*Managing Networks of Twenty-First Century Organisations* P. Perri, N. Goodwin, E. Peck, T. Freeman, 2016-01-14 The book presents a novel theory of how networks of organizations work, what varieties are possible and how their strengths and weaknesses differ. The argument is illustrated using four case studies in which networks of firms and organizations in defence contracting, biotechnology, health care and combating crime and disorder are examined. The book will be of major interest to scholars and students of business and management, public management, public policy, organizational sociology and to practising managers.

**Divine Programming** Charlotte E. Howell, 2020-04 From the mid-90s to the present, television drama with religious content has come to reflect the growing cultural divide between white middle-America and concentrated urban elites. As author Charlotte E. Howell argues in this book, by 2016, television narratives of white Christianity had become entirely disconnected from the religion they were meant to represent. Programming labeled 'family-friendly' became a euphemism for white, middlebrow America, and developing audience niches became increasingly significant to serial dramatic television. Utilizing original case studies and interviews, Divine Programming investigates the development, writing, producing, marketing, and positioning of key series including 7th Heaven, Friday Night Lights, Rectify, Supernatural, Jane the Virgin, Daredevil, and Preacher. As this book shows, there has historically been a deep ambivalence among television production cultures regarding religion and Christianity more specifically. It illustrates how middle-American television audiences lost significance within the Hollywood television industry and how this in turn has informed and continues to inform television programming on a larger scale. In recent years, upscale audience niches have aligned with the perceived tastes of affluent, educated, multicultural, and-importantly-secular elites. As a result, the televised representation of white Christianity had to be othered, and shifted into the unreality of fantastic genres to appeal to niche audiences. To examine this effect, Howell looks at religious representation through four approaches - establishment, distancing, displacement, and use - and looks at series across a variety of genres and outlets in order to provide varied analyses of each theme.

**The Oxford Handbook of Social Networks** Ryan Light, James Moody, 2020-12-04 Social networks fundamentally shape our lives. Networks channel the ways that information, emotions, and diseases flow through populations. Networks reflect differences in power and status in settings ranging from small peer groups to international relations across the globe. Network tools even provide insights into the ways that concepts, ideas and other socially generated contents shape culture and meaning. As such, the rich and diverse field of social network analysis has emerged as a central tool across the social sciences. This Handbook provides an overview of the theory, methods, and substantive contributions of this field. The thirty-three chapters move through the basics of social network analysis aimed at those seeking an introduction to advanced and novel approaches to modeling social networks statistically. The Handbook includes chapters on data collection and visualization, theoretical innovations, links between networks and computational social science, and how social network analysis has contributed substantively across numerous fields. As networks are everywhere in social life, the field is inherently interdisciplinary and this Handbook includes contributions from leading scholars in sociology, archaeology, economics, statistics, and information science among others--

*ABC Family to Freeform TV* Emily L. Newman, Emily Witsell, 2018-02-16 Launched in 1977 by the Christian Broadcasting Service (originally associated with Pat Robertson), the ABC Family/Freeform network has gone through a number of changes in name and ownership. Over the past decade, the network--now owned by Disney--has redefined family programming for its targeted 14- to 34-year-old demographic, addressing topics like lesbian and gay parenting, postfeminism and changing perceptions of women, the issue of race in the U.S., and the status of disability in American culture. This collection of new essays examines the network from a variety of perspectives, with a focus on inclusive programming that has created a space for underrepresented communities like transgender youth, overweight teens, and the deaf.

**Transnational Ukraine?** Timm Beichelt, Susann Worschech, 2016-12-13 The Euromaidan protests showed Ukraine to be a state between East and West European paths. Ukraine's search for an identity and future is deeply rooted in historical fractures, which indicate its longstanding ties beyond its borders. In this volume, distinguished scholars provide empirical analysis and theoretical reflections on Ukraine's transnational embeddedness, which surfaced with an unexpected intensity in the recent political conflict. The essays have subjects including the role of international media and of diaspora communities in Euromaidan's aftermath, the transnational roots of memory and the search for collective identity, and transnational linkages of elites within Ukrainian political and economic regimes. The anthology demonstrates the theoretical and analytical value of the concept of transnationalism for studying the ambivalent processes of post-Soviet modernization.

**Gigabit News** Information Gatekeepers, Inc,

**The Television Studies Reader** Robert Clyde Allen, Annette Hill, 2004 A discussion of a truly international range of television programs, this title covers alternative modes of television such as digital and satellite.

**The Emerging Network** Michael York, 1995 The 1980s saw the emergence of New Age and neo-paganism as major new religious movements. In the first book-length study of these movements, Michael York describes their rituals and beliefs and examines the similarities, differences and relationships between them. He profiles particular groups, including the Church Universal Triumphant, Nordic pagans, and the Covenant of Unitarian Pagans, and questions the adequacy of existing sociological categories for describing these largely amorphous phenomena.

**Polymeric Liquids & Networks** William W. Graessley, 2003-11-20 Polymeric Liquids and Networks: Structure and Properties is the first book of two by William W. Graessley that presents a unified view of flexible-chain polymer liquids and networks. The topics of both volumes range from equilibrium properties to dynamic response, finite deformation behavior and non-Newtonian flow. The second book will be titled Polymeric Liquids and Networks: Dynamics and Rheology. These various aspects of the field were developed over the past 70 years by researchers from many academic disciplines. The infusion of fresh viewpoints continually invigorated and enriched the field, making polymeric liquids and networks a truly interdisciplinary subject. The lack of a common terminology and perspective, however, has led to compartmentalization, making it difficult for a

newcomer, even one technically trained, to gain a broad appreciation of the field and to see the relationships among its various parts. The aim of these two books, without diluting the substance, is to achieve a desired unity. *Polymeric Liquids and Networks* emphasizes fundamental principles and a molecular viewpoint. The conceptual basis of theories underlying each topical area is explained with derivations sometimes outlined briefly and sometimes given in detail. Technical terminology is kept to a minimum necessary for coherent presentation. The goal of the text is to provide an informed understanding rather than detailed technical proficiency. Theory, experiment, and simulation are woven together as appropriate for achieving a balanced view. The books are designed to serve academic and industrial needs, consolidating the understanding of topics with both practical and fundamental significance, and written from a technical but non-specialized perspective. The books deal mainly with non-polar and weakly polar species and largely with results derived from experiments on structurally well-defined systems. The objective is not to ignore

***Business-State Relations in Brazil*** Mahrukh Doctor, 2016-12-19 In recent years, the spotlight of international attention on Brazil has often been in the area of logistics infrastructure—for example, on its capacity to deal with the high demand expected during the World Cup and the Olympics. However, neither competitiveness nor infrastructure concerns are new for Brazil. In the 1990s, Brazilian policy-makers adopted a series of liberalizing economic reforms that exposed the poor condition of logistics infrastructure and inadequate investment in Brazilian ports, roads, railways and airports. Over twenty years later, the implications of those reforms still colour Brazil's prospects for development. Mahrukh Doctor's book evaluates the political economy of reform in Brazil and the difficulty of implementing institutional modernization in the context of opposition from vested interests originating in the state and civil society. It focuses specifically on the Port Modernization Law, which aimed to augment the country's competitiveness by creating efficient and low cost ports. Based on primary research carried out over a period of twenty years using original qualitative data, Doctor's analysis focuses on the difficulties in implementing this law and how those difficulties are symptomatic of the wider issues associated with lack of sufficient investment in infrastructure in Brazil. Using the case of the business lobby for port reform, the book examines the evolving nature of business-state relations and the process of institutional change in Brazil. Doctor particularly examines the building of consensus for reform and policy formulation in the port sector and the challenges of reform implementation and institutional modernisation. The analysis provides extensive insights and lessons related to the prospects for boosting competitiveness of Brazilian ports. The book concludes by suggesting a likely path for the evolution of corporatist institutions as well as the provision of adequate logistics infrastructure to support business success in Brazil. A unique work on the subject of port reform in Latin America that uses a hybrid analytical framework to understand reform in Brazil, this book is pertinent for a variety of subjects from Latin American Studies to political economy to economic-policy making.

***The Blackwell Companion to Sociology*** Judith R Blau, 2008-04-15 The Blackwell Companion to Sociology is a milestone collection of new essays by renowned sociologists, covering both the traditions and strengths of the field as well as newer developments and directions. Authors from the US, the UK, Europe and elsewhere have contributed to this all-in-one reference work, highlighting the relevance of interdisciplinary and international perspectives, while at the same time representing the scope and quality of sociology in its current form.

***The Oxford Handbook of Archaeological Network Research*** Tom Brughmans, Barbara J. Mills, Jessica Munson, Matthew A. Peeples, 2023-11-23 Network research has recently been adopted as one of the tools of the trade in archaeology, used to study a wide range of topics: interactions between island communities, movements through urban spaces, visibility in past landscapes, material culture similarity, exchange, and much more. This Handbook is the first authoritative reference work for archaeological network research, featuring current topical trends and covering the archaeological application of network methods and theories. This is elaborately demonstrated through substantive topics and case studies drawn from a breadth of periods and cultures in world archaeology. It highlights and further develops the unique contributions made by archaeological research to network science, especially concerning the development of spatial and material culture network methods and approaches to studying long-term network change. This is the go-to resource for students and scholars wishing to explore how network science can be applied in archaeology through an up-to-date overview of the field.

***Cultural Moves*** Herman Gray, 2005-02-14 Examines the importance of culture in the push for black political power and social recognition and argues the key black cultural practices have been notable in reconfiguring the shape and texture of social and cultural life in the U.S. Drawing on examples from jazz, television, and academia, Gray highlights cultural strategies for inclusion in the dominant culture as well as cultural tactics that move beyond the quest for mere recognition by challenging, disrupting, and unsettling dominant cultural representations and institutions. In the end, Gray challenges the conventional wisdom about the centrality of representation and politics in black cultural production--Provided by publisher.

***The Service-Dominant Logic of Marketing*** Robert F. Lusch, Stephen L. Vargo, 2014-12-18 Expanding on the editors' award-winning article *Evolving to a New Dominant Logic for Marketing*, this book presents a challenging new paradigm for the marketing discipline. This new paradigm is service-oriented, customer-oriented, relationship-focused, and knowledge-based, and places marketing, once viewed as a support function, central to overall business strategy. Service-dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision, rather than the exchange of goods, as the proper subject of marketing. It moves the orientation of marketing from a market to philosophy where customers are promoted to, targeted, and captured, to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process. The editors elaborate on this model through an historical analysis, clarification, and extension of service-dominant logic, and distinguished marketing thinkers then provide further insight and commentary. The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice.

***Global Education Inc.*** Stephen J. Ball, 2012-03 Leadership, school choice and accountability are being retailed by western 'knowledge companies' and consultants across the globe. This book argues that these new forms of policy and policy-making require new concepts and methods of policy analysis, with chapters including: Networks, Neo-liberalism and Policy Mobilities New' Philanthropy, Social Capitalism and Education Policy Policy as Profit: Selling and Exporting Policy Money, Meaning and Policy Connections Global Education Inc. is a crucial book that will be of great interest to students of social and education policy and social and education policy analysts and researchers.

***Miami Vice*** James Lyons, 2009-12-15 Miami Vice captures the glitter and glamour embodied by Crockett and Tubbs and offers students an anatomy of a ground-breaking work in the police procedural genre. Explores Miami Vice's combination of disparate influences (MTV, film noir, soap opera, 'high concept' action films) as well as the social, cultural and industrial moments when it burst onto the network Introduces readers to major components of televisual analysis--style, storytelling, the television show as commodity and ideological critique-- that illustrate the show's unique features Provides a model for students' own assessment of other shows, and confirms precisely how--and on what terms--Miami Vice redefined the police drama and an era
