The Minimum You Need to Know to Be an OpenVMS Application Developer Roland Hughes,2018-12-01 This book is written to allow a developer from another platform, familiar with one of the covered languages to quickly come up to speed on the most robust operating system ever created. The same application is redeveloped with each language and tool. If a developer knows C or C++ and needs to learn COBOL, FORTRAN or BASIC they can quickly compare the design and development trade-offs learning the language far more quickly. Both RMS indexed file and relational database development are covered. When working with MySQL, only the C language is covered. The FMS screen handler is covered. This screen handling package may be one of the oldest on the platform, but it has such a massive installed base you will almost certainly encounter it should you choose to do development on this platform. Tackling Antibiotic Resistance from a Food Safety Perspective in Europe ,2011 Antibiotics have revolutionized the treatment of infectious diseases. But their use and misuse have resulted in the development and spread of antibiotic resistance. This is now a significant health problem: each year in the European Union alone, over 25 000 people die from infections caused by antibiotic-resistant bacteria. Antibiotic resistance is also a food safety problem: antibiotic use in food animals -for treatment, disease prevention or growth promotion - allows resistant bacteria and resistance genes to spread from food animals to humans through the food-chain. This publication explores the options for prevention and containment of antibiotic resistance in the food-chain through national coordination and international cooperation, including the regulation and reduction of antibiotic use in food animals, training and capacity building, surveillance of resistance trends and antibiotic usage, promotion of knowledge and research, and advocacy and communication to raise awareness of the issues. This publication is primarily intended for policy-makers and authorities working in the public health, agriculture, food production and veterinary sectors, and offers them ways to take a holistic, intersect oral, multifaceted approach to this growing problem.
