Security Assessment Syngress, 2004-01-21 The National Security Agency's INFOSEC Assessment Methodology (IAM) provides guidelines for performing an analysis of how information is handled within an organization: looking at the systems that store, transfer, and process information. It also analyzes the impact to an organization if there is a loss of integrity, confidentiality, or availability. Security Assessment shows how to do a complete security assessment based on the NSA's guidelines. Security Assessment also focuses on providing a detailed organizational information technology security assessment using case studies. The Methodology used for the assessment is based on the National Security Agency's (NSA) INFOSEC Assessment Methodology (IAM). Examples will be given dealing with issues related to military organizations, medical issues, critical infrastructure (power generation etc). Security Assessment is intended to provide an educational and entertaining analysis of an organization, showing the steps of the assessment and the challenges faced during an assessment. It will also provide examples, sample templates, and sample deliverables that readers can take with them to help them be better prepared and make the methodology easier to implement. Everything You Need to Know to Conduct a Security Audit of Your Organization Step-by-Step Instructions for Implementing the National Security Agency's Guidelines Special Case Studies Provide Examples in Healthcare, Education, Infrastructure, and more

Indian Classical Music and the Gramophone, 1900-1930 Vikram Sampath, 2022-06-30 In 1902 The Gramophone Company in London sent out recording experts on expeditions across the world to record voices from different cultures and backgrounds. All over India, it was women who embraced the challenge of overcoming numerous social taboos and aesthetic handicaps that came along with this nascent technology. Women who took the plunge and recorded largely belonged to the courtesan community, called tawaifs and devadasis, in North and South India, respectively. Recording brought with it great fame, brand recognition, freedom from exploitative patrons, and monetary benefits to the women singers. They were to become pioneers of the music industry in the Indian sub-continent. However, despite the pioneering role played by these women, their stories have largely been forgotten. Contemporaneous with the courtesan women adapting to recording technology was the anti-naught campaign that sought to abolish these women from the performing space and brand them as common prostitutes. A vigorous renaissance and arts revival movement followed, leading to

the creation of a new classical paradigm in both North Indian (Hindustani) and South Indian (Carnatic) classical music. This resulted in the standardization, universalization, and institutionalization of Indian classical music. This newly created classical paradigm impacted future recordings of The Gramophone Company in terms of a shift in genres and styles. Vikram Sampath sheds light on the role and impact of The Gramophone Company's early recording expeditions on Indian classical music by examining the phenomenon through a sociocultural, historical and musical lens. The book features the indefatigable stories of the women and their experiences in adapting to recording technology. The artists from across India featured are: Gauhar Jaan of Calcutta, Janki Bai of Allahabad, Zohra Bai of Agra, Malka Jaan of Agra, Salem Godavari, Bangalore Nagarathnamma, Coimbatore Thayi, Dhanakoti of Kanchipuram, Bai Sundarabai of Pune, and Husna Jaan of Banaras.

Journalism After Snowden Emily Bell, Taylor Owen, 2017-03-07 Edward Snowden's release of classified NSA documents exposed the widespread government practice of mass surveillance in a democratic society. The publication of these documents, facilitated by three journalists, as well as efforts to criminalize the act of being a whistleblower or source, signaled a new era in the coverage of national security reporting. The contributors to Journalism After Snowden analyze the implications of the Snowden affair for journalism and the future role of the profession as a watchdog for the public good. Integrating discussions of media, law, surveillance, technology, and national security, the book offers a timely and much-needed assessment of the promises and perils for journalism in the digital age. Journalism After Snowden is essential reading for citizens, journalists, and academics in search of perspective on the need for and threats to investigative journalism in an age of heightened surveillance. The book features contributions from key players involved in the reporting of leaks of classified information by Edward Snowden, including Alan Rusbridger, former editor-in-chief of The

Guardian; ex-New York Times executive editor Jill Abramson; legal scholar and journalist Glenn Greenwald; and Snowden himself. Other contributors include dean of Columbia Graduate School of Journalism Steve Coll, Internet and society scholar Clay Shirky, legal scholar Cass Sunstein, and journalist Julia Angwin. Topics discussed include protecting sources, digital security practices, the legal rights of journalists, access to classified data, interpreting journalistic privilege in the digital age, and understanding the impact of the Internet and telecommunications policy on journalism. The anthology's interdisciplinary nature provides a comprehensive overview and understanding of how society can protect the press and ensure the free flow of information.

Shaping Entrepreneurship Research Saras D. Sarasvathy, Nicholas Dew, Sankaran Venkataraman, 2020 *Shaping Entrepreneurship Research: Made, as Well as Found* is a collection of readings designed to support entrepreneurship research. Focused on a worldview in which the future is open-ended and shapeable through human action - i.e. made, this collection reframes entrepreneurship as a science of the artificial rather than as a natural or social science. It posits an open-ended universe for the making of human artifacts even if large swathes of nature and society are not within the control of the people making them. The book explores the notion of made through 25 foundational readings - classics from the history of ideas. Organized into five sections, each classic is individually introduced by the editors in one of five chapters written to explain its relevance and significance for a made view of entrepreneurship. Readers will benefit from exposure to these classic ideas and ongoing research in a variety of areas that fall somewhat outside the line-of-sight of traditional entrepreneurship research. Both individually and collectively, the readings suggest opportunities to ask new questions and develop new ways of framing entrepreneurship research that carry the discussion beyond worlds found to worlds made as well as found. The book is crafted to be valuable to three groups of scholars: young scholars with limited or no access to research infrastructure but with a desire to participate in deep conversations; young scholars with access to research infrastructure who also desire to listen-in on a different kind of conversation; and established

entrepreneurship scholars who are contemplating an alternative set of foundational ideas to support their conversations in the discipline.

Some nuns seem to harbor secret lusts for each other. Then there's an accident in the cellar revealing a very old condemned door found on no plan. One of the less holy nuns has a satanic nightmare about it. She decides to find out. What she unleashes is an unholy bedlam of depravity and lust!
