Working Around Disruptions of Network Infrastructures Amro Al-Akkad,2016-02-22 As in disasters the availability of information and communication technology services can be severely disrupted, the author explores challenges and opportunities to work around such disruptions. He therefore empirically analyzes how people in disasters use remnants of technology to still communicate their needs. Based on this, he suggests quality attributes whose implementation can support the resilience in technology. To exemplify this he develops iteratively two mobile ad-hoc systems and explores their feasibility and implications for emergency response under close-to-real conditions. Compared to the state of the art both systems are independent from preexisting network infrastructure and run on off-the-shelf smartphones.

The Open Garden Organization Amith Nagarajan,2018-07-19 Is Your Association Equipped for the Digital Age? The future of the association industry is unclear. Within today's cultural shift in the economic, political, and social climates, associations need to be flexible and ready to evolve to meet the needs of both their audiences and world at large. Today, the threat to associations is the possibility of becoming antiquated due to their lack of willingness or ability to change and modernize with the culture around them. However, this situation also presents an amazing opportunity to experiment, innovate, and ultimately achieve sustainable growth and new levels of mission attainment. In Amith Nagarajan's The Open Garden Organization: A Blueprint for Associations in the Digital Age, readers will learn how to experiment in new ways and drive progress forward within their organizations. The backbone of Amith's method lies in the Open Garden Model, which focuses on three main principles: purpose, culture, and inclusivity. The Open Garden Model encourages associations to: - clarify and deepen purpose; - discover and live their values; - embrace a future of uncertainty by taking on many small risks to experiment and learn; - shift their business model to one that embraces an inclusive and expansive audience, reaching far beyond the scope of traditional membership. The Open Garden Model will help associations grow their new market far beyond their traditional base, create new and sustainable revenue streams, and elevate their brand's credibility and member loyalty. Ensure your association has the ability to sustain and thrive in today's changing world.

Addressing Brain Injury in Under-Resourced Settings Ross Balchin,Rudi Coetzer,Christian Salas,Janice Webster,2017-10-30 Many of the world's population have no access to appropriate diagnostic, neurorehabilitative or support services following brain injury. Addressing Brain Injury in Under-Resourced Settings: A Practical Guide to Community-Centred Approaches tackles this unacceptable gap in service provision by empowering the reader to provide basic care, education and support for patients with brain injuries and their families. Written for an audience which does not necessarily have any prior knowledge of the brain, neurorehabilitation or brain injuries/pathologies, this practical guide first examines the global context of brain injury, considering the cross-cultural realities across communities worldwide. The book goes on to explore the reality of brain injury and how to work with its consequences, offering practical knowledge and advice in a user-friendly, richly illustrated format. It provides easily digestible information about the brain, including its normal functioning and the ways in which it can be damaged through injury and disease. The book also covers the basic skills needed to identify neurological difficulties and provides guidance on basic rehabilitation input and support. The final section of the book covers how to provide services, including working with organisations and communities, volunteering, initiating and developing

community-based projects and programmes, and caring for patients and their families from emergency to recovery to rehabilitation. This book is an invaluable resource for community health workers, voluntary sector workers and all professional healthcare providers who work with brain-injured patients around the world. It will also be important reading for policy developers, fundraising organisations and those who work with global humanitarian initiatives.

Alien, Inc Peter Ackers,2013-07-02 When a plane crossing the Serengeti desert is forced to land due to malfunction, the passengers manage to find refuge at a large satellite tracking facility. It's big and sophisticated and it's got all they need: hot and cold running water, comfy beds, and a large fence to keep the predators out. But they're about to discover that the deadliest animals are on the inside. Something from out there where the satellites roam has become trapped here, and it's turned all the staff into mutated zombies. For the eleven survivors of the plane crash, that big old fence keeping the predators out has turned their safe haven into a prison. And they're serving a death sentence.

In addition to the best and most popular easy-to-grow alpine plants, the author describes many lesser known varieties of outstanding beauty which can be grown in the open garden with a minimum of attention. Plant descriptions are followed by comprehensive information on culture and propagation, so that the book will appeal not only to newcomers to alpine gardening, but also to those established enthusiasts looking for solid tips and advice.
