwords for the ground truth in how education, technology, and innovation can enhance theory and practice in pedagogy and andragogy. It begins with a philosophical criticism about education and technology to remind us of our responsibility to teach purposefully, before discussing entrepreneurial thinking regarding education. The book then makes a strong case for how technology can impact life-saving educational training, and discusses immersive virtual reality learning environments for exploring the essential design components from the perspective of instructional designers and subject experts. It also examines how state-of-the-art Hollywood technology

is now accessible to all and discusses the impact this may have on education. The book concludes with an analysis of the implications of the metaverse concept for a pioneering new frontier in future-focused enhanced learning environments.
