**The Phl in the Stl** Earl Austin, Jr.,2009-04 This book celebrates the history and great achievements of those who participated in the great Public High League, which produced some of the best high school basketball ever played in the St.Louis area and the state of Missouri. The players and coaches who competed in the PHL have left a lasting legacy and their contributions to the area basketball scene will never be forgotten. In this publication, the author recapture some of those great memories through the hundreds of photos collected as well as the great stories as told by the former athletes and coaches themselves. The book chronicle the history of the PHL in many special sections. There are sections that spotlight the great players of the league as well as the great coaches and great teams and programs. Many of the athletes who appear in the section on great players were voted by fans of basketball who filled out ballots because they wanted to assure that certain players were recognized.

Philosophy and National Development in Nigeria Adeshina Afolayan,2018-05-15 What does it imply for Nigerian philosophers to conscientiously and engagingly reflect on Nigeria as a place of philosophy and as a dynamic plural context of socioeconomic, political, cultural and ethnic problems? Any answer to this question automatically constitutes the opening salvo to the reflection on the evolution of a Nigerian tradition of philosophy and philosophizing. This book represents such an initial salvo in its attempt to hammer out the conditions for the possibility of a Nigerian tradition of philosophy by placing that endeavor in between the triadic challenges of the Nigerian political economy, the African philosophical theorizing and the global epistemological hegemony. How do these three dynamics condition the evolution and functional relevance of the philosophical enterprise in Nigeria? How have Nigerian philosophers responded to them? What is Nigerian philosophy? How can there be a Nigerian philosophy when there are no Nigerians? This book is also an attempt to contribute to the trajectory of philosophy education in Nigeria within the context of a postcolonial educational system and university dynamics that stultifies the role of the intellectuals in development. From Plato to Wiredu, from Bodunrin to Bourdieu, and from Heidegger and Nietzsche to Fanon, Mignolo and Santos, the book traces a trajectory of dynamics rethinking of existing paradigms and epistemological assumptions that could enable a robust evolution of a Nigerian tradition of philosophy that possesses sufficient clout to confront its historicity and its place in Nigeria's development impasse.

**Challenges and Opportunities of Circular Economy in Agri-Food Sector** Rahul S Mor,Anupama Panghal,Vikas Kumar,2021-09-14 Global population by 2050 is predicted to be over 9 billion and accordingly, the production systems will demolish about 140 billion tons per year of minerals, ores, fossil fuels and biomass, i.e., thrice of the current need, and the food production itself has to be doubled. Optimized resource usage, lifecycle management, and reduced carbon emission have become a priority for agri-food businesses today, and circular economy (CE) helps for a sustainable and flexible way to grow without exhausting primary materials, and it thinks beyond recycling and resource usage. The word CE best relates to the resource and efficiency management, 6Rs, closed-loop production systems, zero waste and lifecycle engineering, reduced overconsumption of resources and waste generation, enriched system redesign and business model innovation, thereby leading to sustainable development goals. In this light, the book calls for theoretical and empirically sound contributions that are focused on the different aspects of the circular economy, 6R's, sustainable production and consumption, closed-loop systems, etc. in the agri-food sector.

**Planespotting: PHL in The 80s** Steven Macom,2009-11-30 PLANESPOTTING: PHL IN THE 80s is a photographic and textual exploration of airliner activity at Philadelphia International Airport during the 1980s, which includes images and descriptions of airlines and aircraft that have long since vanished from operation. Names like Eastern, Allegheny Commuter, TWA, Piedmont, and even Pan Am evoke memories from years past. PHL itself has grown to become today's hive of activity for domestic and international operations on a major scale. Nonetheless, the reality of today's world has dampened the ability to access the vantage points once enjoyed by spotters at airports around the globe. The enthusiasm and solidarity of spotters, however, remains strong, and that spirit can be felt through the pages of this publication. Anyone who has an interest in aviation, an interest in travel, or an association with the region will certainly enjoy this book.

**Modern Trends in Physics Research** Lotfia M. El Nadi,2011 Modern Trends in Physics Research MTPR-08 was the third of the International Conference series held biannually by the Physics Department in Faculty of Science of Cairo University.The objectives of the conference are to develop greater understanding of physics research and its applications to promote new industries; to innovate knowledge about recent breakthroughs in physics, both the fundamental and technological aspects; to implement of international cooperation in new trends in physics research and to improve the performance of the physics research facilities in Egypt. This proceeding highlights the latest results in the fields of astrophysics, atomic, molecular, condensed matter, lasers, nuclear and particle physics. The peer refereed papers collected in this volume, were written by international experts in these fields. The keynote lecture, ?Overview on the Era of the Exploration of the Planets and Planetary Systems,? delivered by Professor Jay M Pasachoff of Williams College ? Hopkins Observatory was featured in the proceedings. As 2008 was the 50th anniversary of the launch of Sputnik, which began the Space Age, this volume is a unique collection of keynote, plenary and invited presentations covering fields of astrophysics, atomic physics, condensed matter physics as well as nanotechnology, molecular physics and laser physics. This volume will serve as a useful reference for scientists in modern physics and technology of the 21st century.

Post-harvest losses in rural-urban value chains: Evidence from Ethiopia Minten, Bart,Tamru, Seneshaw,Reardon, Thomas,2019-09-12 We study post-harvest losses (PHL) in important and rapidly growing rural-urban value chains in Ethiopia. We analyze self-reported PHL from different value chain agents – farmers, wholesale traders, processors, and retailers – based on unique large-scale data sets for two major commercial commodities, the storable staple teff and the perishable liquid milk. PHL in the most prevalent value chain pathways for teff and milk amount to between 2.2 and 3.3 percent and 2.1 and 4.3 percent of total produced quantities, respectively. We complement these findings with primary data from urban food retailers for more than 4,000 commodities. Estimates of PHL from this research overall are found to be significantly lower than is commonly assumed. We further find that the emerging modern retail sector in Ethiopia is characterized by half the level of PHL than are observed in the traditional retail sector. This is likely due to more stringent quality requirements at procurement, sales of more packaged – and therefore better protected – commodities, and better refrigeration, storage, and sales facilities. The further expected expansion of modern retail in these

settings should likely lead to a lowering of PHL in food value chains, at least at the retail level.

**Integration of NGS in clinical and public health microbiology workflows: applications, compliance, quality considerations** Varvara K. Kozyreva,Shanxin (Shaun) Yang,Ruth Evangeline Timme,Peera Hemarajata,Heather A. Carleton,2024-02-05 The expansion of NGS implementation in clinical and public health practice accelerated drastically during the SARS-CoV-2 pandemic, where NGS has been playing a vital role in tracking dangerous strains of the virus. NGS applications not only influenced public health decision-making but also have been crossing into the clinical field with individual patients’ results being potentially available to the physicians. Hence, the topic of implementation of NGS methods in clinical and public health microbiology, its challenges and special considerations, is as timely as ever. The use of Next Generation Sequencing (NGS) in clinical and public health microbiology laboratories has been steadily expanding in the past decade. However, this progress has been held back by multiple logistical challenges, like the absence of regulatory compliance framework, lack of clear quality guidelines, the need for standardization and interoperability between laboratories, as well as cost and turn-around-time limitations.

**Parasitism: The Good, The Bad and The Ugly** Marco A. Juarez-Estrada,Guillermo Tellez-Isaias,Danielle Mahaffey Graham,2023-11-07 Parasitism is a tight association between species in which one organism, the parasite, lives on or inside the host, causing it harm, and is structurally adapted to this way of life. Until the twenty-first century, parasitism was studied by parasitologists, rather than ecologists or evolutionary biologists. Today, parasitism is a major element of evolutionary ecology, as nearly all free-living animals are hosts to at least one parasite species. Since it is in the parasite's evolutionary interest for its host to flourish, long-term coevolution can lead to a stable relationship bordering on mutualism. According to Lynn Margulis, when resources are scarce, natural selection, moves relationships from parasitism to mutualism, as it was brilliantly illustrated in Margulis' endosymbiosis theory, where eukaryotic mitochondria and chloroplasts descended from formerly free-living prokaryotes. Boundary between mutualism, symbiosis, and pathological parasitism is a thin red line that frequently overlapping without a theory enough clear to explain this thigh relationship between the parasite and its host.
