Applications and Systematics of Bacillus and Relatives Roger Berkeley, Marc Heyndrickx, Niall Logan, Paul De Vos, 2008-04-30 Inspired by the pace of change in the taxonomy of the aerobic endospore-forming bacteria, the Bacillus 2000 symposium on which this book is based was held in Bruges, Belgium, in August 2000, and was supported by the Federation of European Microbiological Societies, the Belgian Society for Microbiology, and several commercial sponsors. Bringing taxonomists interested in Bacillus and its relatives together with people who work with these organisms in medicine, agriculture, and industry, allowed those attending to appreciate the overlaps and interactions of their areas of expertise, in the absence of any comprehensive treatment of the current systematics of the group. The meeting was a great success, and has resulted in the production of these proceedings, Applications and Systematics of Bacillus and Relatives, providing an up-to-date and comprehensive treatise on the classification, identification and applications of the aerobic endospore-forming bacteria; it is an essential reference for all microbiologists interested in these organisms. Valuable reference work for all those interested in the systematics of Bacillus and its relatives. Produced in response to the successful Bacillus 2000 meeting in Bruges and was supported by the Federation of European Microbiological Societies, the Belgian Society for Microbiology, and several commercial sponsors. Of use to those working in fields as diverse as medicine, agriculture, food and industry. Comprehensive and up-to-date analysis of the systematics of these organisms. Includes the application of sophisticated chemotaxonomic and genetic characterization methods.

Psychological Health of Women of Color Lillian Comas-Díaz,Beverly Greene,2013-05-23 This work serves to celebrate the strengths of women of color, identify unique opportunities, and examine the specific challenges and issues of this group. *Psychological Health of Women of Color: Intersections, Challenges, and Opportunities* is an anthology that examines core issues of women of color's emotional health and well-being. Organized by subject, the work comprises contributions from noted experts on the psychological health of women of color. The book analyzes the life stages of women of color: childhood, adolescence, adulthood, and old age. It serves to address the challenges women of color face in the forms of physical health, violence, substance abuse, psychopharmacology, and legal/forensic issues as well as to highlight diverse identity intersections and opportunities for women of color. The section on intersections of identity discusses the psychological health of lesbians of color, multiracial women, female immigrants of color, women with disabilities, and working mid-career women, while high achievers, leaders, mentors, athletes, artists, and spiritual individuals among women of color are addressed in the section on opportunities.

Our Mothers' Land Angela V John,2011-02-15 This volume marks the twentieth anniversary of the first publication of this groundbreaking book. It reflects the pioneering research of its contributors to the development of modern Welsh women's history. The eight chapters range widely across time (1830-1939) and place, from exploring working class women's community sanctions and the perils facing collier's wife to the very different lifestyles of ironmasters' wives. They also tackle the idealised images of respectable Welsh women in periodicals and the tragic reality of those who took their own lives as well as showing us the transgressive actions of suffrage rebels. They examine how women carved out space within movements such as temperance and track the fluctuating fortunes of women's employment and domestic life from the Great War to the eve of the Second World War. This volume makes available once more a book that has become a classic in its field and a vital part of the historiography of modern Wales. This expanded edition also brings us up to date. It reveals the research and publications of the last two decades and comments upon the extent to which Wales has moved beyond being the familiar 'land of our fathers'. Written in a lively and accessible style, it nevertheless draws upon a wealth of research and expertise and should

appeal to both the academic community and to a much wider readership.
