Development of a 1.22-m-diam Dynamic Air Overpressure Soil Test Facility Stafford S. Cooper, Richard C Sloan, Richard C. Sloan, 1975 A large cold-gas-operated air overpressure test facility has been designed, fabricated, and installed at the U.S. Army Engineer Waterways Experiment Station to test soil specimens 1.22 m in diameter and up to 5.03 m in length under static and blast-type loading conditions. A series of preliminary tests was conducted to evaluate the loading characteristics and overall performance of the facility and to compare results of uniaxial strain tests on dry sand conducted in the large facility with well documented and generally accepted results of tests on similar sand specimens conducted in a previously developed 12.70-cm-diam uniaxial strain test device.

A Framework for Complex System Development Paul B. Adamsen II, 1914 Industry, government, and academic efforts to create a generalized systems engineering process have repeatedly fallen short. The outcome? Systems engineering failures that produce losses like the September 1999 destruction of the Mars Climate Orbiter. A simple information transfer error between teams motivated far-reaching managerial and technical

International Migration, Economic Development & Policy Maurice Schiff, aglar zden, 2007-06-26 International migration has become a central element of international relations and global integration due to its rapidly increasing economic, social, and cultural impact in both source and destination countries. This book provides new evidence on the impact of migration and remittances on several development indicators, including innovative thinking about the nexus between migration and birth rates. In addition, the book identifies the effect of host country policies on migration flows, examines the determinants of return and repeat migration, and explores the degree of success of return migrants upon return to their country of origin.
