Circulation of Power Michael M. Widdersheim,2023-05-22 What is the public sphere, how is it best described, and what role does it play in modern life? These questions have attracted considerable attention within library and information science circles over several decades, especially regarding public libraries. Circulation of Power contributes to this discussion by proposing a new research framework and new methods for analyzing public sphere communication. Using extensive data gathered from an urban public library infrastructure, this historical case study demonstrates how public sphere communication shaped the infrastructure’s development over time, producing both changes and continuities across the case’s nine periods. Two new conceptual tools—circuits and decisions cycles—form the study’s research framework, and a new explanatory theory—RLCr, or Releaser, theory—accounts for why the infrastructure developed as it did. Consideration of competing theories reveals that public sphere communication remains the best explanation for infrastructural development. This book’s meticulous historical narrative of the greater Pittsburgh case, supplemented by its groundbreaking theory and innovative mixed methods design, is of interest to practitioners, academics, and general readers alike.

Punching Above their Weight Sean McGoldrick,2015-10-05 Ireland's amateur boxing story is one of blood, sweat and tears – and not just in the ring. Ireland is one of the world's leading nations in the sport. This is the inside story of a great tradition – a story of physical prowess, gritty determination, devastating defeats, sheer bad luck, infamous 'he was robbed' judging decisions, and the ultimate goal of Olympic glory. The boxers' lives play out against a backdrop of the economic woes of the 1950s, the Northern Ireland Troubles, the fall of the Berlin Wall and the break-up of the Soviet Union. Sean McGoldrick shines a spotlight on Ireland's 'Medal Factory', the sometimes-contentious High Performance Unit, which has nurtured Irish boxers on the road to winning seven Olympic medals. Punching Above Their Weight captures the rollercoaster ride of such legendary boxers and coaches as John McNally, Fred Tiedt, Barry McGuigan, Hugh Russell, Billy Walsh, Michael Carruth, Zaur Antia, Wayne McCullough, Paddy Barnes, Kenny Egan, Darren Sutherland, John Joe Nevin, and Katie Taylor, among many others. A countback of over seventy years of Ireland's 'sweet science'.

Blood, Sweat, and Tears Derrick E. White,2019-06-27 Black college football began during the nadir of African American life after the Civil War. The first game occurred in 1892, a little less than four years before the Supreme Court ruled segregation legal in Plessy v. Ferguson. In spite of Jim Crow segregation, Black colleges produced some of the best football programs in the country. They mentored young men who became teachers, preachers, lawyers, and doctors--not to mention many other professions--and transformed Black communities. But when higher education was integrated, the programs faced existential challenges as predominately white institutions steadily set about recruiting their student athletes and hiring their coaches. Blood, Sweat, and Tears explores the legacy of Black college football, with Florida A&M's Jake Gaither as its central character, one of the most successful coaches in its history. A paradoxical figure, Gaither led one of the most respected Black college football programs, yet many questioned his loyalties during the height of the civil rights movement. Among the first broad-based histories of Black college athletics, Derrick E. White's sweeping story complicates the heroic narrative of integration and grapples with the complexities and contradictions of one of the most important sources of Black pride in the twentieth century.
