101 Essays for IAS/ PCS & other Competitive Exams Disha Experts, Most of competitive exams test a candidate's writing skills with the inclusion of Descriptive Questions in the form of separate test(s). These tests are mainly aimed at checking how well a student is aware of his/ her surroundings and how well he/ she can express the same. Clarity of thought is what is required to crack these exams. The Descriptive Questions cover Essay Writing, Article Writing, Making Arguments in favour or against and Opinion Expression to evaluate the aspirant's writing ability. 101 Essays by Disha has been designed for the aspirants of UPSC Mains, various State PSCs, and other competitive exams like MBA, Bank PO etc.. The book emphasises on the importance of a cogently written essay and the art of essay writing. The book has a special coverage of India as most of competitive exams these days ask rather deeply in respect of issues pertaining to their own country. With this approach, 101 Essays aims to provide a complete roadmap for aspirants aiming to maximize their scores in such Descriptive Questions. The book contains 101 essays of varied variety covering topics of Current Affairs, Social Issues, Environment, Politics, Education, Economy, Science & Technology, International Affairs, Personalities, Sports, etc. All the essays in the book provide sufficient information and data thus providing an insight into the crux of the issues stimulating the thinking ability of the students. 101 Essays has been structured such that it incorporates all the latest and important fascinating topics pertaining to India and the world presented in a classical style. Each essay is a model essay both in respect of language and matter and has fast-flowing facts narrated in a simple and lucid language. The book for sure will prove highly beneficial to students in their academic pursuits and to those preparing for various competitive exams.

*Divine Dharma Save-Seed* Satyajit Patidar,2021-05-14 I am on a mission to explain to the world the real fact that the human brain is NOT his mind, rather his seed's DNA is his mind (more specifically, the blue strand of the DNA spiral). Human brain is merely an evolved form of rRNA of the zygote, which processes the mRNA and tRNA wirelessly. Like the CPU of the computer, brain is a non-codon processing organ, which processes the genetic codes of the seed's DNA (mind) through a wireless nerve system called Sushumna-Ada-Pingla. To know the wireless processing of the seed genetics in the brain, read this book. Unless seeds are saved, brain cannot produce any significant outcome. If the seeds are saved, then all the thoughts of the seed's mind come true naturally. Understand, follow and share Save-Seed awareness to make the world a heaven.

*Strong Women, Strong Communities* Tyannah Brown,Rachelle Gooden,Anne Moraa,Tara Kapoor,Chidinma Blessing Okafor,Amanda Ottley,2023-01-15 This collection of children's stories features a diverse cast of characters who are all inspired by real-life Canadian women. Set against the backdrop of the COVID-19 pandemic, the stories follow these women as they use their creativity, leadership, and determination to make a difference in their communities. From creating platforms for Black creatives to share their work to fighting for healthcare funding and support to building strong bonds of sisterhood, these stories are sure to inspire and empower young readers.

*Software Defined Internet of Everything* Gagangeet Singh Aujla,Sahil Garg,Kuljeet Kaur,Biplab Sikdar,2022-01-13 This book provides comprehensive discussion on key topics related to the usage and deployment of software defined networks (SDN) in Internet of Everything applications like, healthcare systems, data centers, edge/fog computing, vehicular networks, intelligent transportation systems, smart grids, smart cities and more. The authors provide diverse solutions to overcome challenges of conventional network binding in various Internet of Everything applications where there is need of an adaptive, agile, and flexible network backbone. The book showcases different deployment models, algorithms and implementations related to the usage of SDN in Internet of Everything applications along with the pros and cons of the same. Even more, this book provides deep insights into the architecture of software defined networking specifically about the layered architecture and different network planes, logical interfaces, and programmable operations. The need of network virtualization and the deployment models for network function virtualization is also included with an aim towards the design of interoperable network architectures by researchers in future. Uniquely, the authors find hands on practical implementation, deployment scenarios and use cases for various software defined networking architectures in Internet of Everything applications like healthcare networks, Internet of Things, intelligent transportation systems, smart grid, underwater acoustic networks and many more. In the end, design and research challenges, open issues, and future research directions are provided in this book for a wide range of readers

**Radar and RF Front End System Designs for Wireless Systems** Mehta, Shilpa,Kumar, Rupesh,2024-04-15 The escalating demand for advanced communication, sensing, and scanning systems across various applications as well as the urgency to comprehend the complexities of RF Frontend systems is more pronounced than ever. At the heart of this challenge lies the reconfigurability feature, playing a vital role in shaping the current trajectory of wireless technologies. The book Radar and RF Front End System Designs for Wireless Systems delves straight into this pressing issue and examines the relentless pace of innovation spurred by a myriad of configuration and design architectures. While these advancements hold great promise, they also introduce challenges that warrant thorough examination. Within the pages of this publication, a narrative unfolds that transcends theoretical discourse. The book offers a unique opportunity for academic scholars, researchers, and industry professionals to not only understand the intricacies of RF Frontend systems but also to grapple with the practical challenges posed by their rapid evolution. It becomes a guide in navigating this dynamic landscape, providing a deep exploration of the issues at hand and paving the way for informed solutions and breakthroughs.
