Glimpses into Primary School Teacher Education in South Africa Sarah Gravett, Elizabeth Henning, 2020-11-05 This book explores the current landscape of Initial Teacher Education (ITE) in primary schools in South Africa. Considering recent policy directives and initiatives, it highlights the dilemmas of ITE for the primary school and gives a thorough account of innovations and initiatives to improve ITE. The book presents what works best for quality preparation of teachers in the Global South, where many children rely on their teachers and school life to break the cycle of poverty. Chapters draw on evidence from workplace learning, pre-service study, and primary school teacher education policy to highlight examples of promising change in teacher education in South Africa, addressing the clichés of theory versus practice head-on. This book successfully brings out the challenging aspects of teacher education for childhood learning which has otherwise been regarded as the softer option for a career in education. This book will be of great interest for academics, researchers, and post-graduate students in the fields of teacher education, African education, educational policy, international education, and comparative education.

Reaching the Unseen Children Jean Gross, 2021-11-17 Reaching the Unseen Children provides a powerful and accessible resource for schools working to raise the attainment of all disadvantaged pupils, with particular emphasis on white children from low-income backgrounds. This group – especially boys – consistently on average underperform in the education system, and the effects of COVID-19 will only have widened the gap. Drawing on her long experience of working with disadvantaged and left-behind communities, Jean Gross describes the path that many children take, from early language delays to persistent literacy and numeracy difficulties, which lead to progressive disengagement from learning. She argues that progress will only be made through early intervention and building pupils' sense of capability, and sets out low-cost, low-effort ways in which teachers can transform outcomes for their students – through the everyday language they use, the expectations they convey, and the relationships they build with pupils and their parents. Providing practical, evidence-based strategies and case studies of schools with outstanding practice, this an essential guide for anyone working in education who is seeking equity for all their pupils.
