**Decoding Roulette** Stephen Tabone, 2018-06-06 Decoding Roulette contains two winning Roulette Systems formed by Bestselling casino games Author, Stephen R. Tabone. Both have been moulded into workable strategies that're logical and easy to apply. In the first, 1:1 even chance System, the Author has constructed a clever, easy to follow, non-risky betting progression that can be used by all those serious about winning and making money betting on Roulette. In the second System, the Author identifies reoccurring patterns found within random outcomes that appear on Roulette scoreboards. All 36 numbers have logical corresponding same type, even chance connections, and are grouped closely on the wheel and betting layout. The Author has developed a betting method that takes full advantage of the way these links function. Again, the rules of this System are easy to follow and include a stop loss and bet again trigger. Winning at Roulette online and offline begins with putting a workable method into action. The Systems in this book, devised by a Roulette Pro have been developed and tested so each one battles well against the house edge.

*The Roulette Supernova System (RSS15)* Stephen Tabone, 2020-01-22 The Roulette Supernova System (RSS15) / Flat Betting 15 Numbers into Profit - For use on European or American Roulette Wheels / The automatized skill of The Roulette Supernova System RSS15 is capable of outperforming the cleverest of computer programmes and the seasoned professional roulette bettor. It is the ultimate roulette predicting system. For use on European or American Roulette Wheels. / I am very excited to write about my new Roulette System. If you are looking for a roulette system that actually works, i.e. one that is able to make a profit during a Roulette session (certain amount of games/spins) most of the time, then look no further. This is it! The Roulette Supernova System

(RSS15) works on single, double and triple zero 'live' wheels. When I write live, I mean human dealer-initiated games that are truly random and where games are conducted in regulated casinos, not online, non-random algorithms or manipulated air wheels. After developing and testing RSS15, I discovered an anomaly. Now, when I observe live roulette wheels in casinos, I began to see roulette as all very easy and predictable. In using RSS15, I now consider a wheel as being small and the games in motion not so complex in terms of being able to generate profits. For more than 20 years I have studied bet selection options on the table layout in relation to previous outcomes. I have observed sequences of outcomes and considered the probabilities of one and more numbers appearing in any one session of play pertaining to a limited number of games. I have analysed many hundreds of thousands of live and random computer-generated outcomes. I have played and watched countless players bet in various casinos, considering why we chose the number/s we do and on what basis we believe those number/s have a chance of occurring moreover in most instances before the dealer has even spun the ball. No doubt you would have realized too that Roulette is a hard game to beat. I thought so too until I started to look at what drives the game. And by this, I mean the dealer, ball, wheel relationship. You see most people who play Roulette focus on their numbers, their lucky numbers, or where the dolly marker is placed on the table betting layout from spin to spin or go against or going with streaks of even chances or any of the 2-to-1 pay-out betting option odds. On the whole players are struggling to maintain not only a profitable advantage but are fighting to keep their bankrolls alive. It is like trying to keep a patient alive on life support while the vampire dealers, the casino bosses and demon house edge conspire to suck the blood from the poor souls. There are two main elements to winning when playing Roulette. The first is knowing when to stop and the second is knowing how to get to the profitable side of stopping. To know how to achieve both in order to win as an Advantage Player and Pro Roulette player, you need a proven Roulette System that will deliver. One that is able to hold its own on 'any live Roulette wheel' and you will need to learn when you should take profits and end a session and why this is important. I cover all these aspects in this book as I explain what my roulette system is, how and why it works and how to apply it in practice. Contents: Introduction to, The Roulette Supernova System (RSS15) Up and Down Waves Why Flat Betting for RSS15? Why RSS15 Works Why 15 Numbers? Live Wheels vs Computer or Air Wheels for Testing Outcomes How to Play RSS15 in Practice and why it works Session Winning Target How Much Profit to aim for Session Stop Loss Pros and cons of RSS15 Tweaking RSS15 End Statement

*Roulette Strategy - Dozens and Columns Using CONTROL* Johnny Depot, 2012-10-31 Roulette Strategy - Dozens & Columns using C.O.N.T.R.O.L. teaches the gambler an effective and winning system when playing american roulette. Many casino players are lured to the roulette wheel, but have no

idea on how to attack casino roulette. Most players over-bet and make bad decisions like betting on favorite numbers, birthdays and many other foolish things. If you want to play with the roulette odds in your favor, then you need to have a plan. My book provides a complete plan and the best part is it works for casino roulette and internet roulette. It doesn't matter if you like to take a trip to the local casino, go to vegas or play roulette online since our roulette strategy works everywhere. The fact of the matter is that most roulette players lose money. I know, since I used to be one of them. I realized that if I wanted to have a chance at beating the roulette wheel, I needed to change my thinking. I needed to quit dreaming about the wheel barrow full of money I was going to win and start concentrating on how little I would lose. My roulette strategy needed to be simple, but my approach needed to change. That's when I invented C.O.N.T.R.O.L. I knew how to play american roulette, but I had no concept of how to bet. C.O.N.T.R.O.L. gave me the answers I needed by answering the important questions like how much money do I bring to play roulette, which plays do I make (no matter if I was playing casino roulette or internet roulette) and how much do I bet. In today's era you can log into your computer and play roulette online twenty four hours a day, seven days a week. You need to have some kind of control (no pun intended) to keep yourself from going broke too fast. C.O.N.T.R.O.L. completes my roulette strategy and teaches me how to make the most money when things are going good and more importantly when to stop and cut my losses down when things are going bad.

It works on many online casinos offering live dealer roulette, both American and European wheels. Minimum bankroll required. Excellent win rate.

*Roulette's R+Evolution* Tim Duncan, 2013-07 Introducing a revolutionary new prediction method, for roulette wheels, called dynamic projection method (DPM). This has revolutionized the way in which the player has historically faced the probabilities to play roulette. This system provides the essential tools, for analysis of data generated by any casino roulette, using artificial acceleration mechanisms, thus reducing 95%, the sampling of key data for individual analysis, of a spinner, and increasing up to 10 times the accuracy, on an event prediction. These methods analyze the roulette differently than traditional techniques hitherto known, so finding a spinner with exploitable flaws, also called (BIASED WHEELS), is very hard to find today. This latter technique, considers the imperfections in a wheel, usually insignificant, when to get satisfactory results, or advantage, considering that today's casinos, monitor the behavior of their spinners, aligning and balancing regularly, thereby gaining considerable uniformity in the outcome of their statistics. It would be easier to find a dinosaur alive in our times, that meets one of those (biased wheel). They (biased wheels) belong to the past. Given this reality, we can conclude that the systems were successful yesterday, but today, simply will not work. With this new system, you will be one step further in the changing dynamics of probabilities. At par in the evolutionary process, of predictive systems. Unlike the (DPM) focuses on benefits for the player, taking advantage of the possibility of

occurrence that has certain numbers at specific times of the game, in what is known as: MOMENTUM.

**Internet Gambling** Sally Gainsbury,2012-03-02 Internet gambling is one of the fastest growing forms of gambling. Global Internet gambling expenditure is predicted to reach US\$33.6 billion in 2011. This is higher than worldwide movie box office revenues and represents 9% of the international gambling market. The rapid increase in expenditure of 354% since 2003 has occurred despite Internet gambling being prohibited in several key markets, including the US and China. It also suggests that current regulation may be somewhat outdated and ineffective as more and more people turn to this mode of gambling. Internet gambling is highly accessible with over 2,400 sites available 24/7 through computers, mobile phones, wireless devices and even interactive televisions. Gamblers can now play casino games, bingo, cards and

poker, bet on races, sports and even celebrity weddings using over 199 means of electronic payments without leaving the house. Increasing international jurisdictions are legalizing Internet gambling and the constant accessibility of online gambling has critical social implications. Gambling operators are using aggressive advertising campaigns to move into new markets. Internet gambling appears to be particularly appealing to youth, who are gambling online at substantially higher rates than adults. Furthermore, Internet gambling appears to be related to problem gambling, with rates of problem gambling three to four times higher among Internet than non-Internet gamblers, indicating that it may have a substantial social cost. The anonymity of online sports betting poses a significant threat to the integrity of sport at all levels with increasing allegations of match-fixing and cheating. Estimates suggested that 50% of all bets on the 2010 FIFA World Cup were placed online, worth an estimated £500 million. These figures represent a 700% rise in online betting since the 2006 tournament and included many new players that opened online accounts. It is essential that appropriate responses are made by governments, industry professionals and the public in response to Internet gambling. This book will provide a comprehensive and up-to-date overview of Internet gambling, including the social impact and regulatory options. A global outline will include the characteristics and features of the many forms of Internet gambling, including the current market, and participation, and differences between Internet and non-Internet gambling. Specific regional considerations will be explored including regulatory responses and options. Importantly, the social consequences and costs of Internet gambling will be examined, including the impact of online gambling on sports, youth and problem gambling. Strategies for prevention and responsible gambling will be considered as well as expected trends.
