Living With God Aravind Balasubramanya, 2015-11-26 Calling Sri Sathya Sai Baba a philanthropist and social reformer would be akin to calling Lord Jesus a shepherd and Bhagawan Krishna a cowherd! One definitely cannot turn a blind eye to His magnificent work – tertiary healthcare systems, water projects, housing projects, and educational university, which are first-of-a-kind in world history. He has also inspired service activities around the globe with a footprint in over one hundred and fifty countries. He is definitely a social reformer, but He is also much more. His greatest work is the transformation of the heart, which He has effected through pure, selfless love. Once the source and nature of this Love is understood, one cannot help but call Him divine, adding the prefix ‘Bhagawan’ to His name. This book details the life experiences of eighteen students and teachers of Bhagawan’s educational system, which ranges from ‘KG to PG’ (kindergarten to post-graduation). This is just a sample of those that have received ‘Higher’ learning from their Swami – a learning for life. But, this sample will give us a glimpse into what Bhagawan Sri Sathya Sai Baba stands for and what He exhorts. It will make it amply clear that it is never too early, or too late to embark on the greatest quest of life – Educare.

Mn Manganese, 2013-06-29 The present volume, Manganese D 5, continues the description of the manganese complexes. The arrangement of the complexes in these D volumes is based on the ligand type. The introduction, on p. 1, shows the classes of complexes, which have already been described in Chapters 1 to 21 in the Volumes D 1 (1979), D 2 (1980), D 3 (1982), and D 4 (1985). In Chapters 22 to 29 of this volume are treated complexes with amine-N-polycarboxylic acids, hydrazinecarboxylic acids, amides, hydrazides, derivatives of hydroxylamine (e.g., hydroxamic acids), oximes and nitroso compounds, azo compounds, and triazenes. A survey at the beginning of each of these sections gives information on the most characteristic features of the various complex types. Because of the complexometric relevance of the complexes with amine-N-polycarboxylic acids, there are many studies concerning the existence and the stability of the complexes in solution. Numerous X-ray investigations, reported for the complexes with urea or with amides and hydrazides of carboxylic acids, show the different structures of the compounds as a result of the varying bonding sites of the ligands. Complexes with hydrazides (e.g., with isonicotino hydrazide) are of special interest, due to their biological activity. Complexes with hydroxamic acids, oximes or azo compounds have been studied mostly in aqueous organic or pure organic solvents. The characteristic intense colors of many solutions are used for the analytical determination of manganese.

The Judiciary I Served Pingle Jaganmohan Reddy, 1999 The Judiciary I Served is an account of an eminent jurist’s long and distinguished career in law from his early days as a barrister to his retirement from the Supreme Court of India. An absorbing aspect of this book is the detail of how repeated challenges, minor and major were thrown down at both state and central level, and how upright judges needed to struggle against such pressures in order to uphold the proper functioning of the law.

Temporality, Space and Place in Education and Youth Research Julie McLeod, Kate O’Connor, Nicole Davis, Amy McKernan, 2023-06-29 This book explores the everyday ways in which time marks the experience of education as well as the concerns and methods of education and youth research. It asks: what do we notice afresh and what comes into sharper view when temporality becomes a focal point? What theories and ways of seeing offer new angles onto temporality in interaction with space and place? In responding to these questions, the book engages with approaches from sociology, history, and cultural and policy studies. It brings critical attention to the movement and layers of time in the memories, aspirations and orientations of educational actors – across lives, generations and diverse places. Informed by the politics of local/global relations and new transnational formations, the chapters feature case studies located in Australia, the UK, India, South Africa, the Philippines and Finland. Topics examined include processes of social and educational differentiation in disruptive times, affective practices, intergenerational dynamics, collective memory, archiving, mobilities and migration, school spaces and difficult histories. The authors grapple with what is involved methodologically in interrogating the times and places of education – including the construction of educational ideas, problems and policy solutions – and in historicising the time and places from which we research, write and work.
