*Operations Research Proceedings 2005* Hans-Dietrich Haasis,Herbert Kopfer,Jörn Schönberger,2006-09-12 This volume contains a selection of 128 papers presented in lectures during the international scientific symposium Operations Research 2005 (OR 2005) held at the University of Bremen, September 7-9, 2005. This international conference took place under the auspices of the German Operations Research Society (GOR). The symposium had about 600 participants from countries all over the world. It attracted academics and practitioners working in various fields of Operations Research and provided them with the most recent advances in Operations Research as well as related areas in Economics, Mathematics, and Computer Science including the special interest streams Logistics and New Maritime Businesses. The program consisted of 3 plenary and 15 semi-plenary talks and about 400 contributed presentations selected by the program committee to be presented in 20 sections.

*Pathways to Peacebuilding* Uchenna D. Anyanwu,2022-11-30 Given the consistent challenge of Islamist acute violence, particularly in Nigeria, this monograph attempts to respond to the question: How can Jesus's followers pattern response to violence after Jesus's model demonstrated in his triumph over death, evil, sin, and violence through staurocentric pathways? And how can Jesus's followers in Nigeria adopt the same staurocentric model in order to not only overcome acute violence within the country but also to extend

hands, heads, hearts, and homes of staurocentric forgiveness, hospitality, and other practices toward Muslims? In this study, I posit that peacebuilding contextual theology be grounded on the mystery of the cross (σταυρός–stauros)—a theologico-theoretical framework that the church in Nigeria should espouse in order to position herself to extend hands, heads, hearts, and homes of staurocentric practices, whose appropriation must be undertaken through constructive and critical integration of the God-given African peacebuilding concepts autochthonous to Africa's mosaic cultural contexts. The pivotal thesis is that the staurocentric model remains the triune God's instrument for triumphing over violence, and thus should be espoused by Jesus's followers in every era and context for peacebuilding in contexts of violence through a triadic constructive and critical integration of indigenous peacebuilding concepts.

*Mobile Ad Hoc Networks* Jonathan Loo, Jaime Lloret Mauri, Jesús Hamilton Ortiz, 2016-04-19 Guiding readers through the basics of these rapidly emerging networks to more advanced concepts and future expectations, this book examines the most pressing research issues in Mobile Ad hoc Networks (MANETs). Leading researchers, industry professionals, and academics provide an authoritative perspective of the state of the art in MANETs. It considers routing, multicast, energy, security, channel assignment, and ensuring quality of service.

**Recent Trends in Wireless and Mobile Networks** Abdulkadir Özcan, Nabendu Chaki, Dhinakaran Nagamalai, 2010-06-14 The International Conference on Wireless and Mobile networks (WiMo) aims to bring together innovative ideas and new research trends in wireless and mobile networks. Wireless networks are the best inventions in history. Wireless networking gives you a cheap and easy way to share one Internet connection between multiple computers, eliminating the need for more than one modem. You can even add new computers to your network simply by plugging in a wireless card and switching them on—they have an Internet connection straight away! There aren't many wired networks that can say that. This conference is dedicated to addressing the challenges in the areas of wireless and mobile networks. It looks for significant contributions to wireless and mobile computing in theoretical and practical aspects. The wireless and mobile computing domain emerges from integrating personal computing, networks, communication technologies, cellular technology and Internet technology. Modern applications are emerging in the area of mobile ad hoc networks and sensor networks. WiMo 2010 intended to cover contributions in both design and analysis in the context of mobile, wireless, ad hoc, and sensor networks. The goal of the conference was to bring together researchers and practitioners from academia and industry to focus on advanced wireless and mobile computing concepts and establish new collaborations in these areas.

**Operations Research Proceedings 2008** Bernhard Fleischmann, Karl-Heinz Borgwardt, Robert Klein, Axel Tuma, 2009-08-04 The international conference \Operations Research 2008, the annual meeting of the German Operations Research Society (GOR), was held at the University of Augsburg on September 3-5, 2008. About 580 participants from more than 30 countries presented and listened to nearly 400 talks on a broad range of Operations Research. The general subject \Operations Research and Global Business strategies the

important role of Operations Research in improving decisions in the increasingly complex business processes in a global environment. The plenary speakers Morris A. Cohen (Wharton School) and Bernd Liepert (Executive Board of KUKA Robotics) addressed this subject. Moreover, one of the founders of Operations Research, Saul Gass (University of Maryland), gave the opening speech on the early history of Operations Research. This volume contains 93 papers presented at the conference, selected by the program committee and the section chairs, forming a representative sample of the various subjects dealt with at Operations Research 2008. The volume follows the structure of the conference, with 12 sections, grouped into six \Fields of Applications and six \Fields of Methods and Theory. This structure in no way means a separation of theory and application, which would be detrimental in Operations Research, but displays the large spectrum of aspects in the focus of the papers. Of course, most papers present theory, methods and applications together.

*Female Suicide Bombings* Tanya Narozhna,W. Andy Knight,2016-08-04 As media coverage of terrorism and terroristic acts has increased so too has the discussion about the identities, motives, and gender of the perpetrators. Over the past fifteen years, there have been over 150 reported suicide bombings committed by women around the world. Because of its prominence in media reporting, the phrase "female suicide bomber" has become loaded with gendered notions and assumptions that elicit preconditioned responses in the West. *Female Suicide Bombings* critically examines and challenges common assumptions of this loaded term. Tanya Narozhna and W. Andy Knight introduce female suicide bombings as a socio-political practice and a product of deeply politicized, gendered representations. Drawing on a combination of feminist and post-colonial approaches as well as terrorism studies literature, the authors seek to transcend ideological divisions in order to enhance our understanding of how gender, power, and academic practices influence our perceptions of female suicide bombings.
