Dictionary of the Modern Politics of Southeast Asia Joseph Chinyong Liow, 2022-07-21 The past three decades since the end of the Cold War have been a time of remarkable change for Southeast Asia. Long seen as an arena for superpower rivalry, Southeast Asia is increasingly coming into its own by locating itself at the forefront of regional integration initiatives that involve not only the states of the region, but major external powers such as the United States, China, India, Japan, and Australia. Extensively updated and revised in light of these changes and developments, this fifth edition of *Dictionary of the Modern Politics of Southeast Asia* remains indispensable. This new edition starts with profiles of each Southeast Asian country, before providing over 500 alphabetically arranged individual entries, each containing detailed accounts and analyses of major episodes and treaties, political parties and institutions, civil society movements, and regional and international organizations. Biographies of significant political leaders and personalities, both past and present, are also provided. Entries are comprehensively cross-referenced, and an index by country directs readers to all entries concerning a particular country. The Dictionary concludes with an extensive bibliography that serves as a guide to further reading. An essential one-stop reference book, this book is an indispensable tool for all scholars and students of Asian politics and international affairs, and a vital resource for journalists, diplomats, policy makers, and others with an interest in the region.

Two Hamlets in Nam Bo David Lan Pham,2008-05-01 The author was born in 1940 and spent his childhood in two small villages, the paternal and the maternal, in southern Vietnam: Binh Chuan and Tuy An (An Phu). The villages were deeply affected by the powerful political events of the next fifty years. In this memoir (first sentence: I was born as the Japanese Troops were invading northern Vietnam), the author writes of what he saw, heard and knew, providing an invaluable social history of the country. Readers will learn about a people who have endured separation, dictatorship, carnage, persistent suffering and poverty, all the while yearning for independence and prosperity. Included are many stories--some funny, some heartbreaking--that reveal how the Vietnamese people lived, as well as their thoughts on war, on the French, Japanese and Americans, on the Nationalist and Communist governments, and on escape. The result is a heartfelt social painting of the nation.

Politics in Contemporary Vietnam J. London, 2014-05-13 Vietnam's political development has entered an extraordinary, if indeterminate, phase. Comprising contributions from leading Vietnam scholars, this volume comprehensively explores the core aspects of Vietnam's politics, providing a cutting-edge analysis of politics in one of East Asia's least understood countries.

Information Retrieval Technology Pu-Jen Cheng, Min-Yen Kan, Wai Lam, Preslav Nakov, 2010-12-06 The Asia Information Retrieval Societies Conference (AIRS) 2010 was the sixth conference in the AIRS series, aiming to bring together international researchers and developers to exchange new ideas and the latest results in information retrieval. The scope of the conference encompassed the theory and practice of all aspects of information retrieval in text, audio, image, video, and multimedia data. AIRS 2010 continued the conference series that grew from the Information Retrieval with Asian Languages (IRAL) workshop series, started in 1996. It has become a mature venue for information retrieval work, finding support from the ACM Special Interest Group on Information Retrieval (SIGIR); the Association for Computational Linguistics and Chinese Language Processing (ACLCLP); ROCLING; and the Information Processing Society of Japan, Special Interest Group on Information Fundamentals and Access Technologies (IPSJ SIG-IFAT). This year saw a sharp rise in the number of submissions over the previous year. A total of 120 papers were submitted, representing work by academics and practitioners not only from Asia, but also from Australia, Europe, North America, etc. The high quality of the work made it difficult for the dedicated program committee to decide which papers to feature at the conference. Through a double-blind reviewing process, 26 submissions (21%) were accepted as full oral papers and 31 (25%) were accepted as short posters. The success of this conference was only possible with the support of all of the authors who submitted papers for review, the program committee members who constructively assessed the submissions, and the registered conference delegates. We thank them for their support of

this conference, and for their long-term support of this Asian-centric venue for IR research and development.
