Getting to Scale Laurence Chandy, Akio Hosono, Homi J. Kharas, Johannes F. Linn, 2013 Visit any developing country and you will find governments, international donors, NGOs, and corporations involved in a range of innovative activities to address the needs of the poor. Only a fraction of those that show promise at a localized level, however, will ever be replicated, expanded, and sustained to achieve a transformative impact. Learning how to expand the reach of proven interventions so that they help larger numbers of poor people - 'scaling up' - is a fundamental challenge facing the developing world. This book improves our understanding of how scaling up can be achieved and what the international community can do to support the process. Remarkably little is understood of how to design scalable projects, the impediments to reaching scale, or the most appropriate pathways for reaching that goal. To answer these questions, this book features a series of case studies drawn from both the public and private sectors to demonstrate how the scaling up of services for the world's poor can happen. By linking public and private experience, the authors argue that successful scaling up will not be achieved by either public or private sector efforts alone. Rather, it will require both public and private efforts working together. This book demonstrates that the challenges to scaling up are complex and various, but ultimately surmountable. It provides an invaluable resource for development practitioners, analysts, and students on a topic that remains largely unexplored and poorly understood.

**The Global Challenge of Malaria** Frank M. Snowden, 2014 Malaria is one of the most important OC emergingOCO or OC resurgentOCO infectious diseases. According to the World Health Organization, this mosquito-borne infection is a leading cause of suffering, death, poverty, and underdevelopment in the world today. Every year 500 million people become severely ill from malaria and more than a million people die, the great majority of them women and children living in sub-Saharan Africa. In 2008, it was estimated, a child would die of the disease every thirty seconds, making malaria OCo together with HIV/AIDS and tuberculosis OCo a global public health emergency. This is in stark contrast to the heady visions of the 1950s predicting complete global eradication of the ancient scourge. What went wrong?. This question warrants a closer look at not just the disease itself, but its long history and the multitude of strategies to combat its spread. This book collects the many important milestones in malaria control and treatment in one convenient volume. Importantly, it also traces the history of the disease from the 1920s to the present, and over several continents. It is the first multidisciplinary volume of its kind combining historical and scientific information that addresses the global challenge of malaria control. Malaria remains as resurgent as ever and The Global Challenge of Malaria: Past Lessons and Future Prospects will examine this challenge OCo and the range of strategies and tools to confront it OCo from an interdisciplinary and

transnational perspective. Contents: Lessons of History: Malaria in America (Margaret Humphreys); Technological Solutions: The Rockefeller Insecticidal Approach to Malaria Control, 1920-1950 (Darwin H Stapleton); Malaria Control and Eradication Projects in Tropical Africa, 1945-1965 (James L A Webb, Jr); The Use and Misuse of History: Lessons from Sardinia (Frank M Snowden); Popular Education and Participation in Malaria Control: A Historical Overview (Socrates Litsios); Scientific, Medical, and Public Health Perspectives: The Contribution of the Gambia to Malaria Research (Brian Greenwood); Insecticide-Treated Bednets and Malaria Control: Strategies, Implementation, and Outcome (Harry V Flaster, Emily Mosites, and Brian G Blackburn); The Scientific and Medical Challenge of Malaria (Tiffany Sun and Richard Bucala). **Current Topics in Public Health** Alfonso J. Rodriguez-Morales, 2013-05-15  
Public Health is regarded as the basis and cornerstone of health, generally and in medicine. Defined as the science and art of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, public and private, communities and individuals, this discipline has been renewed by the incorporation of multiple actors, professions, knowledge areas and it has also been impacted and promoted by multiple technologies, particularly - the information technology. As a changing field of knowledge, Public Health requires evidence-based information and regular updates. Current Topics in Public Health presents updated information on multiple topics related to actual areas of interest in this growing and exciting medical science, with the conception and philosophy that we are working to improve the health of the population, rather than treating diseases of individual patients, taking decisions about collective health care that are based on the best available, current, valid and relevant evidence, and finally within the context of available resources. With participation of authors from multiple countries, many from developed and developing ones, this book offers a wide geographical perspective. Finally, all these characteristics make this book an excellent update on many subjects of world public health.

**Malaria Control in Humanitarian Emergencies** World Health Organization, 2013  
This second edition represents a thorough updating and revision of the first edition. The structure remains similar, but includes an additional chapter on humanitarian coordination. All chapters have been revised to reflect changes in best practices, improvements in technologies, availability of new tools, and changes in WHO recommendations. The interagency handbook was developed to set out effective malaria control responses in humanitarian emergencies, particularly during the acute phase when reliance on international humanitarian assistance is greatest. It provides policy-makers, planners, and field coordinators with practical advice on designing and implementing measures to reduce malaria morbidity and mortality in both man-made and natural disasters. Such measures must address the needs of all affected population groups and accommodate changing needs as an acute emergency evolves into either recovery or chronic emergency phase. Ideal, or gold standard, approaches to malaria control are not always feasible in humanitarian emergencies. Interventions must be adapted to the realities of each emergency. Using this handbook should help humanitarian workers implement effective and concerted responses to malaria problems.

**Industrial Policy for the Sustainable Development Goals Increasing the Private Sector's Contribution** OECD, 2021-09-15  
How can governments support the private sector's contribution to the Sustainable Development Goals (SDGs)? This book investigates the contribution of firms to the SDGs, particularly through their core business, taking into account inter-sectoral linkages and global value chains, using novel techniques and data sources.

**Base of the Pyramid and Business Process Outsourcing Strategies** Takabumi Hayashi, Hiroshi Hoshino, Yoshie Hori, 2023-03-01  
The major objective of this book is to introduce social business models to face the challenge of social issues in emerging countries. Each chapter clarifies business strategies based on diligent field surveys in developing nations, focusing on Bangladesh and the Philippines, where social issues in the age of Sustainable Development Goals (SDGs) are concentrated. The field surveys enable the effective construction of a sophisticated hybrid value chain by connecting a sustainable business ecosystem of local value chains with global value chains. Joint social business entities formed between local NGOs and foreign companies, multinational corporations with global value chains, among others, appear to be the keystones. In Part I, the case of Grameen Euglena in Bangladesh and that of Sari-Sari stores leveraging micro-financing in the Philippines, along with other interesting cases, are analyzed as effective

social business models. Analysis also shows that the IT service industry in emerging countries helps to enlarge formal sectors so as to absorb younger generations into informal sectors. The e-health service business in Bangladesh and the business process outsourcing (BPO) IT service industry in the Philippines are examined in each part of the book. Part II, particularly, shows that IT and the digital technology-based service industry can lead to a new industrial development path in these countries instead of the conventional one based on manufacturing. In other words, digital technology-based service industries, as formal sectors, can absorb working people from informal sectors. As a result, poverty issues which form a key issue in SDGs will be alleviated. This book is highly recommended not only to academicians but also to businesspeople who seek an in-depth and up-to-date overview of new sustainable and inclusive businesses in the age of SDGs.

**Insecticides** Farzana Khan Perveen,2012-01-05 This book contains 30 Chapters divided into 5 Sections. Section A covers integrated pest management, alternative insect control strategies, ecological impact of insecticides as well as pesticides and drugs of forensic interest. Section B is dedicated to chemical control and health risks, applications for insecticides, metabolism of pesticides by human cytochrome p450, etc. Section C provides biochemical analyses of action of chlorfluazuron, pest control effects on seed yield, chemical ecology, quality control, development of ideal insecticide, insecticide resistance, etc. Section D reviews current analytical methods, electroanalysis of insecticides, insecticide activity and secondary metabolites. Section E provides data contributing to better understanding of biological control through *Bacillus sphaericus* and *B. thuringiensis*, entomopathogenic nematodes insecticides, vector-borne disease, etc. The subject matter in this book should attract the reader's concern to support rational decisions regarding the use of pesticides.

**Control of Human Parasitic Diseases** ,2007-03-23 Control of parasitic infections of humans has progressed rapidly over the last three decades. Such advances have resulted from focal disease control efforts based on historically effective interventions to new approaches to control following intensive research and pilot programs. Control of Human Parasitic Diseases focuses on the present state of control of the significant human parasitic infectious diseases. Includes the impact of recent research findings on control strategy Discusses the health policy implications of these findings and the importance of evaluation and monitoring Highlights the lessons learned and the interactions between control programs and health systems

Exploring Shared Value in Global Health and Safety National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Global Health,Forum on Public-Private Partnerships for Global Health and Safety,2016-10-26 Companies today are operating in a more complex and competitive environment where traditional models for doing business are no longer sufficient and expectations of business are growing both internally and externally. Many companies have long and robust histories of contributing to their communities as well as to more global societal needs, but this has been done primarily and historically through philanthropy and more traditional corporate social responsibility. However, companies are increasingly seeking greater alignment of these activities with their business interests in order to increase their value proposition. These same companies are also under increased pressure to build their business in a sustainable manner through innovative approaches. The National Academies of Sciences, Engineering, and Medicine convened a workshop to explore the concept of shared value for global health and safety stakeholders in both the public and private sectors; roles, responsibilities, incentives, and opportunities for different stakeholders engaging in global health and safety initiatives in low- and middle-income countries; and the potential of partnerships and collaboration for improved outcomes for all stakeholders,

including the communities they serve. Participants considered potential opportunities for creating shared value for all organizations, specifically the creation and impact of shared value through an organization's core products and services, through employee health and wellness programs, and through community or population health investments. This report summarizes the presentations and discussions from the workshop.

#### **Functional Textiles for Improved Performance, Protection and Health** N

Pan, G. Sun, 2011-06-21 The textile industry is increasingly based on ongoing innovation and development of higher performance products, and the field of functional textiles is no exception. This book explores the development of textiles with a wide range of functions, with the aim of improving the performance of the product in terms of the protection and health benefits that it can offer. The book is split into two parts. Part one focuses on functional textiles for improved performance and protection, with chapters reviewing antistatic, flame retardant and infrared functional textiles, among many others. Chapters in part two examine the uses of functional textiles in a medical context, including superhydrophobic materials, antibacterial textiles and insect-repellent materials. With its distinguished editors and contributions from some of the world's leading authorities, Functional textiles for improved performance, protection and health is invaluable for textile scientists, technologists and engineers as well as those designing and manufacturing textiles. It is also a suitable reference for the academic sector. Examines the use of functional textiles in a medical context, including superhydrophobic materials, antibacterial textiles and insect-repellent materials Topics range from textile chemicals and their interaction with skin to novel pesticide protective clothing Considers anti-ultraviolet protection of clothing and flame retardant textiles

#### **Globalized Poverty and Environment** Nathaniel O. Agola, Joseph L.

Awange, 2014-07-08 This book reviews the key conceptions and economic theories of poverty, explains poverty-environment nexus, and finally offers innovative socio-economic and scientific geospatial solutions for the 21st Century. The book makes it possible for our readers to understand poverty through a concise review of the major theoretical economic frameworks, measures of poverty, and points out the need to understand rural-urban dichotomy of poverty. We find the theories and measures to be less-than perfect and therefore point out the need to treat these measures and theories as convenient tools lacking perfect accuracy and utmost scientific reliability. It follows then that the supposedly knowledgeably crafted poverty reduction and environmental preservation solutions are inherently imperfect. The economic solutions proposed in this book transcend extant humdrum macroeconomic and policy measures targeting poverty and environmental issues. We point to a new paradigm in which private sector and other stakeholders can create new and inclusive markets where value is co-created and shared. Above all, this book offers timely state-of-the-art geospatial solutions targeting the most pressing global problems of water, e.g., the use of the Gravity Recovery and Climate Experiment (GRACE) missions to estimate changes in stored water in the water-poverty-environment nexus, pollution, agriculture and disaster management, where geospatial techniques are applied under strong environmental impact assessment regulatory regimes. This book provides a good summary of economic theories of poverty as well as a vivid depiction of the state of environmental degradation in the world. People often work separately on different issues that are, in fact, closely intertwined. The principle of holism is that the whole is greater than the sum of its parts, and I believe that this joint-venture of two experts on poverty and environment has produced something more than a sum of two separate monographs on the issues. Various points raised in this volume are worth heeding when we think of formulation and implementation of a truly effective post-MDGs development agenda. *Reconfiguring Global Health Innovation* Padmashree Gehl Sampath,2010-10-20  
Reconfiguring Global Health Innovation presents the findings of multi-year research, contrasting experiences of different latecomer countries in building health innovation systems to cater to local needs. It analyses the emerging industrial structures in health innovation as more and more latecomer countries are foraying into what is a highly difficult and technologically intensive sector, with the aim of finding ways and means to balance these promising developments with public health needs worldwide. The book presents empirical findings from six countries across Asia and Africa on health innovation, namely, India, Bangladesh, Vietnam, Kenya, Tanzania and Nigeria. The book concludes that the growth of knowledge and the accumulation of capabilities influence the ability of a country to generate wealth.

**The Imperative of Development** Geoffrey Gertz,Homi Kharas,Johannes F. Linn,2017-09-12 The achievements and legacy of the Wolfensohn Center for Development at Brookings The Imperative of Development highlights the research and policy analysis produced by the Wolfensohn Center for Development at Brookings. The Center, which operated from 2006 to 2011, was the first home at Brookings for research on international development. It sought to help identify effective solutions to key development challenges in order to create a more prosperous and stable world. Founded by James and Elaine Wolfensohn, the Center's mission was to "to create knowledge that leads to action with real, scaled-up, and lasting development impact." This volume reviews the Center's achievements and lasting legacy, combining highlights of its most important research with new essays that examine the context and impact of that research. Six primary research streams of the Wolfensohn Center's work are highlighted in The Imperative of Development: the shifting structure of the world economy in the twenty-first century; the challenge of scaling up the impact of development interventions; the effectiveness of development assistance; how to promote economic and social inclusion for Middle Eastern youth; the case for investing in early child development; and the need for global governance reform. In each chapter, a scholar associated with the particular research topic provides an overview of the issue and its broader context, then describes the Center's work on the topic and the subsequent influence and impact of these efforts. The Imperative of Development chronicles the growth and expansion of the first center for development research in Brookings's 100-year history and traces how the seeds of this initiative continue to bear fruit.

Reimagining Global Health Paul Farmer,Arthur Kleinman,Jim Kim,Matthew Basilio,2013-09-07 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, Reimagining Global Health provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout Reimagining Global Health bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.
