Code of Practice for Project Management for Construction and Development CIOB (The Chartered Institute of Building),2014-09-15 The first edition of the Code of Practice for Project Management for Construction and Development, published in 1992, was groundbreaking in many ways. Now in its fifth edition, prepared by a multi-institute task force coordinated by the CIOB and including representatives from RICS, RIBA, ICE, APM and CIC, it continues to be the authoritative guide and reference to the principles and practice of project management in construction and development. Good project management in construction relies on balancing the key constraints of time, quality and cost in the context of building functionality and the requirements for sustainability within the built environment. Thoroughly updated and restructured to reflect the challenges that the industry faces today, this edition continues to drive forward the practice of construction project management. The principles of strategic planning, detailed programming and monitoring, resource allocation and effective risk management, widely used on projects of all sizes and complexity, are all fully covered. The integration of Building Information Modelling at each stage of the project life is a feature of this edition. In addition, the impact of trends and developments such as the internationalisation of construction projects and the drive for sustainability are discussed in context. Code of Practice will be of particular value to clients, project management professionals and students of construction, as well as to the wider construction and development industries. Much of the information will also be relevant to project management professionals operating in other commercial spheres.

Engagiert sein in der Gegenwart Renata Dampc-Jarosz, Anna Kałuża, 2023-12-04 Der Band beschäftigt sich mit dem Begriff des Engagements, indem er literarische und künstlerische Projekte von internationalen Autorinnen und Autoren betrachtet, die als interventionistisch, kritisch und radikal konzipiert sind. Bezugspunkt solcher Arbeiten sind in der Regel konkrete Veränderungen in der sozialen, politischen und kulturellen Realität. Die Konfrontation mit verschiedenen literarischen, historischen, philosophischen und kulturellen Traditionen, die in diesem Band stattfindet, bereichert die Reflexion über die gegenwärtigen Möglichkeiten, Kunst, Literatur und Kultur in Prozesse der Transformation der nicht-künstlerischen Welt einzubinden. Es macht den Anschein, dass man heutzutage Zeuge einer neuen Beziehung zwischen Kunst, Wissenschaft und Aktivismus wird.

Transfer Effects in Multilingual Language Development Hagen Peukert, 2015-04-15 This volume, dedicated to language transfer, starts out with state-of-the-art psycholinguistic approaches to language transfer involving studies on psycho-typological transfer, lexical interference and foreign accent. The next chapter on Transfer in Language Learning, Contact, and Change presents new empirical data from several languages (English, German, Russian, French, Italian) on various transfer phenomena ranging from second language acquisition and contact-induced change in word order to cross-linguistic influences in word formation and the lexicon. Transfer in Applied Linguistics scrutinizes, on the one hand, the external sources of language transfer by investigating bilingual resources and the school context, but also by pointing out the differences in academic language in multilingual adolescents. On the other hand, internal sources of language transfer in multilingual classrooms are illuminated. A final chapter directs its focus on methodological issues that arise when more than one language is studied systematically and it offers a solution on causal effects for the investigation of heritage language proficiencies. The chapter also includes studies that exploit more innovative methodologies on L1 identification and clitic acquisition.
