OECD Rural Studies Enhancing Rural Innovation in the United States OECD,2023-11-16 When it comes to high-tech innovations, the United States leads the path amongst OECD economies. However, in the context of the national record-breaking activities in high tech innovation, there lies distinct and growing geographical disparities. This report dives into strategies for better understanding innovation that occurs in rural places, and places outside major metropolitan areas, often going beyond science and technology.

Called for Traveling Tyler Smith,2017-10-24 Called for Traveling is a pro basketball journey that spans four continents, seven countries and twelve teams over eleven hilarious and adventurous years. After playing his college ball at Penn State, Tyler Smith had a path in mind of where he wanted his pro basketball career to lead. Bringing his own toilet paper to away games, courts made of concrete, and fully-gearied riot police at every stadium were not part of his original dream. Where were all the big contracts people talked about? Would he even have a job next season—or next week? And would he be playing for free this month because the team didn't feel like paying him? In this highly unstable and unorthodox overseas lifestyle as a professional basketball player, Smith draws readers in quickly with his humor and ability to share his clever stories that seem outrageous, but are 100 percent true. His attitude and faith are tested relentlessly through bounced paychecks, injuries, and the seemingly endless frustrating reality of people around him speaking a language he could not understand. From Italy to Japan to Uruguay, and even the NBA, the challenges and adventures only accelerate as Tyler's wife and kids are added to the overseas equation. His unique story is highly engaging whether or not you're a basketball junkie. Called for Traveling is an honest and entertaining inside look at one man's journey playing pro basketball around the world.

Influence and Behavior Analysis in Social Networks and Social Media Mehmet Kaya,Reda Alhajj,2018-12-11 This timely book focuses on influence and behavior analysis in the broader context of social network applications and social media. Twitter accounts of telecommunications companies are analyzed. Rumor sources in finite graphs with boundary effects by message-passing algorithms are identified. The coherent, state-of-the-art collection of chapters was initially selected based on solid reviews from the IEEE/ACM International Conference on Advances in Social Networks, Analysis, and Mining (ASONAM '17). Chapters were then improved and extended substantially, and the final versions were rigorously reviewed and revised to meet the series standards. Original chapters coming from outside of the meeting round out the coverage. The result will appeal to researchers and students working in social network and social media analysis.
