The Lost Art of Reading Nature's Signs Tristan Gooley,2015-07-31 Turn Every Walk into a Game of Detection When writer and navigator Tristan Gooley journeys outside, he sees a natural world filled with clues. The roots of a tree indicate the sun's direction; the Big Dipper tells the time; a passing butterfly hints at the weather; a sand dune reveals prevailing wind; the scent of cinnamon suggests altitude; a budding flower points south. To help you understand nature as he does, Gooley shares more than 850 tips for forecasting, tracking, and more, gathered from decades spent walking the landscape around his home and around the world. Whether you're walking in the country or city, along a coastline, or by night, this is the ultimate resource on what the land, sun, moon, stars, plants, animals, and clouds can reveal—if you only know how to look!

Managing Visitor Experiences in Nature-based Tourism Julia N. Albrecht,2021-03-19 This book focuses on the experiences of tourists visiting nature-based destinations, exploring current knowledge and providing insights into conceptual issues through the use of empirical evidence from five continents. Presented as three topics, the contents discuss tourism and naturebased experiences by looking at the role and relevance of nature and the uniqueness of such experiences. The book identifies visitor management challenges and provides explanations for the solutions reached. The final section takes a more overarching destination management perspective that transcends the tourism product or business level and focuses on destination and generic issues like indicators or

marketing implications. The book also includes research-based case studies which contribute to an overall understanding of the core issues involved in managing visitor experiences in nature-based tourism.

Nature First Bob Henderson, Nils Vikander, 2007-07-31 Nature First combines the Scandinavian approach to creating a relationship with nature (known as friluftsliv) with efforts by Canadian and international educators to adapt this wisdom and apply it to everyday life experiences in the open air. The word friluftsliv literally refers to free-air life or outdoor life. A word saturated with values, the concept can permeate deeply and playfully into one's cultural being and personal psyche, thus influencing the way one perceives and interacts with nature on a daily basis. For centuries, the North American approach has been one of domination and bringing nature under control, in many cases abusing our natural environment in the process. The friluftsliv way of being on talking terms with nature, developing an insider's relationship with nature, offers the rich potential of allowing us as cohabiters on the Earth to recreate, rejuvenate and restore the balance among all living things. Nature First is the first English-language anthology to bring together the perspectives and experiences of North American, Norwegian, Swedish and other international outdoor writers, all friluftsliv thinkers and doers. Here, the thirty contributors' use of history, sociology, psychology, philosophy and outdoor education writings blend to provide an understanding of how friluftsliv applies to everyday life. The book presents an alternative to much of the personal growth/adventure-based literature that tends to dominate our current approach to the outdoor activity. Folklore, heritage, adventure travel, crafts, place-based education and the daily outings of families all have a role to play in promoting an understanding of both the ordinary and the mystical importance of this Nordic tradition. Dedicated to parents, travel guides, educators and generally to participants in the outdoors, Nature First provides a compellingly fresh approach to life in the out-of-doors.
