The Encyclopedia of Louisville John E. Kleber,2014-07-11 With more than 1,800 entries, The Encyclopedia of Louisville is the ultimate reference for Kentucky's largest city. For more than 125 years, the world's attention has turned to Louisville for the annual running of the Kentucky Derby on the first Saturday in May. Louisville Slugger bats still reign supreme in major league baseball. The city was also the birthplace of the famed Hot Brown and Benedictine spread, and the cheeseburger made its debut at Kaelin's Restaurant on Newburg Road in 1934. The Happy Birthday had its origins in the Louisville kindergarten class of sisters Mildred Jane Hill and Patty Smith Hill. Named for King Louis XVI of France in appreciation for his assistance during the Revolutionary War, Louisville was founded by George Rogers Clark in 1778. The city has been home to a number of men and women who changed the face of American history. President Zachary Taylor was reared in surrounding Jefferson County, and two U.S. Supreme Court Justices were from the city proper. Second Lt. F. Scott Fitzgerald, stationed at Camp Zachary Taylor during World War I, frequented the bar in the famous Seelbach Hotel, immortalized in *The Great Gatsby*. Muhammad Ali was born in Louisville and won six Golden Gloves tournaments in Kentucky.

Universities, Innovation and the Economy Helen Lawton-Smith,2006-09-27 Universities are increasingly expected to be at the heart of networked structures contributing to society in meaningful and measurable ways through research, the teaching and development of experts, and knowledge innovation. While there is nothing new in universities’ links with industry, what is recent is their role as territorial actors. It is government policy in many countries that universities - and in some countries national laboratories - stimulate regional or local economic development. Universities, Innovation and the Economy explores the implications of this expectation. It sites this new role within the context of broader political histories, comparing how countries in Europe and North America have balanced the traditional roles of teaching and research with that of exploitation of research and defining a territorial role. Helen Lawton-Smith highlights how pressure from the state and from industry has produced new paradigms of accountability that include responsibilities for regional development. This book uses empirical evidence from studies conducted in North America and Europe to provide an overview of the changing geography of university-industry links.
