Qualitative Methods for Practice Research Jeffrey Longhofer, Jerry Floersch, Janet Hoy, 2013 Qualitative methods have become increasingly popular among researchers, and while many comprehensive textbooks describe the standard techniques and philosophical assumptions, it is often assumed that practitioners are consumers of research and not producers. This innovative book describes how qualitative methods can be used to investigate the in-vivo use of theory in social work practice. It offers not just a comprehensive overview of methods, but a concise, accessible guide focused on how to study and explicate application of theory, and the creative tension that inevitably exists between theory and practice. Theory-to-practice gaps are indispensable conditions for conducting engaged scholarship, which in turn promotes collaboration between researchers and practitioners in addressing practice-related problems in real-world settings. Engaged scholarship and critical realist assumptions are applied to three case studies that combine research questions with data collection techniques and analytic strategies. Thematic, grounded theory, and narrative research techniques are all illustrated, including original quick-start instructions for using ATLAS.ti software. Institutional ethnography is also presented as a method that is particularly useful for social work practice settings. By generating knowledge of practice in open and natural systems, qualitative methods can be used to examine how practice is experienced and how interventions may be understood and transformed. This cutting-edge pocket guide will equip practitioner-scholars with the foundation for conducting research that makes a difference.

some kind of significant change takes place. These moments are crucial to the therapeutic process, and there is increasing interest amongst music therapists in understanding how they come about and whether there are ways of initiating them. The contributors to this groundbreaking book look at methods of micro process analyses used in a variety of music therapy contexts, both clinical and research-based. They outline their methods, which include using video and audio materials, interviewing, and monitoring the client's heart rate, and also give examples of the practical application of microanalysis from their clinical experience, including work with clients who have psychiatric illness, autism and other conditions. This final book of the five-volume Community Oral History Toolkit explains the importance of processing and archiving oral histories and takes the reader through all the steps required for good archiving and for concluding the oral history project so that it is preserved and accessible for future generations. The authors give special attention to record-keeping systems and repositories, and provide several examples from actual projects to ground the information in practical terms. Volume 5 finishes with examples of creative ways community projects have used oral histories, such as performances, exhibitions, celebrations, websites, and more, in order to promote history and engage the community.

Handbook of Qualitative Research Methods in Entrepreneurship Helle Neergaard, John P. Ulhøi, 2007 . . . the *Handbook of Qualitative Research Methods in Entrepreneurship* is an important contribution to the field, and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon. Craig S. Galbraith, *Journal of Enterprising Communities* There is no hiding behind the ramparts of dry scholarship here. The credibility of the theory being spoken of is not the stuff of constructed proofs, but alignments of critical insight and utility. This is where qualitative work can make a difference to the field, and where this book makes its mark. Robin Holt, *International Journal of Entrepreneurial Behaviour and Research* The *Handbook of Qualitative Research Methods in Entrepreneurship* is an unusually solid and multifaceted book on what qualitative methods have done, are doing and will do in entrepreneurship research. Every serious entrepreneurship scholar should read it. It points at the future! Björn Bjerke, University of Kalmar, Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies. For those who try to get away from only quantitative studies in both business practice and academic research, this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic, discourse and narrative approaches. It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions. This domain is not physics. In bringing together such a variety of experts from so many nationalities in this *Handbook*, our Danish colleagues are making entrepreneurship research a realistic global venture. Jan Ulijn, Eindhoven University of Technology, The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches. This book is not simply a handbook of qualitative research methods, though it well achieves this aim, it is also an important contribution towards the field of entrepreneurship research. From the Foreword by Sara Carter This expansive and practical *Handbook* introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in

entrepreneurship. It fills a crucial gap in the literature on entrepreneurship theory, and, just as importantly, illustrates how these principles and techniques can be appropriately and fruitfully employed. The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement. The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies. They achieve this by providing concrete examples of research experiences and tangible how to advice. By clarifying what these research methods entail, how they are currently being used and how they can be evaluated, this Handbook constitutes a comprehensive and highly accessible methodological toolbox. Dealing with both well-accepted qualitative approaches and lesser-known, rarer and more novel approaches to the study of entrepreneurship, this Handbook will be invaluable to those studying, researching and teaching entrepreneurship.
