Political Responsibility for a Globalised World Ernst Wolff,2014-04-30 The aim of this book is to reflect on the complex practice of responsibility within the context of a globalised world and contemporary means of action. Levinas' exploration of the ethical serves as point of entry and is shown to be seeking inter-cultural political relevance through engagement with the issues of postcoloniality and humanism. Yet, Levinas fails to realise the ethical implications of the inevitable instrumental mediation between ethical meaning and political practice. With recourse to Weber, Apel and Ricoeur, Ernst Wolff proposes a theory of strategic co-responsibility for the uncertain global context of practice.

Baltic Energy Technology Scenarios 2018 Tomi J. Lindroos,Antti Lehtilä,Tiina Koljonen,Anders Kofoed-Wiuff,János Hethey,Nina Dupont,Aisma Vitiņa,2018-04-05 Baltic Energy Technology Scenarios 2018 (BENTE) is a scenario-based energy system analysis that explores the changes in the Baltic countries' energy systems. What are the drivers and their impacts in the following decades? What would be required for the Baltic countries to meet their climate and energy targets in 2030, and what development would lead the Baltics towards a 2°C pathway? The report finds that the Baltic countries' proposed renewable energy (RE) targets can be achieved using domestic resources. More renewable energy (electricity, heat and fuels) lets energy demanding sectors reduce GHG emissions and increase the RE share. However, the Baltic countries still do not reach their Effort Sharing Sector's 2030 targets in the 4°C Scenario (4DS). Without policies to stimulate local renewable energy generation, the Baltics are likely to become large net importers of electricity.

Grünvald,Kalle Kuusk,2018-12-11 This technical analysis for the Nordic Green to Scale for countries report was commissioned to Stockholm Environment Institute (SEI) Tallinn Centre. The project zooms in on two regions: the Baltic States, Poland and Ukraine in Europe; and Kenya and Ethiopia in East Africa. This report presents the emission reduction potential of 10 selected solutions for the European target countries. The study highlights the costs, savings and co-benefits of implementing the solutions as well as makes policy recommendations for capturing the potential. The project was carried out by the Finnish Innovation Fund Sitra, together with its partners CICERO, CONCITO and Institute of Sustainability Studies at the University of Iceland. The technical analysis was produced by the Stockholm Environment Institute Tallinn Centre. The project is part of the Nordic Council of Ministers' Prime Ministers' Initiative.

Handbook of Energy Governance in Europe Michèle Knodt,Jörg Kemmerzell,2022-09-21 This Handbook provides the most comprehensive account of energy governance in Europe, examining both energy governance at the European level and the development of energy policy in 30 European countries. Authored by leading scholars, the first part of the book offers a broad overview of the topics of energy research, including theories of energy transitions, strategies and norms of energy policy, governance instruments in the field, and challenges of energy governance. In the second part, it examines the internal and external dimensions of energy governance in the European Union. The third part presents in-depth country studies, which investigate national trajectories of energy policy, including an analysis of the policy instruments and coordination mechanisms for energy transitions. It closes with a comparative analysis of national energy governance.
