Hubbell's Hog Heaven and Liz's Happy Hens: a Farm Tour Elizabeth Cannon, 2013-07-08 Contented pigs with no smell and no flies! Happy chickens protected from mongoose and heavy tropical rains. Animal feed crops and trees being grown on broken pahoehoe lava rock. All this on a one and a half acre suburban setting, thanks to the cultivation of indigenous micro-organisms (IMO). Going beyond basic organic farming methods, Liz and Mike walk you through their productive little farm in Pahoehoe, Hawaii, where they practice Korean Natural Farming as taught by Master Cho. Hubbell's Hog Heaven is home of the first Natural Farmed pig litter in Hawaii and the entire USA! ***** Here's a book review by Sonia Martinez, cookbook author and freelance food writer for several publications in Hawaii, including the Hawaii Homegrown Food Network, Ke Ola Magazine, & The Hamakua Times of Honoka'a. She has her own food & garden blog at Sonia Tastes Hawaii. ***** Hubbell's Hog Heaven & Liz's Happy Hens: A Farm Tour by Elizabeth Cannon is a book about an innovative one-and-a-half acre Natural Farming project near Pahoehoe, Puna on Hawai'i Island. Liz and her husband Mike Hubbell had farmed organically on the mainland for over 30 years. But when they retired to Puna six years ago they decided to farm their mostly lava-covered land using Dr. Cho's Korean Natural Farming Method. They attended several Natural Farming presentations and even took a trip to Korea to experience well-established Natural Farming methods first-hand. This gives an idea of how serious they have been about their project. In this primer, Liz covers the basics of Natural Farming with indigenous micro-organisms (IMO's), relates the fundamentals of building a piggery, introduces their experience raising and caring for several litters of pigs, describes their inventive and successful method for raising chickens and eggs, and talks about their long-term sustainability goals. Liz's writing style uses plain down-to-earth language, so that even people who don't farm (or are chemistry majors) can understand and enjoy the read. She includes in entertaining detail how she and Mike started the whole project, what worked and what had to be rethought, as well as their plans for the near future. Particularly interesting were how they built their piggery and Mike's idea for what has been coined 'the Hubbell Bubble', their innovative chicken house. Liz's Happy Hens produce dozens and dozens of eggs, and the chicken project was photographed and explained from start to finish in great detail, making it easy to follow the process. You can read about the excitement of their first litter of pigs (which by the way was the first litter of pigs born by the Korean Natural Farming method in the United States), and also what they plant in their little farm as food for both their livestock and themselves. The farm has been visited by many school groups and people interested in natural and organic farming methods.

Tropical Organic Gardening ~ Hawaiian Style Richard L. Stevens, 2001-09 Anyone who wants to grow a garden organically in a tropical climate will find Tropical Organic Gardening-Hawaiian Style an invaluable resource. Growing practices in Old Hawaii are discussed, giving insight into life in a pre-chemical world and placing organic gardening in historical perspective. Basic principles of organic gardening have been modified for tropical conditions and resources. Following an introduction to building a healthy soil, readers are given tools for natural pest control, companion plants, and organic fertilizers. Nutritional information and growing tips for popular fruits, vegetables and herbs are included. Remedies for nutrient and insect problems are conveniently listed in separate tables. The environmental impact of chemical farming is also addressed.

The Living Soil Handbook Jesse Frost, 2021-07-20 Principles and farm-tested practices for no-till market gardening--for healthier, more productive soil! From the host of the popular The No-Till Market Garden

Podcast—heard around the world with nearly one million downloads! Discovering how to meet the soil’s needs is the key task for every market gardener. In this comprehensive guide, Farmer Jesse Frost shares all he has learned through experience and experimentation with no-till practices on his home farm in Kentucky and from interviews and visits with highly successful market gardeners in his role as host of The No-Till Market Garden Podcast. The Living Soil Handbook is centered around the three basic principles of no-till market gardening: Disturb the soil as little as possible Keep it covered as much as possible Keep it planted as much as possible. Farmer Jesse then guides readers in applying those principles to their own garden environment, with their own materials, to meet their own goals. Beginning with an exploration of the importance of photosynthesis to living soil, Jesse provides in-depth information on: Turning over beds Using compost and mulch Path management Incorporating biology, maintaining fertility Cover cropping Diversifying plantings through intercropping Production methods for seven major crops Throughout, the book emphasizes practical information on all the best tools and practices for growers who want to build their livelihood around maximizing the health of their soil. Farmer Jesse reminds growers that “as possible” is the mantra for protecting the living soil: disturb the soil as little as you possibly can in your context. He does not believe that growers should anguish over what does and does not qualify as “no-till.” If you are using a tool to promote soil life and biology, that’s the goal. Jesse’s goal with The Living Soil Handbook is to provide a comprehensive set of options, materials, and field-tested practices to inspire growers to design a soil-nurturing no-till system in their unique garden or farm ecosystem. [A] practical, informative debut. . . .Gardeners interested in sustainable agriculture will find this a great place to start.—Publishers Weekly Frost offers a comprehensive, science-based, sympathetic, wholly practical guide to soil building, that most critical factor in vegetable gardening for market growers and home gardeners alike. A gift to any vegetable plot that will keep on giving.—Booklist (starred review)

Thinking Like an Island Jennifer Chirico,Gregory S. Farley,2015-04-30 Hawaii is a rare and special place, in which beauty and isolation combine to form a vision of paradise. That isolation, though, comes at a price: resources in modern-day Hawaii are strained and expensive, and current economic models dictate that the Hawaiian Islands are reliant upon imported food, fuels, and other materials. Yet the islands supported a historic Hawaiian

population of a million people or more. This was possible because Hawaiians, prior to European contact, had learned the ecological limits of their islands and how to live sustainably within them. Today, Hawaii is experiencing a surge of new strategies that make living in the islands more ecologically, economically, and socially resilient. A vibrant native agriculture movement helps feed Hawaiians with traditional foods, and employs local farmers using traditional methods; efforts at green homebuilding help provide healthy, comfortable housing that exists in better harmony with the environment; efforts to recycle wastewater help reduce stress on fragile freshwater resources; school gardens help feed families and reconnect them with local food and farming. At the same time, many of the people who have developed these strategies find that their processes reflect, and in some cases draw from, the lessons learned by Hawaiians over thousands of years. This collection of case studies is a road map to help other isolated communities, island and mainland, navigate their own paths to sustainability, and establishes Hawaii as a model from which other communities can draw inspiration, practical advice, and hope for the future.
