Online TV Catherine Johnson,2019-01-04 With growth in access to high-speed broadband and 4G, and increased ownership of smartphones, tablets and internet-connected television sets, the internet has simultaneously begun to compete with and transform television. Online TV argues that these changes create the conditions for an emergent internet era that challenges the language and concepts that we have to talk about television as a medium. In a wide-ranging analysis, Catherine Johnson sets out a series of conceptual frameworks designed to provide a clearer language with which to analyse the changes to television in the internet era and to bring into focus the power dynamics of the online TV industry. From providing definitions of online TV and the online TV industry, to examining the ways in which technology, rights, interfaces and algorithms are used to control and constrain access to audiovisual content, Online TV is a timely intervention into debates about contemporary internet and television cultures. A must-read for any students, scholars and practitioners who want to understand and analyse the ways in which television is intertwining with and being transformed by the internet.

Television Versus the Internet Barrie Gunter,2010-09-01 This book will explore the questions raised by the technological developments that have encouraged the multiplication of TV channels. TV is moving through a period of rapid change. Governments around the world are switching from analogue to digital forms of transmission to further expand the amount of content that TV signals can carry. At the same time, competition for eyeballs has also grown from outside that traditional marketplace with the emergence of the Internet. The roll-out of broadband and increased bandwidth has had the greatest impact on television because online technology can readily convey the same content. All these changes have created a great deal more competition for viewers within the traditional TV marketplace. The Internet has proven to be especially popular with young people who have adopted its applications to a far greater extent than their elders, though even the latter have now begun to take up online activities in significant numbers. Are these audiences the same? Do people make a choice between these two media or do they use them both at different times and for different reasons? Can television utilise the Internet in profitable ways to enhance its market position? Will television have to evolve from its current state to provide the kinds of content reception services to which people have become accustomed in the online world? If it does need to change to survive, will this nevertheless mean a radical new configuration of content and the disappearance of 'channels' with fixed, pre-determined programme schedules? Examines the implications of new interactive communications technologies for the way people will use television in the future Presents an analysis of changing styles of television viewing and changing orientations towards television Examines the growing importance of the broadband internet as a source of information and entertainment

Webcasting Worldwide Louisa S. Ha,Richard J. Ganahl,2013-03-07 Webcasting Worldwide tackles one of the most timely topics in mass communication today—the delivery of audio and video content via the Web, or webcasting—employing a global perspective to explore the subject. It is unique in providing a theoretical framework by which to analyze business models of emerging media, and it also examines the business practices of leading webcasters in the world's most developed broadband markets. With webcasting in its early development, the approaches discussed in this volume set the standards for the webcasting industry. Representing the major broadband markets in the world, this text is an authoritative and valuable reference for both researchers and practitioners. The chapters relate the business practices of webcasting to the media market environment and established media industries, such as television and radio, as well as government and non-profit organizations. Downloadable resources offer PowerPoint charts for use in training, education, and research, along with tables, graphs, screenshots, and hyperlinks. Webcasting Worldwide is essential reading for academic researchers and media industry practitioners, and the volume will be a useful text in advanced courses addressing media technology, media management, and international communication. For updates about the book chapters and latest commentaries on topics related to webcasting business models, please visit the Webcasting Business Models Blog at http://webcastingworldwide.blogspot.com Winner of The Association for Education in Journalism and Mass Communication Picard Award for Media Management and Economics 2007.

Affinity Online Mizuko Ito,Crystle Martin,Rachel Cody Pfister,Matthew H. Rafalow,Katie Salen,Amanda Wortman,2018-12-18 How online affinity networks expand learning and opportunity for young people Boyband One Direction fanfiction writers, gamers who solve math problems together, Harry Potter fans who knit for a cause. Across subcultures and geographies, young fans have found each other and formed community online, learning from one another along the way. From these and other in-depth case studies of online affinity networks, Affinity Online considers how young people have found new opportunities for expanded learning in the digital age. These cases reveal the shared characteristics and unique cultures and practices of different online affinity networks, and how they support "connected learning"—learning that brings together youth interests, social activity, and accomplishment in civic, academic, and career relevant arenas. Although involvement in online communities is an established fixture of growing up in the networked age, participation in these spaces show how young people are actively taking up new media for their own engaged learning and social development. While providing a wealth of positive examples for how the online world provides new opportunities for learning, the book also examines the ways in which these communities still reproduce inequalities based on gender, race, and socioeconomic status. The book concludes with a set of concrete suggestions for how the positive learning opportunities offered by online communities could be made available to more young people, at school and at home. Affinity Online explores how online practices and networks bridge the divide between in-school and out-of-school learning, finding that online affinity networks are creating new spaces of opportunity for realizing the ideals of connected learning.

Innovative and Creative Industries in Hong Kong Grace L K Leung,2018-10-29 The experience of Hong Kong's innovative and creative industries and the challenges they face serves as an important case study for other Chinese and Asian cities that are actively developing their innovative and creative industries in the era of globalization. The return of sovereignty over Hong Kong back to China in 1997 has led to both collaboration and competition between the two places in innovative and creative sectors for the Greater China and Asian Regions. Hong Kong has remained unique in spite of the integration, but she has to strike a delicate balance between being simultaneously a Chinese and an international city. This book looks at different innovative and creative industries, such as international art and culture exhibition, innovative technology, digital entertainment, TV and movies, as well as government policy for innovative and creative industries, particularly the changing competitive landscape brought about by the latest Great Bay Area development. Drawing insights from cultural history, innovation economics, cultural policy studies, and cultural geography, this book explores the opportunities and challenges of Hong Kong's innovative and creative industries, in particular after the change of sovereignty in 1997. It demonstrates that the city's legacy, and heavy government input in capital, do not guarantee their sustainable development. This is a book not only for policymakers or academics interested in innovative and creative industries but also to students contemplating a career in these areas in Hong Kong, the Greater China and the Asian Region.

Connected Viewing Jennifer Holt,Kevin Sanson,2013-12-04 As patterns of media use become more integrated with mobile technologies and multiple screens, a new mode of viewer engagement has emerged in the form of connected viewing, which allows for an array of new relationships between audiences and media texts in the digital space. This exciting new collection brings together twelve original essays that critically engage with the socially-networked, multi-platform, and cloud-based world of today, examining the connected viewing phenomenon across television, film, video games, and social media. The result is a wide-ranging analysis of shifting business models, policy matters, technological infrastructure, new forms of user engagement, and other key trends affecting screen media in the digital era. Connected Viewing contextualizes the dramatic transformations taking place across both media industries and national contexts, and offers students and scholars alike a diverse set of methods and perspectives for studying this critical moment in media culture.

Strategy, Structure and Corporate Governance Nabyla Daidj,2016-07-01 Since the beginning of the 2000s, important changes in external environments have affected the corporate governance practices of firms all around the world. The corporate governance structure in each country develops in response to country-specific factors and conditions. Firms are currently engaged in a variety of dynamic business relationships such as business networks, strategic alliances, and conglomerates especially in high technology sectors. Strategy, Structure and Corporate Governance by Nabyla Daidj, proposes to analyze the main trends and drivers of change in corporate governance of several kinds of organizations: - Large conglomerates. The development of large and complex conglomerate organizations have played an important role in the economy in Japan but also in other countries such as Korea with chaebols, which can be defined as closely intertwined industrial groupings. - Inter-firms networks (districts, clusters etc.); and, - 'Recent' forms of inter-firms networks (business ecosystems). The author examines several case studies and shows how shifts in markets and global competition are reconfiguring transactions within these organizations and are impacting corporate governance systems.

Social and Economic Transformation in the Digital Era Georgios I. Doukidis,Nikolaos Mylonopoulos,Nancy Pouloudi,2004-01-01 Annotation Researchers, business people and policy makers have recognized the importance of addressing technological, economic and social impacts in conjunction. For example, the rise and fall of the dot-com hype depended on the strength of the business model, on the technological capabilities avalable to firms and on the readiness of the society and economy, at large, to sustain a new breed of business activity. Social and Economic Transformation in the Digital Era addresses this challenge by assembling the latest thinking of leading researchers and policy makers in key subject areas of the information society and presents innovative business

models, case studies, normative theories and social explanations.
