**Enhancing Qualitative and Mixed Methods Research with Technology** Hai-Jew, Shalin, 2014-09-30

In light of the expensive nature of quantitative research, such as experiments, researchers must seek other methods of understanding the world around them. As such, new qualitative methods are gaining ground in the modern research community. Enhancing Qualitative and Mixed Methods Research with Technology explores the integration of new digital tools into the research process. Including current information on data visualization, research design, information capture, as well as social media analysis, this publication serves as an ideal reference source for academicians, scientists, information specialists, business managers, and upper-level students involved in interdisciplinary research.

**Applications of Machine Learning and Artificial Intelligence in Education** Khadimally,

Seda, 2022-02-18 Modes and models of learning and instruction have shown a significant shift from yesterday's conventional learning and teaching given this era's current educational and social contexts. Learners are no longer learning and communicating with human-generated, computed, and mediated—or traditional—learning and instructional practices, paving the way for machine-facilitated communication, learning, and teaching tools. Learning and instruction, communication and information exchange, as well as gathering, coding, analyzing, and synthesizing data have proven to be in need of even more innovative technology-moderated tools. Applications of Machine Learning and Artificial Intelligence in Education focuses on the parameters of remote learning, machine learning, deep learning, and artificial intelligence under 21st-century learning and instructional contexts. Covering topics such as data coding and social networking technology, it is ideal for learners with an interest in the deep learning discipline, educators, educational technologists, instructional designers, and data evaluators, as well as special interest groups (SGIs) in the discipline.

**Emerging Technologies for Librarians** Sharon Q Yang, LiLi Li, 2015-11-28 Emerging Technologies

**Contemplative Vision** Dirk deVries, 2019-03-17 • Your cell phone camera can be a window to wonder – and God • Includes practical guidance, reflection questions, activities, and examples • Can be used by youth or adult groups or for individual spiritual practice There's more to life than selfies! With the advent of digital photography and the widespread use of camera-equipped smart phones, we have all become photographers. Can the same technology that makes the upload of selfies and endless posting to Instagram and Facebook also function as a tool for quiet contemplation, connection, and deeper meaning? Indeed yes: the practice of contemplative photography invites people of faith to set aside distractions of contemporary life to view the world through the eyes of the divine and uncover the extraordinary in the ordinary. Reflection questions, suggested activities, invitations to journal and create a volume of discovery, and original photographs taken by the author are accompanied by inspirational quotes and passages from scripture. Providing practical guidance for photography as a means of meditation and reflection and a form of prayer, readers will be encouraged to be seekers, open and present, ready to be refreshed, renewed, and delighted.

*The Professor's Guide to Taming Technology* Kathleen P. King, Thomas D. Cox, 2011-01-01 This book is provided as a guide, encouragement and handbook for faculty to introduce digital media in language you can understand and provide strategies and activities you can quickly assimilate into your teaching. We are excited that more people will be able to benefit from the powerful help and guidance contained in this book. We are even more exhilarated as we anticipate how each of you will discover applications and new directions we would never anticipate, and look forward. We look forward to your innovations as you use the material you discover here. This book responds to the needs of our changing world and students by revealing innovative technology applications and how faculty are and can use digital media in teaching in higher education because faculty make the quickest changes and learn how to do it best. It is a valuable resource for faculty from faculty, because it allows the sharing of successful teaching experiences with digital media with our worldwide colleagues so they may modify it, extend it, and improve it. Moreover, in our work with faculty across all disciplines, we also find that many struggle to think about teaching in ways in which they can incorporate technology meaningfully. While we might be experts in our discipline (chemistry, philosophy, music, etc) due to the curriculum of terminal degrees, we might not have strong preparation in instructional design. We have been fortunate to bring together faculty experts across different disciplines to specifically speak about how and why to use digital media in higher education settings. We realize we are asking you to think about your way of teaching with new ideas and strategies. Therefore, we try to illustrate them with clear examples. These different approaches include clear descriptions of what these activities look like, why to develop and implement them, and how to do so for your specific needs.

*The Plugged-In Professor* Sharmila Ferris, Hilary Wilder, 2013-05-15 New technologies are transforming the way students work. The Plugged in Professor provides a timely and exceptional

resource for using social media and other new technologies to help college students meet both general and discipline-specific objectives. The title covers techniques built around well-known social networking technologies, as well as other emerging technologies such as mobile phone and tablet apps. With a practical focus and reader-friendly format, this book shows educators how to apply techniques in each technology, and includes clear student learning objectives, step-by-step directions, observations and advice, and supplemental readings and resources. Twenty-five chapters by leading contributors cover key aspects of new technologies in education, in four parts: Writing, research and information fluency; Communication and collaboration; Critical thinking and creativity; and Integrative learning. Provides a cutting-edge resource for academics and practitioners in effective ways of reaching today's students through the use of their favourite tool, social media Outlines a range of strategies taking advantage of the unique learning styles and habits of net generation learners Exposes students to ways in which these technologies can be used in their professional and personal lives
