*IT Success!* Michael Gentle, 2007-10-22 "Fifty years after the birth of corporate computing, IT today is still characterized by 50-70% project failure rates. Which is pretty scary when you come to think of it: either a goblin has cast a spell on a whole profession - or that profession is doing something fundamentally wrong". *IT Success!* challenges the widespread assumption that an IT department is like a building contractor whose project managers, architects and engineers (all construction industry terms...) are supposed to deliver systems on schedule, within budget and to spec. Michael Gentle explains why this is not possible, and turns conventional wisdom on its head by showing that: you cannot define an IT project in terms of contractual budgets and schedules anything can change during the life of a project what is eventually delivered can never be what is actually needed He proposes a new model for IT in which the traditional client/vendor relationship, with its contractual commitments, is replaced by a shared risk/reward partnership geared towards workable results over time. Using real-world examples and a case study, the author walks you through the end-to-end processes of an IT department, covering subjects like demand management, investment planning, agile development and managing production applications.

**STEM Navigators: Pathways to Achievement in Science Technology Engineering & Mathematics** Anderson D. Prewitt,Arielle Drummond,Charmane V. Caldwell,Jasmine D. Crenshaw,Lauren D. Thomas,Sandra Roach,2015-03-15 So many people discuss the importance of educating our nation and our students getting degrees in Science, Technology, Engineering, & Mathematics (STEM), but it is often difficult to successfully guide students through the educational landscape. This results in low retention rates, poor academic outcomes, and an increase in the difficulty of recruiting students into technology related careers. What's needed are real world examples of trailblazers who carved out their own path to success in STEM and are willing to guide others in successfully reaching their educational destinations. What's needed are STEM Navigators. STEM Navigators is a compilation of real life STEM success stories from people who have not only been wildly successful in pursuing and obtaining their own Science, Technology, Engineering, and Mathematics degrees, but they have all worked to teach, mentor, and research ways to guide others effectively through obtaining a STEM education.
