Teacher Reform in Indonesia

Mae Chu Chang, Sheldon Shaeffer, Samer Al-Samarrai, Andrew B. Ragatz, Joppe de Ree, Ritchie Stevenson, 2013-12-18 The book features an analysis of teacher reform in Indonesia, which entailed a doubling of teacher salaries upon certification. It describes the political economy context in which the reform was developed and implemented, and analyzes the impact of the reform on teacher knowledge, skills, and student outcomes.

Handbook of Education Policy Studies Guorui Fan,Thomas S. Popkewitz,2020-06-10 This open access handbook brings together the latest research from a wide range of internationally influential scholars to analyze educational policy research from international, historical and interdisciplinary perspectives. By effectively breaking through the boundaries between countries and disciplines, it presents new theories, techniques and methods for contemporary education policy, and illustrates the educational policies and educational reform practices that various countries have introduced to meet the challenges of continuous change. This volume focuses on policies and changes in schools and classrooms. The studies on school changes present the differences in the policies and challenges of K-12 schools and universities in different countries and regions, and in connection with the contradictions and conflicts between tradition and modernization, as well as the changing roles of various stakeholders, especially that of teachers. In terms of curriculum and instruction, many countries have undertaken experiments and introduced changes based on two major themes: “what to teach” and “how to teach”. International education assessments represented by PISA not only promote the improvement and extensive application of educational assessment and testing techniques, but have also had far-reaching impacts on education policies and education reforms in many countries. Focusing on the changes in educational policies at the micro level, this volume comprehensively reveals the

complex interactions between school organizations, teachers, curricula, teaching and learning, evaluation and other elements within the education system, as well as the latest related reforms worldwide.

The Change Laboratory Jaakko Virkkunen,2013-12-31 A new challenge of learning in work organizations--both in business and public administration--is to master entire life cycles of product, production and business concepts. Meeting this challenge calls--at all levels of the organization--for learning that expand the learners' horizon and practical mastery from individual tasks up to the level of the whole system of the collective activity and its transformation. The Change Laboratory is a method for formative intervention in work communities that supports this kind of organizational learning. It is a path breaker in the area of work place learning due to its strong theoretical and research basis and the way that it integrates the change of organizational practices and individuals' learning. It provides a way to develop practitioners' transformative agency and capacity for creating and implementing new conceptual and practical tools for mastering their joint activity. This first comprehensive presentation of the already widely used method is written for researchers, consultants, agricultural extension and HRD professionals, as well as practitioners involved in developing activities in their professional field. It explains this novel method as well as its theoretical basis on the Cultural Historical Activity Theory providing also practical examples and tools for carrying out a Change Laboratory intervention. A review is also provided of studies concerning various aspects of expansive learning

processes in Change Laboratory interventions.
