Vision Impact! Workbook Bernard Haynes,2017-03-08 The purpose of the Vision Impact! Interactive Workbook is to encourage, equip and empower you to create a written vision plan for the life God purposed for you. If you are serious about living your vision then the practical instruction and insight found within this workbook will help you realize, write out and implement a vision plan that will take your life and those connected to you to a new dimension. I am not promising a magical formula that if you read this workbook and answer each question in detail that your vision will come to pass without any struggles. Just know that to walk in your vision you must make sacrifices, overcome obstacles, face opposition and work your plan. Because you cannot afford to spend the next year, or the next five, ten or twenty years, talking and thinking about what should've, could've or would've been.

*Interactive Collaborative Robotics* Andrey Ronzhin,Gerhard Rigoll,Roman Meshcheryakov,2021-09-23 This book constitutes the proceedings of the 6th International Conference on Interactive Collaborative Robotics, ICR 2021, held in St. Petersburg, Russia, in October 2021. The 19 papers presented were carefully reviewed and selected from 40 submissions. Challenges of human-robot interaction, robot control and behavior in social robotics and collaborative robotics, as well as applied robotic and cyber-physical systems are mainly discussed in the papers.

*Interactive Granular Computations in Networks and Systems Engineering: A Practical Perspective* Andrzej Jankowski,2017-06-25 The book outlines selected projects conducted under the supervision of the author. Moreover, it discusses significant relations between Interactive Granular Computing (IGrC) and numerous dynamically developing scientific domains worldwide, along with features characteristic of the author's approach to IGrC. The results presented are a continuation and elaboration of various aspects of Wisdom Technology, initiated and developed in cooperation with Professor Andrzej Skowron. Based on the empirical findings from these projects, the author explores the following areas: (a) understanding the causes of the theory and practice gap problem (TPGP) in complex systems engineering (CSE); (b) generalizing computing models of complex adaptive systems (CAS) (in particular, natural computing models) by constructing an interactive granular computing (IGrC) model of networks of interrelated interacting complex granules (c-granules), belonging to a single agent and/or to a group of agents; (c) developing methodologies based on the IGrC model to minimize the negative consequences of the TPGP. The book introduces approaches to the above issues, using the proposed IGrC model. In particular, the IGrC model refers to the key mechanisms used to control the processes related to the implementation of CSE projects. One of the main aims was to develop a mechanism of IGrC control over computations that model a project's implementation processes to maximize the chances of its success, while at the same time minimizing the emerging risks. In this regard, the IGrC control is usually performed by means of properly selected and enforced (among project participants) project principles. These principles constitute examples of c-granules, expressed by complex vague concepts (represented by c-granules too). The c-granules evolve with time (in particular, the meaning of the concepts is also subject of change). This methodology is illustrated using project principles applied by the author during the implementation of the POLTAX, AlgoTradix, Merix, and Excavio projects outlined in the book.

The Portable MBA in Entrepreneurship Case Studies William D. Bygrave,Dan D'Heilly,1997-06-23 Der Traum vom eigenen Unternehmen - wie kann man ihn verwirklichen? Anhand zahlreicher Fallstudien zeigt dieses Lehrbuch, wie man Anfangsschwierigkeiten meistert, ein Geschäftskonzept entwickelt und den Geschäftsverlauf analysiert.

Information Visualization Colin Ware,2013 This is a book about what the science of perception can tell us about visualization. There is a gold mine of information about how we see to be found in more than a century of work by vision researchers. The purpose of this book is to extract from that large body of research literature those design principles that apply to displaying information effectively--
