Web Personalization in Intelligent Environments Giovanna Castellano,Anna Maria Fanelli,2009-09-30 At first sight, the concept of web personalization looks deceivingly simple. A web personalization system is a software component that collects information on visitors to a web site and leverages this knowledge to deliver them the right content, tailoring presentation to the user's needs. All over the world, web designers and web content managers rely on web personalization solutions to improve the effectiveness and - ability of their web-based applications. Still, the scientific foundation of web personalization remains a controversial issue. Practitioners know very well that when properly implemented, personalization del- ers a much better user experience; but when it is poorly implemented, personalization may backfire and even distract the user's attention away from some useful (and co- ly-to-develop) enriched content. In other words, tailoring content, and varying it routinely, may make a site more attractive; but an unstable site look can have a negative impact on the overall m- sage. Everybody seems to agree that this is a real danger; but there are specific qu- tions that are much harder to answer convincingly.

Assessment of the Continuing Operability of Chemical Agent Disposal Facilities and Equipment National Research Council,Division on Engineering and Physical Sciences,Board on Army Science and Technology,Committee on Continuing Operability of Chemical Agent Disposal Facilities and Equipment,2007-03-08 The U.S. Army's Chemical Materials Agency (CMA) currently oversees contracts for the operation of chemical agent stockpile incineration facilities at four disposal sites. Because the period of time required to dispose of these chemical agents has grown beyond that originally planned, the Army is becoming concerned about the possibility of growing operational problems as the processing equipment ages. To help address these concerns, the CMA requested the NRC to assess whether current policies and practices will be able to adequately anticipate and address facility obsolescence issues. This report presents a review of potential infrastructure and equipment weaknesses given that the facilities are being operated well beyond their original design lifetime; an assessment of the Army's current and evolving obsolescence management programs; and offers recommendations about how the programs may be improved and strengthened to permit safe and expeditious completion of agent stockpile destruction and facility closure.

Black Opera Naomi Andre,2018-05-04 From classic films like Carmen Jones to contemporary works like The Diary of Sally Hemmings and U-Carmen eKhayelitsa, American and South African artists and composers have used opera to reclaim black people's place in history. Naomi André draws on the experiences of performers and audiences to explore this music's resonance with today's listeners. Interacting with creators and performers, as well as with the works themselves, André reveals how black opera unearths suppressed truths. These truths provoke complex, if uncomfortable, reconsideration of racial, gender, sexual, and other oppressive ideologies. Opera, in turn, operates as a cultural and political force that employs an immense, transformative power to represent or even liberate. Viewing opera as a fertile site for critical inquiry, political activism, and social change, Black Opera lays the foundation for innovative new approaches to applied scholarship.
