High Voltage Jim Motavalli, 2011-11-08 A behind-the-scenes look at the robustly competitive race to dominate the market for electric cars, the larger-than-life moguls behind them, and the changes that are transforming the auto industry In the 1980s, it was unimaginable that the home computer would become as common and easy to use as a toaster. Today, plug-in charging stations and smart grids seem like something still far off in the future. But by 2020, the auto industry will look very different from today's field of troubled auto giants. The combination of technological breakthroughs and charging networks driven by global warming and peak oil makes it clear that revolutionary change in the auto industry is happening right now. In *High Voltage*, Jim Motavalli captures this period of unprecedented change, documenting the evolution from internal combustion engines to electric power. Driven by the auto world's ambitious and sometimes outlandish personalities, the book chronicles the race to dominate the market, focusing on big players like Tesla and Fisker, as well as a tiny start-up and a battery supplier. Flashing forward to the changes we'll see in the coming years, *High Voltage* shows a not-so-distant future where we will live on a smart grid, our cars fueling, that is, charging, while we shop or sleep. The ramifications of these changes will be on a grander scale than most of us ever imagined—altering foreign policy, reducing trade deficits, and perhaps even ending global warming.

Reinventing Fire Amory Lovins, 2013-10-07 Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point has become the fulcrum of economic transformation. In *Reinventing Fire*, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win

the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, Reinventing Fire makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description.

Bottled Lightning Seth Fletcher, 2011-05-10 Lithium batteries may hold the key to an environmentally sustainable, oil-independent future. From electric cars to a smart power grid that can actually store electricity, letting us harness the powers of the sun and the wind and use them when we need them, lithium—a metal half as dense as water, found primarily in some of the most uninhabitable places on earth—has the potential to set us on a path toward a low-carbon energy economy. In *Bottled Lightning*, the science reporter Seth Fletcher takes us on a fascinating journey, from the salt flats of Bolivia to the labs of MIT and Stanford, from the turmoil at GM to cutting-edge lithium-ion battery start-ups, introducing us to the key players and ideas in an industry with the power to reshape the world. Lithium is the thread that ties together many key stories of our time: the environmental movement; the American auto industry, staking its revival on the electrification of cars and trucks; the struggle between first-world countries in need of natural resources and the impoverished countries where those resources are found; and the overwhelming popularity of the portable, Internet-connected gadgets that are changing the way we communicate. With nearly limitless possibilities, the promise of lithium offers new hope to a foundering American economy desperately searching for a green-

tech boom to revive it.

Thomas, 2011-07-07 Le peer-to-peer s'inscrit dans l'évolution naturelle de l'Internet. Il réunit des millions d'internautes au sein de réseaux de collaboration et de partage, et mutualise leurs ressources de façon distribuée et décentralisée. Dépoussiérant la réputation sulfureuse de cette technologie, ce guide explique comment utiliser les réseaux pair-à-pair les plus connus (Bittorrent/Azureus, Edonkey/Emule, Overnet/Kad...) pour diffuser ses documents et communiquer avec d'autres utilisateurs, aussi bien sous Linux et Windows que sous Mac OS X.

All-in Olivier Ducher, 2024-01-17 Nico, un véritable flambeur, risque audacieusement sa vie au jeu du pile ou face. Il fréquente l'établissement de son ami Jo, où rôdent ses anciens compagnons devenus dangereux, à qui il doit malheureusement une somme considérable d'argent. Ils parviennent finalement à trouver un accord pour résoudre leur différend. Cependant, le décès soudain de Jo amène Nico à prendre soin de la fille de son ami, l'obligeant ainsi à assumer le rôle de père, malgré la passion amoureuse qui les anime tous les deux. À PROPOS DE L'AUTEUR Olivier Ducher, un élève doué mais distrait, abandonne l'école après avoir échoué à son BEPC. Il refuse de se résigner à des emplois précaires et s'engage volontairement pour servir en Afrique à l'âge de dix-huit ans. Mais à son retour à vingt ans, il était devenu apathique. Traversant le temps, sans se soucier ni des règles ni des lois, ce qui lui vaudra quelques années d'incarcération, il décide de raconter des histoires, en mélangeant une partie de sa vie tumultueuse avec des morceaux piochés dans celles de certaines de ses connaissances.
