The New Landscape of Mobile Learning Charles Miller, Aaron

Doering, 2014-02-24 The New Landscape of Mobile Learning is the first book to provide a research based overview of the largely untapped array of potential tools that m-Learning offers educators and students in face-to-face, hybrid, and distance education. This cutting edge guide provides: • An essential explanation of the emergence and role of Apps in education • Design guidelines for educational Apps • Case studies and student narratives from across the US describing successful App integration into both K-12 and Higher Education • Robust, research-based evaluation criteria for educational Apps Although many believe that Apps have the potential to create opportunities for transformative mobile education, a disparity currently exists between the individuals responsible for creating Apps (i.e. developers who often have little to no instructional experience) and the ultimate consumers in the classroom (i.e. K-20 educators and students). The New Landscape of Mobile Learning bridges this gap by illuminating critical design, integration, and evaluation narratives from leaders in the instructional design, distance education, and mobile learning fields.

Mobile Media in the Asia-Pacific Larissa Hjorth, 2008-10-13 This century has been marked by the rapid and divergent uptake of mobile telephony throughout the world. The mobile phone has become a poignant symbol for postmodernity and the attendant modes of global mobility and immobility. Most notably, the icon of the mobile phone is most palpable in the Asia-Pacific in which a diversity of innovation and consumer practices – reflecting gender and locality – can be found. Through the lens of gendered mobile media, *Mobile Media in the Asia Pacific* provides insight into this phenomenon by focusing on case studies in Japan, South Korea, China and Australia. Despite the ubiquity and multi-layered nature of mobile media in the region, the patterns of female consumption have received little attention in the growing literature on mobile communication globally. Utilising ethnographic research conducted in the Asia-Pacific over a six-year period, this book investigates the relationship between gender, technology and various forms of mobility and immobility in the region. This book outlines the emerging modes of gender performativity that makes the Asia-Pacific region so distinct to other regions globally. *Mobile Media in the Asia Pacific* is a fascinating read for students and scholars interested in new media and gender in the Asia-Pacific region.

A Village Goes Mobile Sirpa Tenhunen, 2018 This book examines how mobile telephony contributes to social change in rural India on the basis of ethnographic fieldwork. The book investigates how the use of mobile phones has influenced economic, political and social relationships including gender relationships, and how these new social constellations relate to culture and development --

New Business Opportunities in the Growing E-Tourism Industry Eto,

Hajime, 2015-07-07 Responding to the dual pressures of globalization and economic downturn, communities across the world formerly driven by agriculture and industry are increasingly turning toward tourism as an economic mainstay. In order for industry leaders to compete with the efforts of competitors and savvy marketers, new business models must be defined which allow for the incorporation of e-tourism tools and expansion into the global

marketplace. *New Business Opportunities in the Growing E-Tourism Industry* offers case studies and research that highlights the impact of globalization on travel and tourism and offers solutions to potential problems. Targeting an audience of researchers and business professionals, this volume brings together a diverse international body of scholars and researchers to provide a holistic perspective of future developments in the e-tourism industry. This volume compiles the research and perspectives of researchers and industry professionals, uniting a variety of topics including medical tourism, traffic-management, route-planning, virtual museums, digital spot-hunting via film-mosaic, and tourism for the elderly and disabled.

Pop Culture China! Kevin Latham,2007-07-27 This exciting title in ABC-CLIO's *Popular Culture in the Contemporary World* series offers the nonspecialist reader the only up-to-date introduction to all facets of popular culture in China. China's release from Maoist austerity has produced an explosion in popular culture. The Chinese have embraced such technologies

as television and cell phones and shaped them to their own social context. Understanding modern China requires a thorough knowledge of daily life there. This book presents readers, from high-school and college students to the inquisitive tourist, with that knowledge. The author, a scholar of Chinese culture, draws on his own fieldwork, along with authoritative scholarship and reporting, to give the reader a comprehensive, lively, and accessible introduction to all aspects of Chinese popular culture. The book begins with an introduction to understanding popular culture in China and covers mass media; print media; cinema, film, and video; the Internet; and also discusses the rise of consumption and consumerism. From the modernization of traditional theater to the traditional uses of modern technology, this book presents a guide to the emerging culture of a country that will inevitably become increasingly influential in coming years.

Mobile Communications Nicola Green, Leslie Haddon, 2009-12-15 The cellphone has achieved a global presence faster than any other form of information and communication technology. A global multi-billion dollar industry, this small, mundane device is now an intrinsic part of our everyday life. This communications medium has had an immense social and cultural impact and continues to evolve. Talking, texting, photographing, videoing, connecting to a network of other media – the cellphone now seems essential. But, beyond the ways in which it has actively restructured our daily lives, the cellphone has changed our sense of ourselves and the way we see the world. The relationship between public and private space, how we view time and space, how we rely on and negotiate social networks – all are increasingly centred on this small piece of technology. Mobile Communications presents a succinct, challenging, and accessible overview of the transformations and challenges presented by this most personal, yet most overlooked, technology.

Democratizing Journalism through Mobile Media Ivo Burum, 2016-04-20 Fuelled by a distrust of big media and the development of mobile technologies, the resulting convergence of journalism praxis (professional to alternative), workflows (analogue to multipoint digital) and platforms (PC to mobile), result in a 24-hour always-on content cycle. The information revolution is a paradigm shift in the way we develop and consume information, in particular the type we call news. While many see this cultural shift as ruinous, Burum sees it as an opportunity to utilize the converging information flow to create a galvanizing and common digital language across spheres of communication: community, education and mainstream media. Embracing the digital literacies researched in this book will create an information bridge with which to traverse journalism's commercial precarity, the marginalization of some communities, and the journalism school curricula.
