Interactive Multimedia on Next Generation Networks Giorgio Ventre,Roberto Canonico,2003-11-11 Multimedia Interactive Protocols and Systems (MIPS) is the brand new name of a workshop that has been successfully held for the first time in 2002 in Coimbra, as the first joint edition of two well established series of workshops: Interactive Distributed Multimedia Systems (IDMS) and Protocols for Multimedia Systems (PROMS). The area covered by Multimedia Interactive Protocols and Systems is indeed broad, since it includes technical and practical issues related to distributed multimedia technologies, applications and services, with emphasis on their deployment over next generation networks. The topics set for MIPS 2003 were: mobile and wireless multimedia systems; multimedia middleware and communication protocols; Quality of Service issues; resource management for multimedia services; active and programmable networking for multimedia applications; mobile agents for multimedia; multimedia distribution and transport; traffic engineering and service engineering; ubiquitous computing; networked audio-video devices; development tools for distributed multimedia applications; multimedia applications such as video-on-demand, digital video libraries, video games, virtual community, teleworking, teleteaching, e-commerce, virtual reality simulations; performance of protocols and applications; content management; service access; security, authentication, privacy, watermarking; accounting and traffic policing for multimedia teleservices; multimedia encoding and compression. The Call for Papers attracted more than 130 submissions from Europe, Asia and the Americas, covering most of the proposed topics. With the help of a very dedicated Program Committee and of a number of associate reviewers, submissions were carefully evaluated, with an average of three reviewers for each paper.

Digital Media Processing for Multimedia Interactive Services Ebroul Izquierdo,2003 This volume contains papers describing state-of-the-art technology for advanced multimedia systems. It presents applications in broadcasting, copyright protection of multimedia content, image indexing and retrieval, and other topics related to computer vision. The proceedings have been selected for coverage in: Index to Scientific & Technical Proceedings (ISTP / ISI Proceedings) Index to Scientific & Technical Proceedings (ISTP CDROM version / ISI Proceedings)

Tool support for collaborative creation of interactive storytelling media Paula Klinke,Silvan Verhoeven,Felix Roth,Linus Hagemann,Tarik Alnawa,Jens Lincke,Patrick Rein,Robert Hirschfeld,2022-09-21 Scrollytellings are an innovative form of web content. Combining the benefits of books, images, movies, and video games, they are a tool to tell compelling stories and provide excellent learning opportunities. Due to their multi-modality, creating high-quality scrollytellings is not an easy task. Different professions, such as content designers, graphics designers, and developers, need to collaborate to get the best out of the possibilities the scrollytelling format provides. Collaboration unlocks great potential. However, content designers cannot create scrollytellings directly and always need to consult with developers to implement their vision. This can result in misunderstandings. Often, the resulting scrollytelling will not match the designer's vision sufficiently, causing unnecessary iterations. Our project partner Typeshift specializes in the creation of individualized scrollytellings for their clients. Examined existing solutions for authoring interactive content are not optimally suited for creating highly customized scrollytellings while still being able to manipulate all their elements programmatically. Based on their experience and expertise, we developed an editor to author scrollytellings in the lively.next live-programming environment. In this environment, a graphical user interface for content design is combined with powerful possibilities for programming behavior with the morphic system. The editor allows content designers to take on large parts of the creation process of scrollytellings on their own, such as creating the visible elements, animating content, and fine-tuning the scrollytelling. Hence, developers can focus on interactive elements such as simulations and games. Together with Typeshift, we evaluated the tool by recreating an existing scrollytelling and identified possible future enhancements. Our editor streamlines the creation process of scrollytellings. Content designers and developers can now both work on the same scrollytelling. Due to the editor inside of the lively.next environment, they can both work with a set of tools familiar to them and their traits. Thus, we mitigate unnecessary iterations and misunderstandings by enabling content designers to realize large parts of their vision of a scrollytelling on their own. Developers can add advanced and individual behavior. Thus, developers and content designers benefit from a clearer distribution of tasks while keeping the benefits of collaboration.

Interactive Broadband Media Nikolaus Mohr,Gerhard P. Thomas,2013-06-29 This book serves as a guide for companies to explore the path from traditional media to the new world of interactive broadband media. The key challenge is to base indispensable future investments on reliable business models. This book offers a comprehensive set of concepts and strategies for the interactive broadband realm, grounded in attractive service offerings and customer preferences. The authors explain and analyze the interaction

of broadband technologies, its processes and the end customers' point of view. At the same time they provide current examples of successful long-term business models. By applying Accenture's tried and tested Get Audience / Sell Audience concept, companies can assess their position in the interactive broadband value chain and optimize their strategies accordingly.

Managing Interactive Media Projects Tim Frick,2008 From the birth of a media project idea to the implementation and maintenance of that project, this book provides the skills and know-how to master the process of managing interactive media projects. Managing Interactive Media Projects offers important insights and techniques for various approaches to the process of creating interactive media. It covers the ever-important steps of planning, documenting, writing, designing, implementing, testing, debugging and maintaining interactive media projects that range from web sites and online media to DVDs, CD-ROMs and Flash. Detailed breakdowns of key steps in developing interactive projects coupled with in-depth case studies and digital supplemental materials make it a valuable resource in today's creative market. Written in a cohesive yet easy to understand manner, this book will transform the daily drudgery of technical specifications and documentation into an easy-to-implement process that will help readers to surpass even their own expectations on their interactive media projects.
