Shadow Network Anne Nelson,2019-10-29 “Reveals a political trend that threatens both our form of government and our species.” - Timothy Snyder, author of ON TYRANNY Riveting.... Want to understand how so many Americans turned against truth? Read this book. Nancy Maclean, author of DEMOCRACY IN CHAINS In 1981, emboldened by Ronald Reagan's election, a group of some fifty Republican operatives, evangelicals, oil barons, and gun lobbyists met in a Washington suburb to coordinate their attack on civil liberties and the social safety net. These men and women called their coalition the Council for National Policy. Over four decades, this elite club has become a strategic nerve center for channeling money and mobilizing votes behind the scenes. Its secretive membership rolls represent a high-powered roster of fundamentalists, oligarchs, and their allies, from Oliver North, Ed Meese, and Tim LaHaye in the Council's early days to Kellyanne Conway, Ralph Reed, Tony Perkins, and the DeVos and Mercer families today. In Shadow Network, award-winning author and media analyst Anne Nelson chronicles this astonishing history and illuminates the coalition's key figures and their tactics. She traces how the collapse of American local journalism laid the foundation for the Council for National Policy's information war and listens in on the hardline broadcasting its members control. And she reveals how the group has collaborated with the Koch brothers to outfit Radical Right organizations with state-of-the-art apps and a shared pool of captured voter data - outmaneuvering the Democratic Party in a digital arms race whose result has yet to be decided. In a time of stark and growing threats to our most valued institutions and democratic freedoms, Shadow Network is essential reading.

Media Primitivism Delinda Collier,2020-09-18 In Media Primitivism Delinda Collier provides a sweeping new understanding of technological media in African art, rethinking the assumptions that have conceptualized African art as unmediated, primary, and natural. Collier responds to these preoccupations by exploring African artworks that challenge these narratives. From one of the first works of electronic music, Halim El-Dabh’s Ta’abir Al-Zaar (1944), and Souleymane Cissé's 1987 film, Yeelen, to contemporary digital art, Collier argues that African media must be understood in relation to other modes of transfer and transmutation that have significant colonial and postcolonial histories, such as extractive mining and electricity. Collier reorients modern African art within a larger constellation of philosophies of aesthetics and technology, demonstrating how pivotal artworks transcend the distinctions between the constructed and the elemental, thereby expanding ideas about mediation and about what African art can do.

The Attention Economy and How Media Works Karen Nelson-Field,2020-01-04 This book offers a considered voice on the advertising chaos that colours our rapidly changing media environment in a world of fake news, fast facts and seriously depleted attention stamina. Rather than simply herald disruption, Karen Nelson-Field starts an intelligent conversation on what it will take for businesses to win in an attention economy, the advertising myths we need to leave behind and the scientific evidence we can use to navigate a complex advertising and media ecosystem. This book makes sense of viewability standards, coverage and clutter; it talks about the real quality behind a qCPM and takes a deep dive into the relationship between attention and sales. It explains the stark reality of human attention processing in advertising. Readers will learn how to maximise a viewer’s divided attention by leveraging specific media attributes and using attention-grabbing creative triggers. Nelson-Field asks you to pay attention to a disrupted advertising future without panic, but rather with a keen eye on the things that brand owners can learn to control.

Serial Murder and Media Circuses Dirk C. Gibson,2006-07-30 The Axman of New Orleans specialized in killing grocers of Italian descent in the 1910s, apparently to promote jazz music. Dorothea Puente was a little old landlady who murdered her tenants, but kept cashing their government checks. The Manson Family terrorized California in the 1960s, as did the Hillside Stranglers a decade later. Twelve serial murder cases, occurring in eight decades between the 1890s and 1990s, had one thing in common: significant presence of the mass media. This book examines these specific cases of serial murder, and the way the media became involved in the investigations and trials of each. Gibson argues that the American media plays a multidimensional and integral role in serial killings and their investigation—and that this role is not generally a positive one. Serial murder cases motivate the media in unfortunate ways, and the result is that even typically respectable media organizations can be involved in such things as document theft, or in interfering with the capture of serial murderers on the run. This link between multiple murderers and mass communication is not accidental or coincidental; rather, the relationship between the press and serial killers is one of extraordinary importance to both parties. Gibson examines the role of the media in serial murder cases; the body of knowledge on serial murder as seen through the lens of mass communication; the effectiveness of law enforcement responses to serial murderers and how they might be improved if the mass communication influence was better understood; the magnitude of the serial murder problem; and the interaction between the media, the killers, and serial murder investigations. Specific examples and numerous quotes are provided throughout to illustrate this strange and detrimental relationship between media and serial murderers.

Social Media and Morality Lisa S. Nelson,2018-06-21 This book explains the mediating effects of social media on our morality.

Media Theory and Cultural Technologies Maria Teresa Cruz,2017-05-11 In recent decades, media theory has become one of the most influential trends in contemporary thinking, namely within cultural studies, the arts and humanities. Spreading mostly from the German scholarly scene, under the influence of post-structuralism, media theory has developed as a fundamental theoretical framework, for many fields of theoretical and applied research, through authors such as the late Friedrich Kittler, 1943-2011. Commenting on several aspects of Kittler’s work, and on its impact in different fields of art and culture, this essay collection examines recent developments in media theory brought about by concepts such as “cultural techniques” and “operative ontologies” and by key authors, contributing to this volume, such as Bernhard Siegert, Sybille Krämer and Peter Weibel.

The Disabled, the Media, and the Information Age Jack Nelson,1994-06-14 How have disabled Americans been portrayed by the media through the years and how are images and the role of the handicapped changing? Jack Nelson and a series of experts in communication and the disabled offer an easy-to-read overview of key issues, continuing problems, new opportunities, and new technological tools. Professionals and teachers in communication, along with experts and general readers interested in public policy and social issues, will find this short study, with its illustrations, descriptions and lists of organizations and its bibliographical materials, a handy reference.

Social Media and Morality Lisa S. Nelson,2018-05-31 Is social media changing who we are? We assume social media is only a tool for our modern day communications and interactions, but is it quietly changing our identities and how we see the world and one another? Our current debate about the human behaviors behind social media misses the important effects these social networking technologies are having on our sense of shared morality and rationality. There has been much concern about the loss of privacy and anonymity in the Information Age, but little attention has been paid to the consequences and effects of social media and the behavior they engender on the Internet. In order to understand how social media influences our morality, Lisa S. Nelson suggests a new methodological approach to social media and its effect on society. Instead of

beginning with the assumption that we control our use of social media, this book considers how the phenomenological effects of social media influences our actions, decisions, and, ultimately, who we are and who we become. This important study will inform a new direction in policy and legal regulation for these increasingly important technologies.

Creating Consent of the Governed Stephanie Greco Larson,1992 What would happen if local media provided information that elected representatives did not control that focused on political issues? This is the

question that Stephanie Greco Larson asks--and answers--in Creating Consent of the Governed. Larson explores the role of the news media in contemporary American politics, specifically, the effect of the media on voters' evaluations of elected representatives. Larson also asks whether the press or the public is responsible for society's present inattention to issues. Larson's book is a case study of the way constituents reacted to local media coverage of Democrat Bill Nelson, representative of a congressional district in east-central Florida. The book examines the relationship between Nelson, his local press, and his constituents in order to understand the media's role in representation. Having conducted what she terms a social experiment, Larson presents the results of a panel survey of voters that measured what voters knew about Nelson and how supportive they were of him. She highlights a number of factors of growing importance in the field of political communication. For instance, How do the media affect audience perceptions? What information will change voters' attitudes? How does personality affect the popularity of a representative? Does good or bad news have a greater effect on voters? Larson concludes that the media can educate voters, but because voters often do not use the information to evaluate their legislators, the media do not facilitate issue representation.

Summary of Anne Nelson's Shadow Network Everest Media,2022-03-27T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 Protestant fundamentalism has dominated American society for the past two centuries, and it has been mobilized in the modern era. #2 The 1960s was a transformative decade for the South, as the region was exposed to existential crisis for the first time. The Bible was under scrutiny, and theologians suggested that the Good Book was a profound work of literature rather than a chronicle of historical fact. #3 The Southern Baptist Convention remained apart from other Protestant denominations during the war, and in 1962 the Supreme Court ended public school prayer. The fundamentalists were outraged. #4 The 1960s saw a shift in the way the Baptist Church viewed its beliefs. While many conservatives were simply fed up with the liberal changes their church was undergoing, others saw it as a way to get power and push their conservative views.
