Make to Know Lorne M. Buchman,2022-04-27 Make to Know: From Spaces of Uncertainty to Creative Discovery will change the way you think about creativity. The book upends popular notions of innate artistic and visionary genius and probes instead the event of discovery that happens through the act of making. In contrast to the classic tale of Michelangelo, who 'saw the angel in the stone', the artists and designers Buchman interviews for this book talk about knowing their work as they engage in the doing. Make to Know explores the revelatory nature of the creative journey itself. As Buchman weaves together the vivid stories of his multiple conversations, we learn about writers of all stripes as they confront creative spaces of uncertainty 'the blank page'; about visual artists and what they understand from the materials they encounter; about designers and architects and the iterative process of solving problems; and about actors and musicians facing the surprises of improvisational performance. Make to Know is a book that will, ultimately, open a path to your own making, and, in the end, will have significant implications for how you live. Make to Know presents a way of thinking that democratizes creativity and uncovers a process that leads to knowing both ones work and oneself. It is relevant to anyone interested in why creativity matters.

Design Literacy Steven Heller, 2014-05-06 Author and design expert Steven Heller has revisited and revised the popular classic *Design Literacy* by revising many of the thoughtful essays from the original and mixing in thirty-two new works. Each essay offers a taste of the aesthetic, political, historical, and personal issues that have engaged designers from the late nineteenth century to the present—from the ubiquitous (the swastika, antiwar posters) to the whimsical (MAD magazine parodies). The essays are organized into eight thematic categories—persuasion, mass media, language, identity, information, iconography, style, and commerce. This revised edition also highlights recent trends in graphic design such as aesthetic changes in typography in the digital age and the nexus between graphic design and wired culture. This is an eclectic look at how, why, and if graphic design influences our ever-evolving, diverse world. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

There's plenty of support for desktop publishers using WordPerfect, Lotus, Adobe, and Quark. You'll get tips for spicing up your pages with tables, charts, graphs, pictographs, and maps, using simple software programs. It's all here. From logotype to printed pages, you won't find a more readable, on-the-money guide to designing newsletters.

Sheila gave me the tools to hunt success, and the infrastructure to handle it when it came. - Stik, world renowned street artist and author Most of the conventional productivity advice you'll find in the business section simply does not work for creative people. An artist herself, Sheila Chandra applies her professional insights as an organizing expert to the lives of other busy creative people in all disciplines, showing them how good organization can liberate their creative magic. She begins with artists' physical spaces, including arranging their workspaces and offices so that they remain tidy effortlessly. These fool-proof, tried and tested systems are mixed with creativity tips and artist well-being advice that only one artist knows to give another. Creative Practices for Visual Artists Kenneth Steinbach, 2018-03-09 Contrary to popular belief, the practice of art isn't just a product of innate talent or artistic vision; artwork emerges from an intentionally constructed and maintained artistic practice. Developed from interviews with more than 75 mid-career artists, Creative Practices for Visual Artists examines the methods and approaches highly successful artists use to stay creatively robust for a lifetime. Offering practical strategies and concrete solutions, it also looks at the impacts of digital and social media, as well as recent changes in the educational system that can hinder the formation of a strong artistic practice. Artist and educator Kenneth Steinbach addresses key issues such as: the role of embodied research and non-objective experimentation; reframing one's approach to studio time; forms of productive conflict; the positive role of anxiety; and the importance of failure for the artist. The book will be useful to students and emerging artists, the instructors that teach them, and established artists looking to develop stronger studio habits. The companion website, www.creativepracticesbook.com, provides links to artists' websites and further information.

The Art of Creative Coping Dr. Bill Comeau, 2018-01-02 It all begins with a blank page and a real-life coping problem. What ends up on the page and how much it helps you cope depends on two things: how hard you're willing to work, and how honest you can be with who and what you really are. You will be asked to take a hard look at yourself to see what tools you already have to help you find a way to peace of mind in the midst of an ever changing universe where you must quickly adapt or die. These gifts are simple things like the love of figuring out stuff on your own, a great sense of humor about life, a curious mind. The combination you have is unique to you and the beginnings of putting together your coping tool box. As it turns out, perception is not reality; only reality is reality. Perception is your mind getting fooled by a bunch of facts that seem to add up to more than they really do.
